

GoldenEA-V1.0

ReboundS/R:

Rebound on the support and resistance of the "Support_Resistance_Barry", "vS_PivotsD_v4" and "Support and Resistance # TLB OC v02" indicator

Rebound Support:

Take Profit = Resistance (Takes into account that the indicator is dynamic)

Stop Loss = 0

Rebound Resistance:

Take Profit = Support (Takes into account that the indicator is dynamic)

Stop Loss = 0

Possibility to change the indicator for the strategy "ReboundS / R" and "BreakoutS / R" as mentioned in the PDF "EN (GUIDE) GoldenEA-V1.0" in the section "**** Strategies ****"

BreakoutS/R:

Breakout of the support and resistance of the "Support_Resistance_Barry", "vS_PivotsD_v4" and "Support and Resistance # TLB OC v02" indicator

Take Profit = 0

Stop Loss = 0

Possibility to change the indicator for the strategy "ReboundS / R" and "BreakoutS / R" as mentioned in the PDF "EN (GUIDE) GoldenEA-V1.0" in the section "**** Strategies ****"

BreakoutMovingAverage:

Breakout of the Moving Average indicator

Take Profit = 0

Stop Loss = 0

Low:

Open Buy Order if the price breaks through Resistance, then the bar closes above this level and the price keeps rising above the High bar at which the Resistance level was passed.

Open Sell Order If the price breaks through Support, then the bar closes below this level and the price keeps falling below the Low bar at which the Support level was passed.

Medium:

If the price breaks through Resistance and the bar closes above this level, open Buy Order.

If the price breaks through Support, and the bar closes below this level, open Sell Order.

High:

If the price breaks through Resistance, open Buy Order.

If the price breaks through Support, open Sell Order.
