EXPERT ADVISOR (EA) SPECIFICATIONS

Expert Advisor (Robot) to execute trade orders based on the following criteria:

Open a trade position based on the market candlestick direction (Bullish or Bearish) of the predecessor candlestick which is at the particular specified date and time.

The EA should be able to accept at least 50 entries with conditions for trading

Data Input Parameters Example:

	Input Description	Inputs Value	Explanation/Comments
1	Entry Name	Trade 1	This a name given to the entry
2	Date	17-12-2019	This is an entry input, in the order will be executed.
3	Time	13h00	Should be accurate and synchronised with the trading platform (This should use a terminal time or zone can be set)
4	TP Points	100	Close position once profit in pips are reached
5	SL Points	100	Close position once losses in pips are reached
6	Lot Size	0.5	Volume of the trade
7	Time Frame	1M	Chart time frame
8	Distance to open Trade (After the reference candle stick)	1	Number of the candlestick to count before opening a trade. E.g. If the value is 0, and we have bullish candle at the set time, the EA open the buy position immediately in the next candle. If the value is 1, the EA will count the first bullish after the reference and open buy trade immediately after it is complete.
9	Reference Candlestick validity (Open<>Close)	2 pips	If they are both equal and less than the specified value, the EA will use the next candle stick as the reference.
