Dashboard Settings

- Dashboard corner: choose the corner or disable the dashboard
- Statistics text color: color for the statistics
- Max Bars: Max number of bars for apply the indicator
- Custom chart: use my favorite colors in your chart

BASE

The signal is based on points

- Red Point is a Short signal.
- Green Point is a Long signal.

I have entered multiple levels of take profit and stop loss

This is because in this way, you can make "partial" closures based on these levels

Of course, Green Line is a Take Profit

Red Line is a Stop Loss

Dark Point Market Scanner

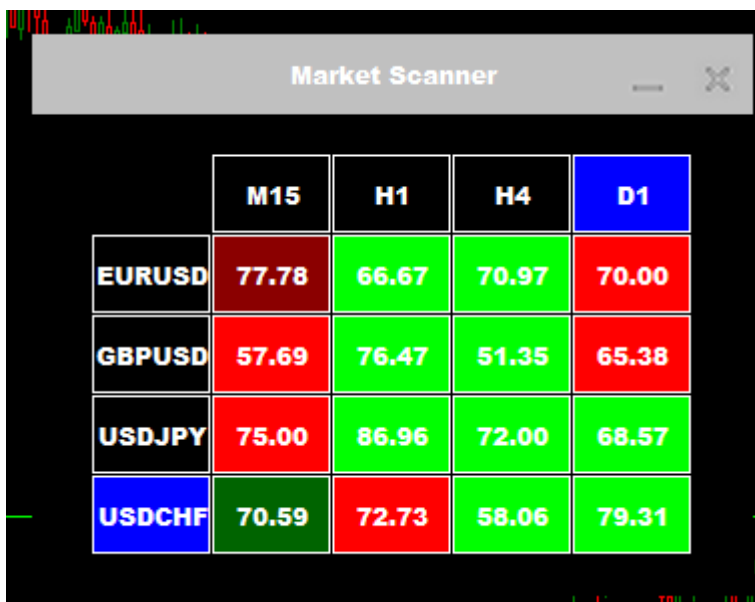

Put the market scanner in "indicators" folder in the MT4 or MT5 platform

Then for add symbol and timeframes, there is the appropriate section

Check the image below

===== Symbols & TFs Settings =====	=====
ab Symbols Separated by Comma	EURUSD,GBPUSD,USDJPY,USDCHF
Timeframe M1	false
Timeframe M5	false
Timeframe M15	true
Timeframe M30	false
Timeframe H1	true
Timeframe H4	true
Timeframe D1	true
Timeframe W1	false
Timeframe MN1	false

When the Market Scanner appears, you can click any button to change the timeframe and symbol

The Market Scanner window displays a grid of success rates for four symbols (EURUSD, GBPUSD, USDJPY, USDCHF) across five timeframes (M15, H1, H4, D1). The current selected timeframe is D1 (blue header), and the current selected symbol is EURUSD (dark red header). The success rates are as follows:

	M15	H1	H4	D1
EURUSD	77.78	66.67	70.97	70.00
GBPUSD	57.69	76.47	51.35	65.38
USDJPY	75.00	86.96	72.00	68.57
USDCHF	70.59	72.73	58.06	79.31

The numbers indicate the success rate

Colors explain:

- Red: Current signal is a sell signal
- Green: Current signal is a buy signal
- Dark Red: Current signal is a sell signal and it is in the last 5 candles
- Dark Green: Current signal is a buy signal and it is in the last 5 candles

You can change the “5 candles” from settings

for now these are the settings! Very thanks!
