

I need a non-trading Renko EA with the following mode presets. Renko chart must be live. Renko body calculation mode - Ticks.

 Renko body calculation mode	Ticks
 Renko mode preset	Renko
 Renko mode preset	Median Renko
 Renko mode preset	PointO
 Renko mode preset	Turbo Renko
 Renko mode preset	Hybrid Renko

When attached to the chart, we should see two windows. One window should look like this, allowing another custom EA to be uploaded.

The other window should look like this (we should see the name of the EA in here)

See below the other info, we should be able to change the number of days (instead of 5 maybe 10, 15, etc).

01 Open offset % (0 to ..)	50
01 Reversal Open offset % (0 to ..)	50
01 Reversal bar size % (0 to ..)	150
 Show wicks	Yes
01 Show history for number of days	5
