

Easy Draw (MT4)

Hi programmers. Please could you quote to create the following...

MT4 Script

Easy Draw is a drawing aid palette that sits on the chart. The palette can be moved around the chart (like Sangmane’s Easy Order). The tool makes selecting object parameters quick and easy.

It works in two ways:

1. A rectangle, horizontal line, or trendline is drawn on the chart. Then while that object is selected, (for example a rectangle) click the rectangle button you want the properties of the rectangle to change too. (If a rectangle was selected and you click on a trendline button, nothing would happen).

2. Click on a button so it is selected. (in this example a rectangle again). Then all newly drawn rectangles will be drawn with those parameters.

Notes:

It only works with rectangles, horizontal lines or trendlines.

I will modify the code to add or change object parameters. I am not a programmer. Please write explanations in the code so I can see where I can make the changes.

Keep the design of the palette very simple and clean - no need for fancy edges. Stick to my design as much as possible.

I want to have an image on the button (not text) that describes the object, like below. I can create these images in Adobe photoshop, or just screen grabs of the chart. Let me know if you want me to supply these during your development of the code. In the code explain how I can link new images if I change or add a new object.

Objects to appear ‘On the TF it is drawn and below’ can be modified afterwards. The ‘On the TF it is drawn and below’ instruction only applies when they are first drawn.

I give permission for the programmer to modify and sell the script in the market as thier own (but I want free updates ;-).

		Object	Colour	Parameters	Vizualisation (Time frames)
Small grey area at top that allows grabbing & moving around chart		HLine	Indigo	Thinnest, solid	All TF's
		HLine	Purple	Thinnest, solid	H4 and below
		HLine	Med orchid	Thinnest, solid	H1 and below
		HLine	Plum	Thinnest, solid	M15 and below
		TrendLine	Med orchid	Thinnest, solid, no ray	On the TF it is drawn and below
Depressed, showing that this one is currently active, so all rectangles draw will have these settings		TrendLine	Slate grey	2nd thinnest, solid, no ray	On the TF it is drawn and below
		Rectangle	Silver	Fill	All TF's
		Rectangle	RGB: 188/197/189	Fill	H4 and below
		Rectangle	RGB: 181/204/188	Fill	H1 and below
		Rectangle	RGB: 181/204/203	Fill	M30 and below
		Rectangle	RGB: 180/191/205	Fill	M15 and below
		Rectangle	RGB: 191/179/206	Fill	M5 and below
		Rectangle	LightGray	Fill	On the TF it is drawn and below
		Rectangle	DimGray	Thinnest, solid, No fill	On the TF it is drawn and below
		Rectangle	Indian Red	Thinnest, solid, No fill	On the TF it is drawn and below
		Rectangle	Thistle	Fill	On the TF it is drawn and below
