

Big Price Move

- Last 1h The price must have moved at least 30% more than the previous 5 bars, minimum range on trigger bar 300 pip
- Purchases are made 10 points from the highest or lowest from the last bar A)
- If the price does not pass the entry point during the next bar, orders will be deleted

Profit ATR

- The ATR level is set to the value when entry a trade
- When profit is to be made it is made in 3 parts
- First profit 1/3 are made when the price has moved in right direction X numbers ATR
- Second Profit 1/3 are made when the price has moved in right direction X numbers ATR
- Third Profit 1/3 are made when the price has moved in right direction X numbers ATR

Stoploss

Stoploss is based on the ATR level XX times.

ATR level is set when entry a trade.

When the price is moving in the right direction, the stop loss must be moved by the predetermined factor XX times

Other requests

I would like to see my target orders in the chart, like green lines

This a box when EA is running

- Name of EA as it shows in this one, is it possible to make I twice as much text would be better
- UTC time (set time)
- If Allow trading is OK
- Auto or fixed lotsize
- Lot Size

```
Barck RSI Scalp EA - V1
=====
ATR Period = 5
RSI Period = 7
RSI Hi Level = 70
RSI Lo Level = 30
Fast MA Period = 15
Slow MA Period = 60
```
