Reference Documents	<ul style="list-style-type: none"><li>• n/a</li></ul>

### 1.0 Trading idea

I am looking for an off the shelf MT4 EA which meets the basic requirements listed here below. All of these requirements should be "per pair".

- Return >5% per month using money management (less without MM is ok)
- Backtested from at least 2008 to now
- Low peak drawdown over tested period
  - <10% acceptable
  - <5% ideal
- Ideally simple tp/sl system
- Does not use:
  - dll
  - martingale and related systems
- Operates according to magic number and will not interfere with other EAs, regardless of the pair.
- Operates on 200:1 leverage at least.

Nice to have but not crucial:

- An identical MT5 version
- The uncompiled code

If possible, I would like to be able to test the system on a live demo for at least one month. In this case please feel free to provide me with a time limited copy of the EA, and the job would remain open as long as required.

Looking forward to reading your responses!
