

Cameronb3216

I currently have the EA which I have sent you with this and I would like some updates on it. I would like everything exactly the same except what I will explain below.

(1)

I would like actual levels drawn on my charts which will be every 50 pips away from each other such as 1.1700,1.1750,1.1800 etc. I would like to actually see these levels on all the pairs I wish too. I have drawn a picture below so you can see what I mean. I would like these lines BLACK and the THINNEST it can be such as:

(2)

I would like my EA updated so I do not enter the trades within (X) amount of pips of the support and resistance levels which I have drawn above. For example if an entry on my EA comes within 3 pips of the horizontal lines which I use as support and resistance then the trade should not be placed and it should come up as void and an entry should not happen. An example is below:

Upon completion of picking a programmer, I will then tell the true values of the figures etc.

I believe this is all I need changing, but if I remember anything else I will be sure to tell you about it and pay any additional cost it will be to add it to it etc.
