

## **Fractals PSAR EA**

I would need an EA based on this thread:

<https://www.forexfactory.com/showthread.php?t=92731>

With the parameters of:  
the PSAR

accessible through the EA.

*Rules/Parameters:*

--Stoploss most recent High Fractal in a Short Trade and the most recent Low Fractal in a Long Trade

-*Breakeven*: If the trade reaches a certain amount of points

-*Trailing*: After Breakeven is performed, the trailing stop should kick in based of the parameters of the Chandelier Exit Indicator (ATR). The values should be able to be modified.

-*News*: Would be great if the EA stops a certain amount of time before High Impact News and continues after.

-*Lot Size*: Option for fixed lot size and based on Equity.

For Equity example: 1000 € → 0.01

2000 € → 0.02
