# Modified existing indicators and protect this indicator with license code
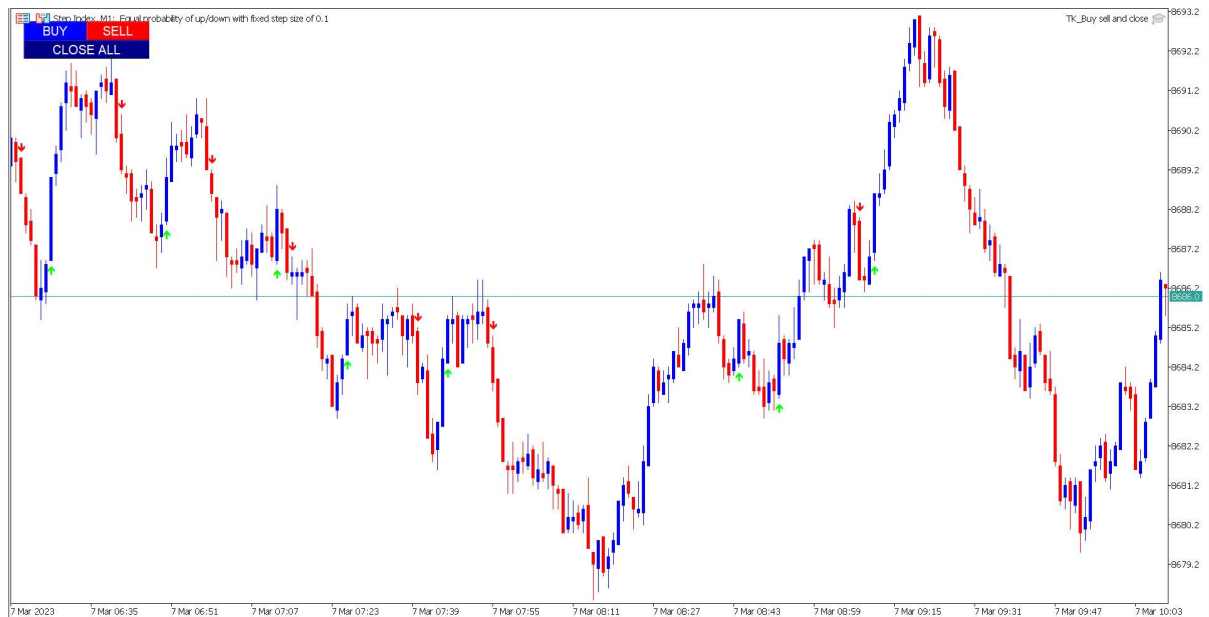

STEP 01 : Modifie Schaff Trend Cycle

I have a Schaff Trend Cycle - indicator for MetaTrader 5 in .mq5 and I want this indicator shows a buy and sell Arrow. Like this
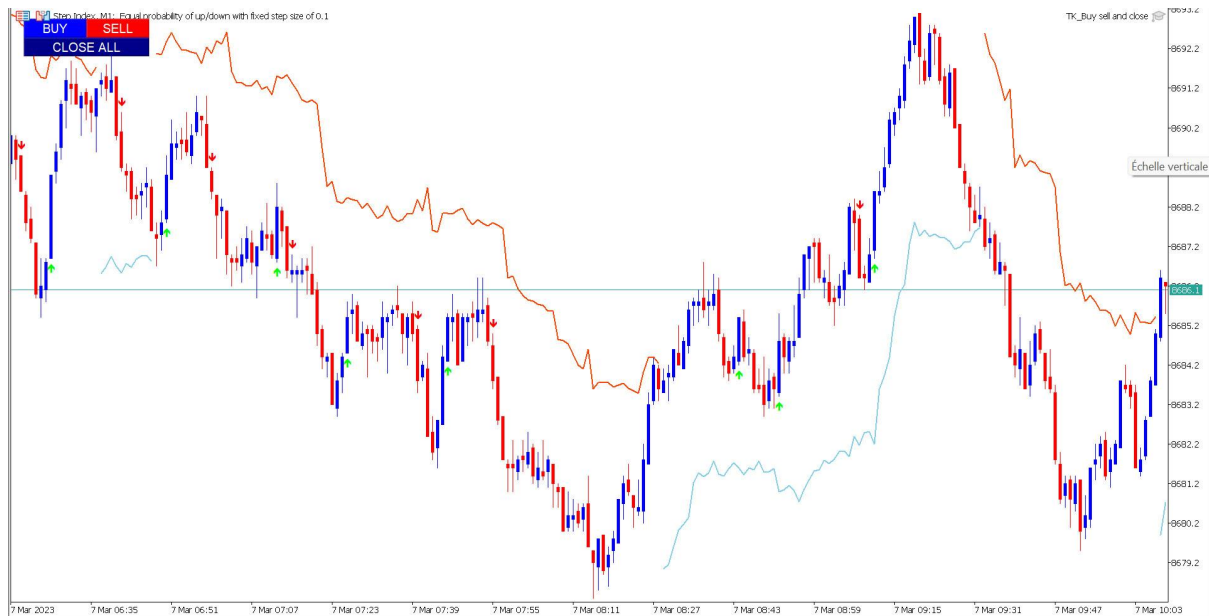

Before :

After :

STEP 02 : Mix the modified indicator with Ntr_color_indicator to make one indicator like this

STEP 03 : Licence Code

- This indicator will be for rent for a mouth, don't forget to put a license syteme : License code per account number (demo and real), expiration date.

Example of license code :

//License Code
datetime expire   = D'2023.04.05 23:59:00';
int   Account_Number[] ={30639356,100545436}; // Account_Number[] ={123,456,...}

STEP 04 : Rename All

Rename or remove all words with Shaff ans Ntr_color_line. I don't want people to know the origin of my indicator.

Thanks.
