

1. EA opening time (in this example) 14:00 (possible change in parameters)
2. EA on opening time (candle on opening time) should find out TREND (SELL or BUY).
3. EA should find the FIRST CANDLE of the TREND.  
If sell it should TAKE "HIGHEST PRICE" LEVEL OF THE CANDLE  
If buy it should TAKE "LOWEST PRICE" LEVEL OF THE CANDLE
4. EA calculating difference of the "OPENING TIME" and "TREND FIRST CANDLE".  
If SELL, then "HIGHEST PRICE" – "OPENING TIME".  
If BUY, then "OPENING TIME" – "LOWEST PRICE".
5. It will be put range in EA when EA will be VALID.  
For example range (in pips)  $-3.0 \leq \dots \leq -1.0$ . (but not  $\leq -1.0$ ). If difference will be +2pips, means ORDER is NOT VALID. If difference will be -2.75pips, mean ORDER WILL BE VALID.
6. Parameter CHECKPOINT. In this case 30pips (possible change in parameters). It is max TREND move before price is back to TREND START. If price is reaching this level before back to TREND START – ORDER NO VALID. It can be seen on examples.  
If price goes first to TREND START, this parameter become NO VALID any more.
7. In this Example Nr.1 Order will be opening then PRICE will go in LOSS for -25pips. Loss from TREND HIGHEST PRICE (sell order) or TREND LOWEST PRICE (buy order). In example "pvz.3.2" can be seen that difference will be with "-" and price not back to TREND START (HIGHEST PRICE) and straight goes to LOSS ZONE. So at this case ORDER WILL NOT BE VALID.  
ORDER will BE VALID only later, then price will be back to TREND START HIGHEST PRICE LEVEL
8. SL(main) and TP(main)
9. SL1 and TP1.
10. TP2 and SL2

When order is opening it will depend on price movement. If first it will go to loss zone and reaching SL1 level, so TP(main) is changing to TP1.

If price moves to profit zone, so after price will reach TP2 level, SL(main) is changing to SL2. The idea is very similar to trailing situation.

11. Order in any case is closing on next day (example) at 10:00. If till that time order will not reach any TP or SL it has to be closed. Not matter (in profit or loss).
12. Next day at 14:00 already NEW ORDER.
13. It can not be opened 2 orders at one time.

It will be 4-5 different EA. Everything will be the same. Only will be different Nr. 7 (order executions rules).
