

## Trading in the Zone EA Update

---

Please update the EA with new features

### 1 Please add the timeframe that the EA can operate

Please add the 30 min, 15 min as well

### 2 Signal display

This also should be added as an option

Note that for all the 3 pending orders, they will have their own Buy limits and own stop loss, but when it's its come to the take profits, the first take profit for all the pending order will be related to the take profit of buy limit 1 or sell limit 1.

Example: Here in this case take profit 4 was selected

Now if all the buy limits are triggered, they will all the same profits and here is an example below on how the update of the EA should be displayed

For the take profit, we will have one TP, **which is take profit 4**

TP Type	Multiplied by Zone Range
01 Fixed TakeProfit, 0 = Disabled	400
1/2 Range Multiplier for TP 1	2

===== TP Lines Settings =====	
Show TP Lines When TP is Hidden	false
TP 1 Line Color	<input checked="" type="checkbox"/> Indigo
TP 2 Line Color	<input type="checkbox"/> None
TP 3 Line Color	<input type="checkbox"/> None
Lines Width	2

So if the user choose take profit 4, the output should be this way.

USTEC

Daily timeframe

Buy limit 1: 14848.80

Stop Loss: 14737.00

Buy limit 2: 14792.90

Stop Loss: 14681.10

Buy limit 3: 14737.00

Stop Loss3: 14533.00

Take-profit 1 = 11180

Take-profit 2 = 22360

Take-profit 3 = 33580

Take-profit 4 = 44660

All this take profit should be based on the range of the detected candle.

TP 1 = body of the detected candle x 1

TP 2 = body of the detected candle x 2

TP 3 = body of the detected candle x 3

TP 4 = body of the detected candle x 4

Here we will have only one line to show the take profit based on the risk to reward ratio since all buy limits or sells limits will have the same take profits.

So the solid line here will display take profit 4

===== TP Lines Settings =====	
Show TP Lines When TP is Hidden	false
TP 1 Line Color	<input checked="" type="checkbox"/> Indigo
TP 2 Line Color	<input type="checkbox"/> None
TP 3 Line Color	<input type="checkbox"/> None
Lines Width	2

### **3 Stop loss**

For the stop loss please add an option where the user can choose that all the stop loss should be based on the stop loss of sell limit 3 or buy limits 3

**Very important notice.**

Sometime the EA take long to load the char and the zone.
