# Strategy

1. Once we activate EA it will put two stop orders in opposite direction to each other with a 5 pips distance from the current price.

2. TP = 20 pips for both orders

3. Once first order is activated EA will double the size of opposite position.
   Suppose first order is of .10 lot size than it will add one pending order of .10 into opposite direction order to make it double.

4. If TP of first order is achieved it will delete all pending orders and again will start from the beginning with two stop orders of initial lot size .

5. And if market again trade into the opposite direction without achieving the TP than the flow of orders would be in this sequence ………

suppose spread = 1pip

126 SL of sell orders
125 TP

1   1st order buy .10 ─────── 105
3   +.30
5   +1.20

.10 ─────── 95
+.10   +.60   +2.40

2   4   6

100

total orders in each side
double in size
1   .10
2   .20
3   .40
4   .80
5   1.60
6   3.20

75   TP
74 SL of buy orders

6. Whenever prices reach to the TP EA will delete all pending orders and will again start from the beginning.

7. And if 6th order is activated EA will move SL and TP to 5th order price.

1   3   5

1st order buy .10 ─────── SL of sell orders
105 TP
+.30

.10 ─────── 95
+.10   +.60

2   4   6

100

80   TP
79   SL of buy orders

8. If price move in the direction of TP and achieved it'd done and EA will continue from the beginning.

And if SL +TP achieved at the price of 5th order it's done.

EA will start from the beginning.

EA should have following flexibilities …

1. To change lot size.
2. To change gap between the orders
3. To change TP
4. Option of continue true or false
5. Option of money management
   If money management is true it will take lot size automatically
   On every $500 take lot of 0.01 and so on
   If money management is false it will work on entered lot size.
6. Option of risk (suppose we enter 10 than if equity decrease by 10% it will close all orders and start from the beginning)
7. Will work on specific demo with expiry date
8. Same for live acc.

END
