IN Chart

Buy Stoploss			
1.17333	Update	Updated to	1.17333

Sell Stoploss			
1.17233	update	Updated to	1.17133

#### NOTE:

Both alerts should be different (If possible). And it should create message box for each alert,

#### Example:

EURUSD (Symbol) ADX crossed above Moving Avg at 5 minutes time frame

EURUSD (Symbol) ADX crossed above 20.

After update the stoploss, The stoploss value should be shown on the chart by drawing horizontal lines.

Buy stoploss ( green colour)

Sell Stoploss ( Red colour)

There is no connection between EA inputs, and the Stop loss.

EA inputs used to check for place orders; once I place orders I will update stop loss and work accordingly
