EA will trade according to the 1st data. if loss, trade in reverse direction according to 2nd data. If you lose again, trade in the reverse direction again with the 3rd data. etc. trades given data in the reverse direction only at a loss. if profit, start in same direction with 1st data.

It is important that trades have detailed TP price and SL prices. it is enough to be a small alogrithm.

and has 2 simple functions of gain and loss.

	1st data	2st data	3st data	4st data	5st data	6st data	7st data	etc…
LOT	1st lot	2st lot	3st lot	4st lot	5st lot	6st lot	7st lot	etc…
TPpip	1st TPpip	2st TPpip	3st TPpip	4st TPpip	5st TPpip	6st TPpip	7st TPpip	etc…
SLpip	1st SLpip	2st SLpip	3st SLpip	4st SLpip	5st SLpip	6st SLpip	7st SLpip	etc…
Stop if **total** win								
Stop if **consecutive** loss								

1st order
        If SELL
                SL price = Current price + 1st SLpip
                TP price = Current price - 1st TPpip
        If BUY
                SL price = Current price - 1st SLpip
                TP price = Current price + 1st TPpip

2st order
        If SELL
                SL price = SL price (previous) + 2st SLpip
                TP price = SL price (previous) - 2st TPpip
        If BUY
                SL price = SL price (previous) - 2st SLpip
                TP price = SL price (previous) + 2st TPpip

Etc…

Note: if there is no offer, the closest offer will be taken. data must be sequential.
