USER-GUIDE Manual for HFT Arbitrage EA:

HFT Arbitrage EA: A trading system based on a backlog of data feed. To work successfully latency arbitrage robot need to faster data feed agent and slow Forex broker where data feed lag.

Data feed lags occurs because the operation of the software error broker and problems on its server. Just broker can use the bridge (Bridge), which connects it with the liquidity provider. In this way, data feed may also be breaking.

Especially strongly noticeable difference in data feed for large volatility market at the time of the release of important news, analysts rating agencies, changes in economic data, and so on.

Lag occurs data feed on most brokers using MetaTrader4 trading platform. This terminal is not perfect, thereby connecting quotes arbitrage robot directly to the Exchange (via updated SAXO Reader) we get the advantage of allowing for 100-300 milliseconds learn price before it will appears in the terminal broker.

Arbitrage software Saxo Reader for HFT (High Frequency Trading) is connected to the fastest data feeds Saxo Bank. To work with SAXO Reader, you will need to open a demo trading account (Link Provided in Package).

HFT Arbitrage EA receives data feed every millisecond from updated 2018 Saxo Reader (Global Trade Station2) and compares them with the prices in the terminal broker.

When there is a backlog of data feed, starts trading expert arbitrage trading algorithm, allows to obtain the maximum profit from each signal.

The following describes the basic concepts, knowledge of which is necessary when working with HFT Arbitrage EA.

Carefully read whole Guide, Open accounts with Our recommended Brokers, Follow Steps, Setup EA on VPS & Enjoy profit...

If you are not a beginner in Forex, then you probably noticed more than once, as the price of the same financial instrument on a single broker differs markedly from another broker. And later equalized prices. This is particularly noticeable at the jump volatility, important news, and sometimes in a quiet market. Why is that you ask? Everything depends on the liquidity provider. Each broker has his own. That's why there are gaps (hovering) quotations. Another reason is the imperfect transmission algorithm quotations in MT4. Brokers to interact with the liquidity provider use Bridge, which is significantly delayed transfer of data (quotes). Of course you will not notice this lag on the eye, it is too small, and especially do not have time to enter the trade. Therefore, only the high HFT robot able to make a profit. Included with the program advisor HFT goes Trade Monitor, which receives quotations from more rapid liquidity provider (Saxo Bank) and transmits them to MT4 is much faster than updated quotes in the MT4. HFT Advisor compares the results and trades in the direction of the backlog (hovering) quotations.

Arbitrage opportunities (Arbitrage Forex) is 100% profitable position that allows you to install a large lot size and a small stop loss. So do not be surprised when our video reports see 100-500% profit in 2-3 days and a huge risk to the transaction. But not as easy as it seems. Broker is not like how high-frequency experts works, and in most cases, the broker pays the profit out of your pocket, so it prevents all the ways this kind of trade.

Forex Advisor HFT - unique in its kind trading system that allows for fractions of a seconds look to the future. This is a kind of time machine in the financial market. Forex Advisor HFT - this high-frequency expert advisor (HFT Arbitrage EA), the principle of operation is based on the backlog (hovering) quotations.

The main problem faced by the trading system HFT is a search for a broker. To date, the Forex market open more new dealing centres, and it opens the way to new profits. We think that our advisor HFT will be profitable for many years to come and, as long as there is a Forex, until there are new brokers, until there are slow and fast data transfer protocol. We in turn will adapt to the new terms of trade and improve our trading HFT robot. Constant search optimization - that's the key to success in arbitrage trading.

Bought Our advisor HFT, do not expect immediate profits. It's a complex trading system, it requires hard work. Before using Our advisor on real accounts, try it on a Demo. Use Our recommended Brokers from List, they are already tested by Us to save Your time and hard earned money.

Carefully read the instructions and all the settings & when you fully understand how it works, then use it only on real accounts. The manual will describe the main points needed for profitable trading advisor HFT. Most importantly - it's a constant search and brute force brokers. This mission rests solely on you.

We will suggest some suitable brokers, but in the future the customer will be looking for new. This is a basic condition on which We sell Our software package HFT. We are sure, the correct and proper advisor work and software for it but results are depend upon Brokers conditions, Market Price feeds, Spread, Leverage, Balance, Equity etc. We have developed an algorithm that allows you to become a high-frequency trader, use lag (hovering) quotations and reap the benefits. You pay for the software. Everything else is in Your hands. It remains for Us to wish You a successful & Profitable trading with Us!

***Step 1 – Account Opening, Verification & Deposit:**

<https://goo.gl/QtQrhQ>

*Account Type: ANY Account type (Tested in 2015, 2016, 2017 & 2018)

If you find ANY Broker doesn't works for You then change to other brokers instantly. Don't stick to the broker who gives LOW Performance on any Arbitrage EA as We said that some brokers don't like Arbitrage Trading and Its Profit.

*Open Accounts on your own risk. Because Latency & trading conditions changes frequently because of server or Policy change of Broker. SO it's possible that it may not work on these brokers after sometime. Please try demo first and then try on Live Account. Search and Keep trying on New Regulated Brokers because they don't have much Clients who do Arbitrage. Don't forget to share it with Us for better testing.

*Step 2 – VPS Setups & Configuration:

***Recommended VPS Configuration**

- CPU: 1.5 GHz OR Higher (one or more processor cores).
- 2 / 4 GB of RAM or higher (more RAM = more Performance and more MT4 terminal can be use).
- HARD DISK Space 25 GB or higher.
- OS (Operating System) Windows Server 2008 SP 2 VPS is the most optimal & recommended for Our HFT advisor Or Windows Server 2012 VPS will also work.

***Recommended VPS Provider Links:**

Ctrl+Click or Copy Paste this links in Your browser & Choose Best plan suitable for You:

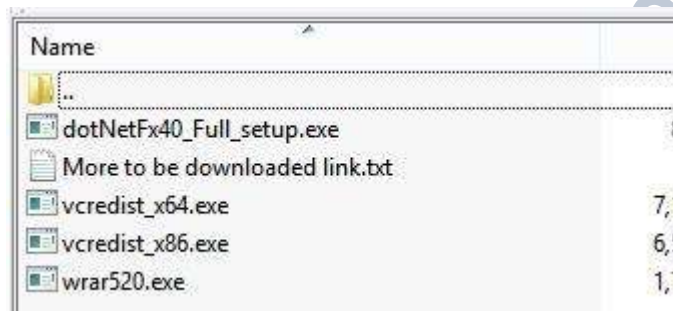

- 1) <https://goo.gl/D2Hg8n>
- 2) <http://goo.gl/6yemVr>
- 3) <http://goo.gl/XenfHN>
- 4) <http://goo.gl/YDYk4L>

Note: Better, if Your VPS Location is near Your Broker's Location. (Ask your broker for MT4 Server Location and then select the VPS location from VPS provider). Most broker servers are Located in US, Netherland, Germany & UK(London).

*Step 3 – Installation Process:

Install ZIP or RAR for extract of folder in VPS, Download & Extract all files on Desktop from Our RAR folder.

- 1) Install Drivers Adobe Flash Player, install Java latest Version and Enable Java, vc_redist. (Some files included in driver folder. if not found then search these file in Google and install updated version on VPS). **Install MT4 also.**
After installation of Drivers, Once Restart the PC/VPS for best results.

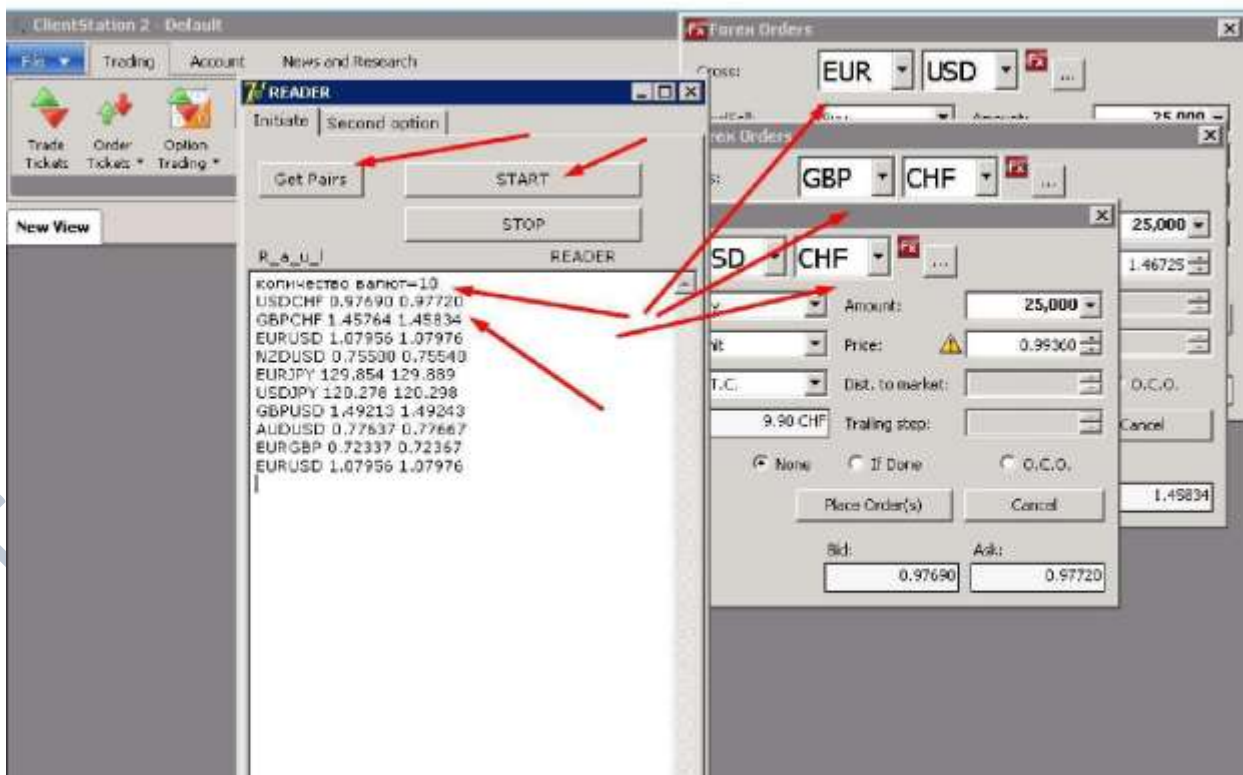

- 2) After Driver Install, restart the VPS, **Now Install GlobalTradeStation2_webdeployor.exe software from Folder.**
- 3) Open GlobalTradeStation2 and In order to connect to Saxo Bank you will need a login and password.
- 4) Click or Copy paste link in Browser <http://www.saxobank.com/demo-account/> to open a Free SAXO account. You will get the ID in Your Email. **Account validity is 20 days.**

****You can renew it for another term by "Forgot Password" method after every 20 days. Its always Free to renew.**

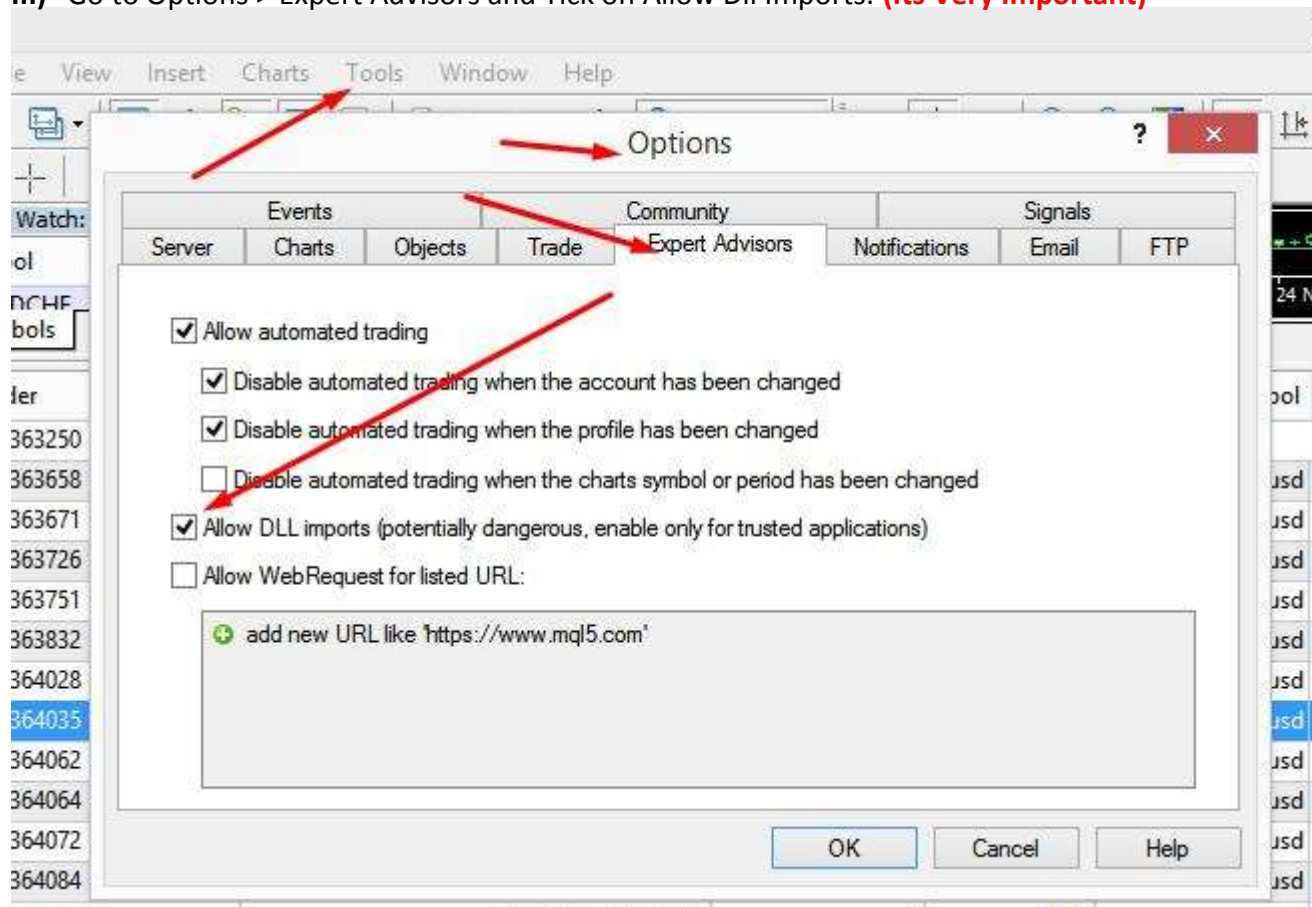

- 5) Enter Username and Password in Global trade station2 or Saxo Trader software. Now Click Login.
- 6) Click on Later when it Ask Upgrade/Update. **Please Never Click on Update else Reader/EA will not work.**
- 7) **Important:** Click **Enable Trading while Login**, then click on **Forex & all Region** if asked.
- 8) Then you have to click **Forex Orders** (Recommended Pairs - EURUSD, GBPUSD, USDJPY, EURJPY, EURGBP, USDCAD, AUDUSD, NZDUSD etc. You can also select which Low spread pair you want to trade).
Forex Order is on Upside left hand side in **Order Ticket** (see Image of Saxo global trade station2 below)

- 9) Then Right Click on Reader & Click **Open as Administrator** and click **Get Pairs** & click **start** and it will feed data like this above image. (If don't see then check installation steps again or reinstall the GTS2)

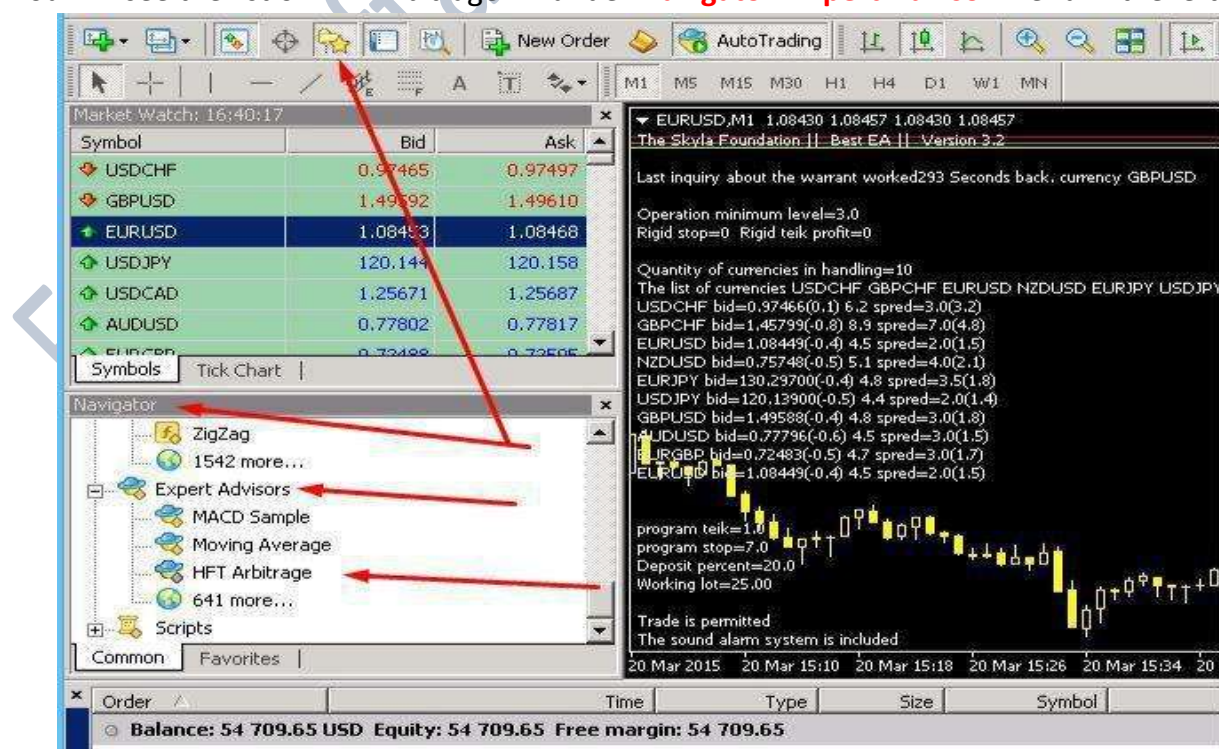

*Step 4 – EA Setup & Settings on MT4

- I) Run **Metatrader4** platform and login your Demo or Real account.
- II) Go to File> Open Data Folder > Copy & Paste .dll file in Libraries and HFT Arbitrage EA.ex4 file in Experts folders.
- III) Go to Options > Expert Advisors and Tick on Allow DLL Imports. **(Its Very Important)**

- IV) Restart the MT4 and follow as below:

You will see the list of HFT Arbitrage EA under **Navigator>Expert Advisor** menu in the left.

Open EUR/USD M1 Candle One 1 chart only. No need to open many Pairs charts. Chart should be clean from any other Indicators/Lines. **Please remove / delete all waste things from Chart before attaching the EA.**

*Attach EA on EURUSD **One chart** Only and EA will Trade on all pair which you selected in Global Trade Station. Just make sure all pairs are showing in Market Watch window in MT4. (To see hidden Pairs Right Click on Pairs list and select **"Show All"** in Market Watch)

***** Now Attach EA to Candle chart of EURUSD M1. Attach EA on ONLY 1(One) Chart & EA will trade on All Pairs which is selected in GTS2.**

Common TAB > Tick on all option of Dll allow / Imports in EA also.

***Settings input of EA:

MinUr - Recommended value minimum 3 or 4 (its Profit Pips from Feed)

Slippage – 0.0 (it will be always 0 Zero) don't enter other input number

Lots – 0.01 or anything if You want

Lots Percent – Lot on % from deposit (I recommend 5 to 40) (Put 0 if want fixed Lot size)

Max_Lots – You can change it as per your preference. (it can be used for fixed Lot Size also)

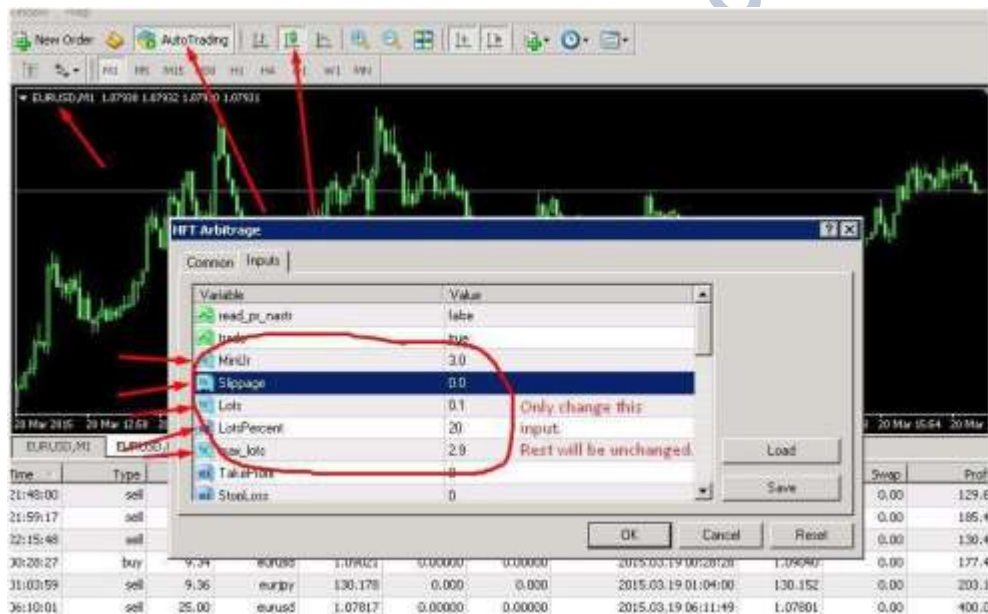

NTrades: (It means max trades on per pair) You can set it as per your choice. We recommend 3

Account – Enter your Live or Demo Account No. to initiate the EA.

Note: TP and SL will be hidden. Don't change any other things. All things remains default/unchanged.

(Settings/Inputs will be same as above for all brokers, No individual Set files are provided for each brokers)

*****Leave all other Inputs settings default/unchanged!!!**

***Important:** Don't forget to Enter your Live or Demo Account No. here, Or EA will not work.

If all Settings is adjusted successfully as per Guide, You'll see chart as below image:

If You don't see selected Pairs on chart then please go to **"Market Watch"** window on Left side of MT4 & do right click and then click on **"Show All"**. You will see all pairs on chart which you selected on Global Trade Station2 and Reader. **Restart Your MT4 after Every major change You made in EA settings for better optimization of EA before trade.**

****Important:**

You can use this EA License on as many as MT4 terminal simultaneously on each VPS. But for Best results, We recommend to use 3 - 4 MT4 Accounts terminal on 1 VPS of 2 GB RAM & 6 – 8 MT4 on 1 VPS of 4 GB RAM above. Find recommended Best VPS links in this Document above.

Remember: Don't install unnecessary Softwares in VPS like Team Viewer, Anti-Virus etc. as it could slowdown VPS Speed & It may leads to low performance with any EA. Every EA requires free & faster environment of VPS to perform better trade's execution etc.
