

You need to deliver the source codes, then leave me full ownership of the indicator, leaving me 100% copyright on it (for use, sale, publish or anything other) by accepting the job you accept this

The indicator must necessarily use #property strict and OnCalculate function

In general, the indicator should not undergo any changes in its functionality

Objective of the work: to repair all loading errors in the mql5 system (prior to publication), without compromising any functionality of the indicator

Remember that it is necessary to deliver the indicator without errors

Program type: mql5

Test report for version 1.0✕

Validation state: Validation completed with errors

Errors count	1	Type	Indicator
Started	2021.05.17 11:48:04		
Finished	2021.05.17 11:48:41		

```
test on EURUSD,H1 (netting)
test on XAUUSD,D1 (netting)
2020.05.01 01:05:00  array out of range in 'Dark Sprint.mq5' (184,19)
```

 [The checks a trading robot must pass before publication in the Market](#)
