

## Project name: EquityMenager\_EA

This EA is to monitor the profitability of all trades in the account by currency pairs and Account Equity. Close all trades of an individual Pair or all trades depending on the closing criteria. Maintain and calculate equity target (No manual Input required).

Works with 4 and 5 decimal brokers.

Source code required

We will have full rights on this code to modify, publish and or sell.

### Inputs:

Parameter	Options/Value	Default Value
Equity Target Type	% / Amount	%
Equity Target	(Value)	1
Pair Target Type	Pips/Amount	Pips
Pair Target	(Value)	20
Magic Number	(Optional)	0

### Close Conditions:

#### Close All Trades/Orders

When equity increased by % / Amount from the previous equity closure. Profit Target should be calculated based on Equity Target Type and Equity Target. Calculate Next Equity Target  
*Do nothing when Equity Target is 0.*

#### Close All Trades/Orders the particular pair

When pair profit reaches Profit Target, Profit Target should be based on Pair Target Type and Pair Target  
*Do nothing when Pair Target is 0.*

#### Magic Number

Action only on those trades matching magic number when magic number is available, Act on all trades if magic number is BLANK or 0
