

Indicator Requirements

Looking to convert an indicator which is available on trading view with an open source code to mt4. It must have the exact same options and look / feel – adding to this indicator I want it to be able to scan multi currencies 20+ and alert on certain conditions.

The look and feel in Mt4 must look exactly like trading view section 4 of this document.

Details to follow below

1. Adding the indicator on trading view

2. **Inputs** on the Expanded Camarilla levels indicator

Expanded Camarilla Levels

Inputs

Style

Visibility

HTF Method

Auto

Time Frame (if HTF Method=User Defined)

1 hour

☐ Show Only Last Period

☒ Show Labels

Line Style

Solid

☐ Show H1/L1

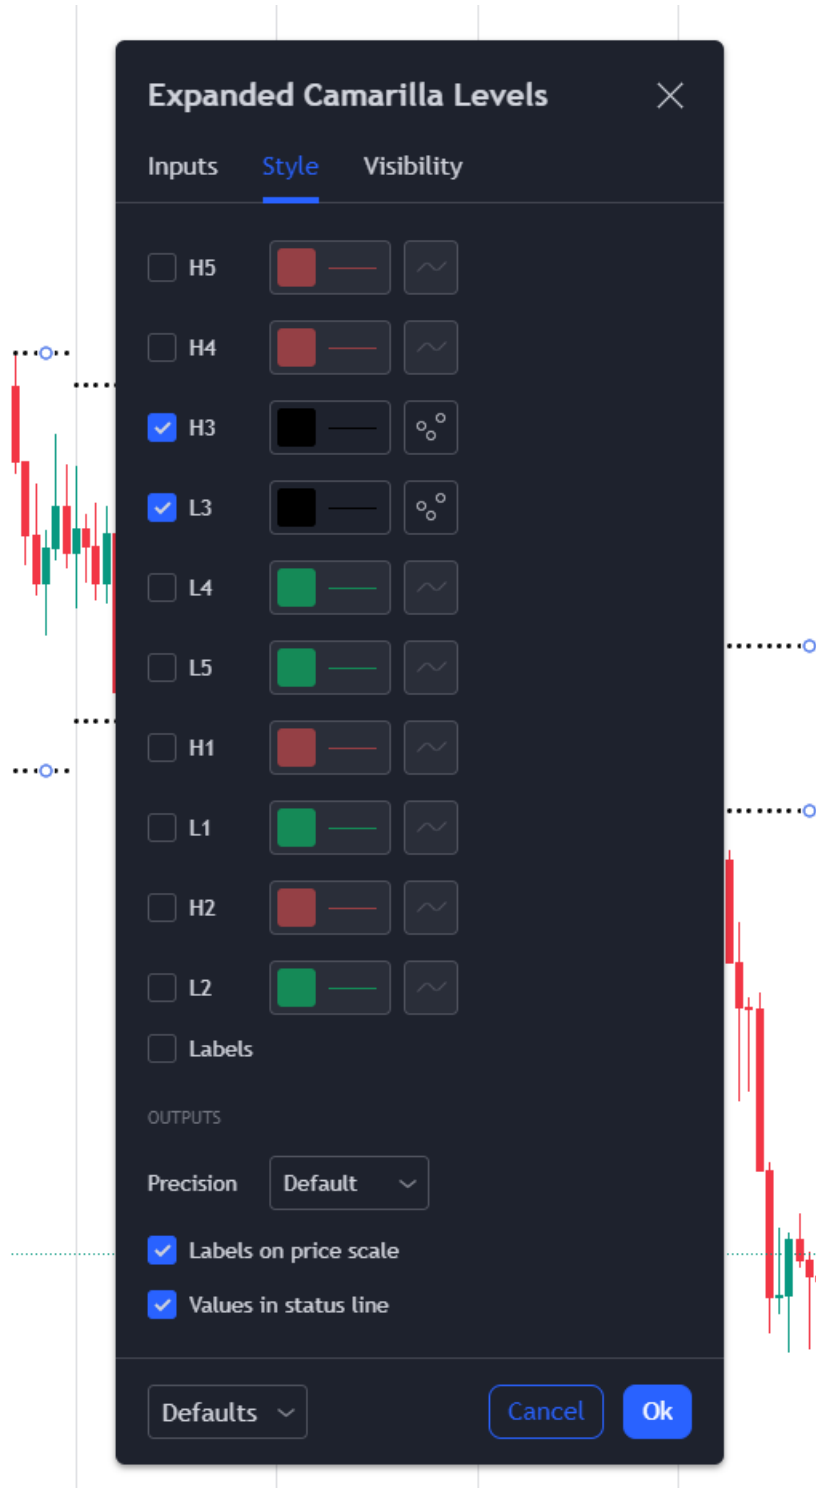

☐ Show H2/L2

Defaults

Cancel

Ok

3. **Style** on Expanded Camarilla levels indicator

4. The look and feel of the indicator after adding all of our above customization.

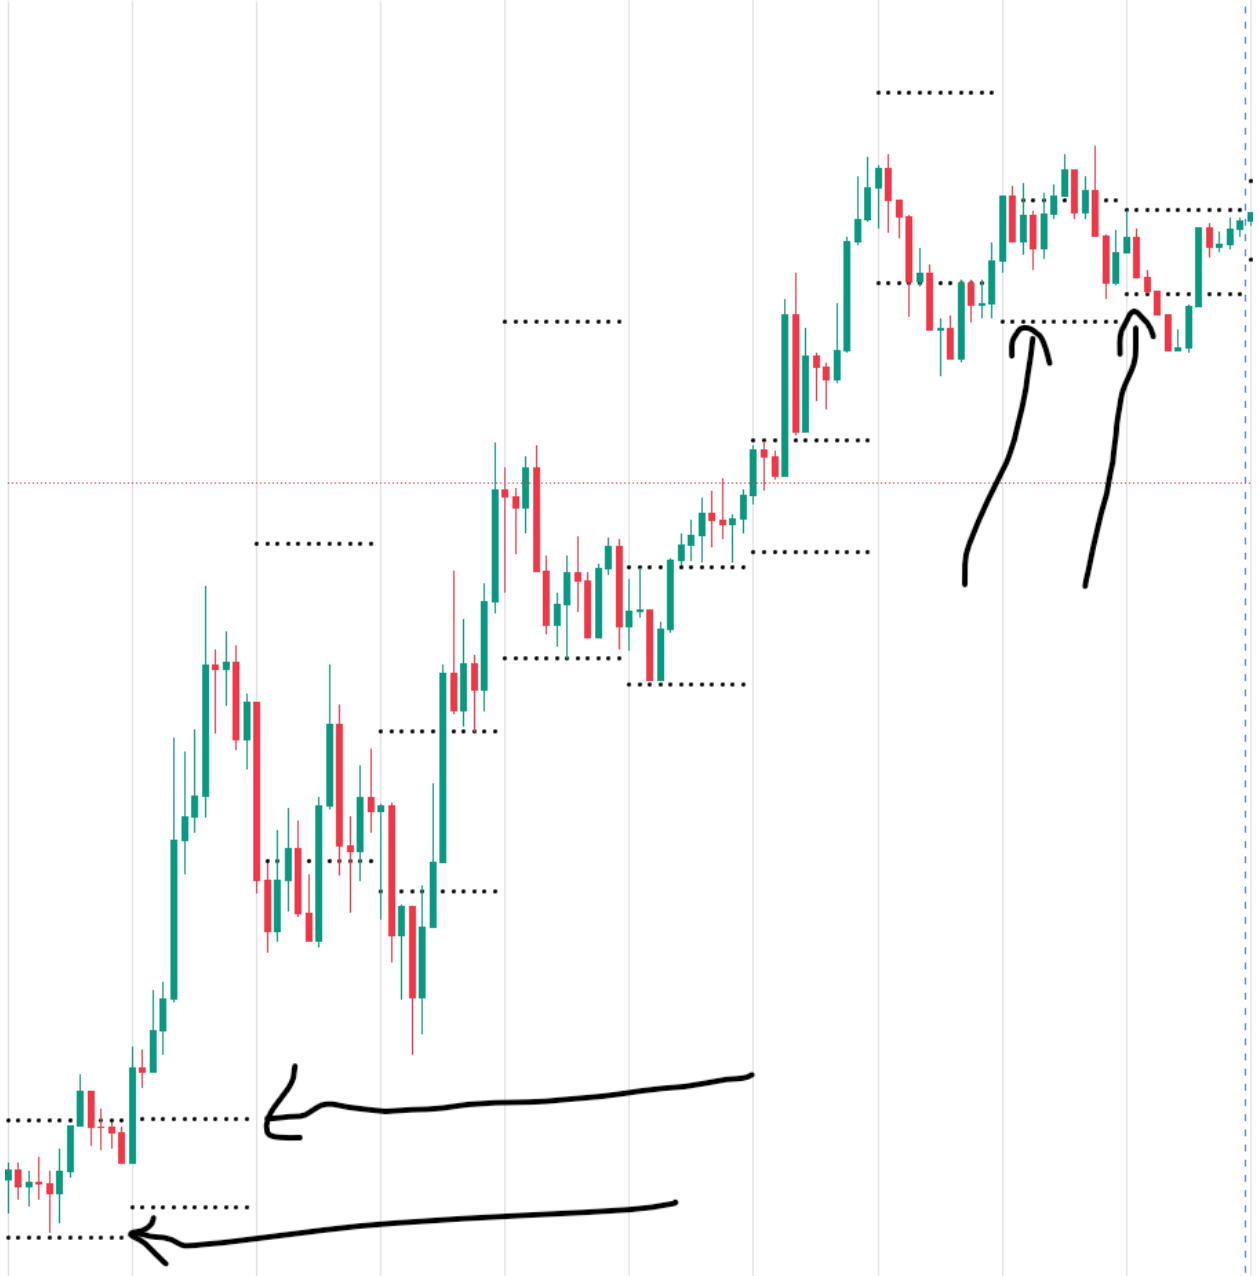

5. **Alert Requirements** – popup alerts and Push Alerts for the following
Current Hour H3 and L3 are inside the previous hour H3 and L3
Few examples below

Gold Spot / U.S. Dollar · 5 · OANDA O 1969.550 H 1969.695 L 1969.185 C 1969.310 -0.240 (-0.01%)

Expanded Camarilla Levels 1971.852 1970.108

6. **Scanner / Dashboard** – the indicator should be able to scan multiple currencies and alert if the above-mentioned condition is met – it has to show a box for each trading hour in 1 day and then reset at the end of each trading day.
