

## Modify existing mt5 indicator (Add 2 new column with conditions)

I have the source code and need someone to help MODIFY the Multi-Pair Average Range Scanner Alerts Indicator and add 2 new columns of 15% of APR and 10% of APR.

1. Add 2 new columns: 15% of the APR and 10% APR.

2. Round off numbers in both columns and add condition as below (use attached excel sheet as reference):-

- For column '15% of APR': Any values less than 10 will show as '10'. E.g. if APR is 53.4, 15% of 53.4 is 8 (Rounded). So, the number in column '15% of APR' is just '10'.
- For column '10% of APR': Any values less than 10 will show as '11'. E.g. if APR is 53.4, 10% of 53.4 is 5 (Rounded). So, the number in column '10% of APR' is just '11'.

3. Make the design look better and the currency pairs clickable (open new chart when click the currency pairs)

I have made the excel sheet for your reference (Example only). The table in excel is the new column needed to be add into the indicator.

Symbol	APR	CurR	Percent	Near	Distance	Alert	Time Last Alert(L)	15% of APR	10% of APR
DX.f	53.4	18.6	34.8%	Low	-36.3			10	11
AUDJPYp	66.7	35.3	52.9%	High	41.5			10	11
AUDUSDp	50.4	19.0	37.7%	High	38.3			10	11
EURJPYp	99.8	51.6	51.7%	High	56.1			15	11
GBPJPYp	120.0	67.3	56.1%	High	78.2			18	12
GBPUSDp	72.8	33.4	45.9%	High	52.4			11	11
NZDUSDp	52.1	19.0	36.5%	High	36.5			10	11
USDCADp	64.9	21.0	32.3%	Low	-54.2			10	11
USDCHFp	60.4	23.5	38.9%	High	48.2			10	11
USDJPYp	115.3	49.9	43.3%	High	82.9			17	12
EURUSDp	61.9	24.6	39.7%	High	39.3			10	11
