

I need a simple system (expert, indicator or script. Not important) that will write trades from MT4 to a .txt file with a specified format. In the code, the location of txt file should be specified. I may need to change it (Eg. D:\Folder\Folder2 ...)

It will always update the .txt file.

The format of txt file will be like following

13101187; 16:00:00; buy; usdtry; 3.67865; 3.65456; 3.24159

OrderID + Semicolon + space + **TradeOpenTime(Not Date, only time)** + Semicolon + space + **Type** + Semicolon + space + **Symbol** + Semicolon + space + **Price** + Semicolon + space + **S/L** + Semicolon + space + **T/P**

Format is important, because I'm using the txt file for a desktop application that works according to the mentioned format.

Sample;

Our Trades On Trade Window are followings

13251381	2017.04.04 16:00:00	buy	1.00	usdtry	3.66883	3.65000	3.67883
53369874	2017.04.05 14:00:00	buy	1.00	xauusd	1255.14	1254.21	1256.99
12069878	2017.04.05 18:00:00	sell	0.40	eurusd	1.06640	1.06991	1.05250

Our Sample.txt file will be following

13251381; 16:00:00; buy; usdtry; 3.66883; 3.65000; 3.67883

53369874; 14:00:00; buy; xauusd; 1255.14; 1254.21; 1256.99

12069878; 18:00:00; sell; eurUSD; 1.06640; 1.06991; 1.05250

When any trade modified, our Sample.txt file will also be modified without any delay/latency. For example;

Our Trades On Trade Window are modified

13251381	2017.04.04 16:00:00	buy	1.00	usdtry	3.66883	0.00000	0.00000
53369874	2017.04.05 14:00:00	buy	1.00	xauusd	1255.14	1254.21	1256.99
12069878	2017.04.05 18:00:00	sell	0.40	eurusd	1.06640	1.06991	1.05250

Our Sample.txt file will be following

13251381; 16:00:00; buy; usdtry; 3.66883; 0.00000; 0.00000

53369874; 14:00:00; buy; xauusd; 1255.14; 1254.21; 1256.99

12069878; 18:00:00; sell; eurUSD; 1.06640; 1.06991; 1.05250

When any trade closed, we will delete it from the Sample.txt file. When a new trade opened, we will add it to the Sample.txt file and we will do all of them without any delay.
