

Grid Line Indicator Specifications

Indicator must be look like as Trading View Grid Indicator as shown in below screenshot.

1) When I select "Number of Zones" =20 (it means from current market towards upward draw 20 grid lines and towards downward draw 20 grid lines as shown in below screenshot.

3) Zone width:

Example:

when select width as :1

when select width as :3

when select width as :5

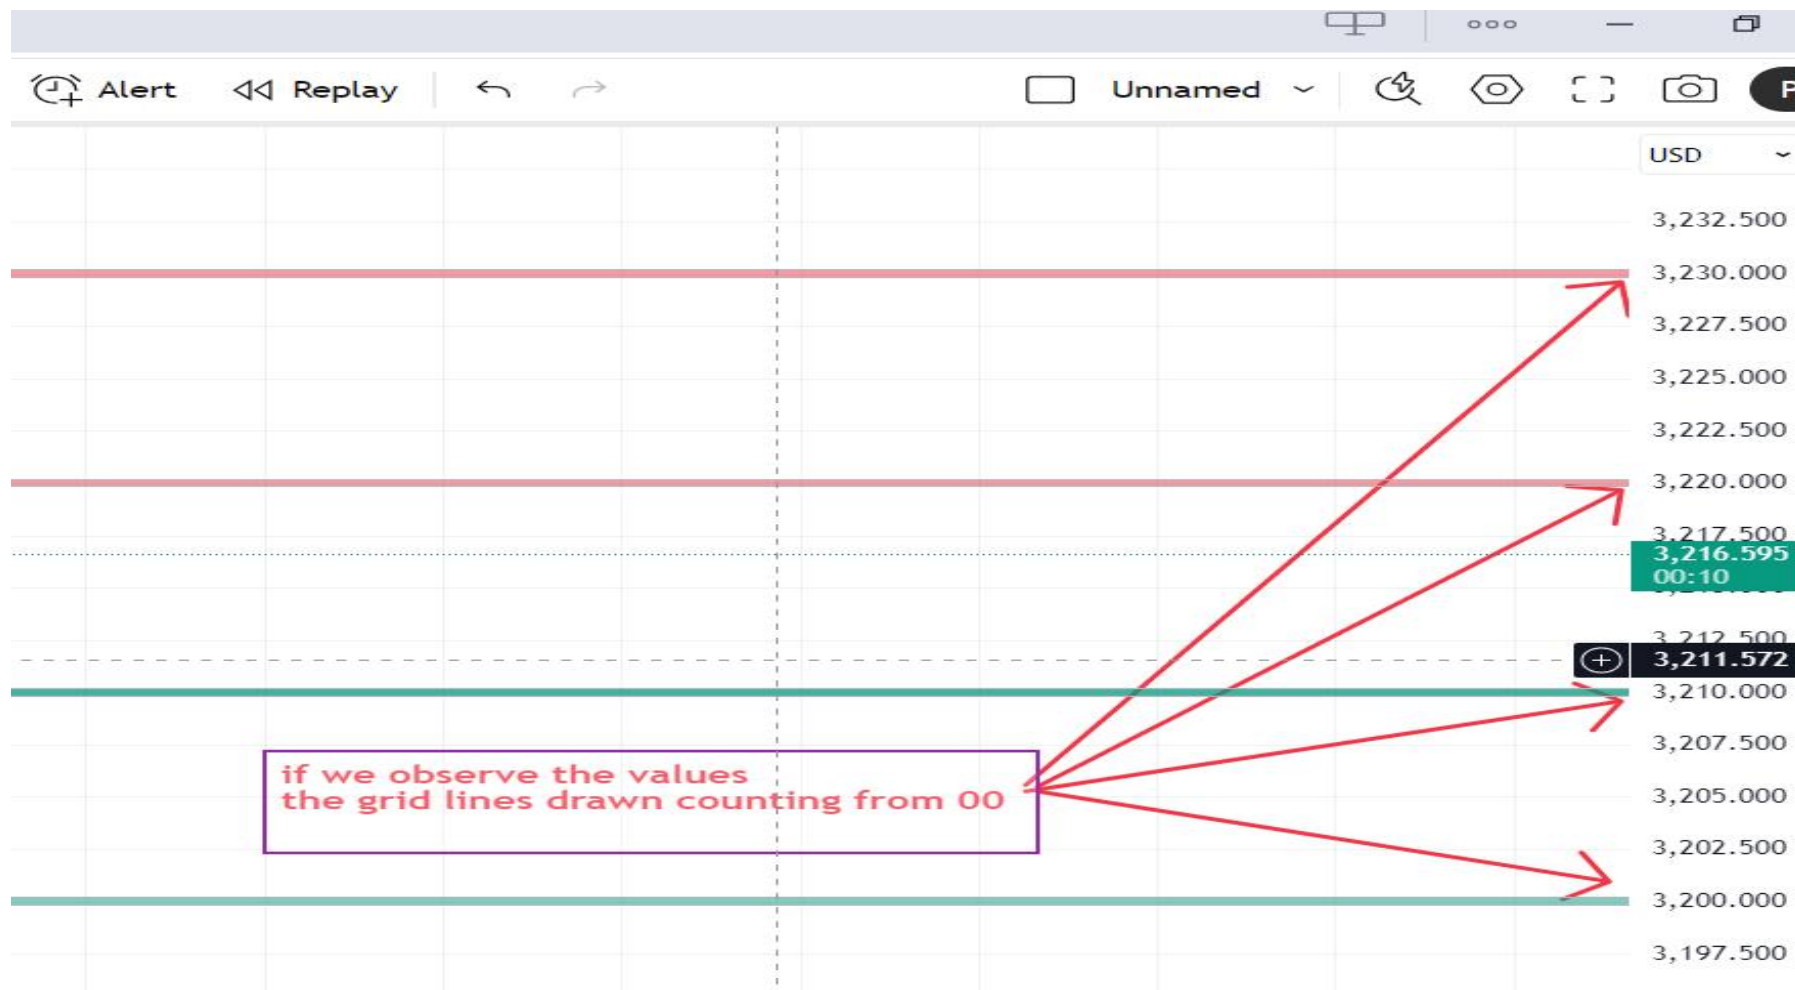

4)Zone Switch:0(Default=0,when i select any pip grid move to that particular pip)

For Example:if I select 0= it starts somewhere 3000,next grid is 3010,3020,3030,3040,3050.....

If I select 10= it starts 3001,3011,3021,3031,3041,3051.....

If I select 50= it starts 3005,3015,3025,3035,3045,3055.....

When I select grid switch=0

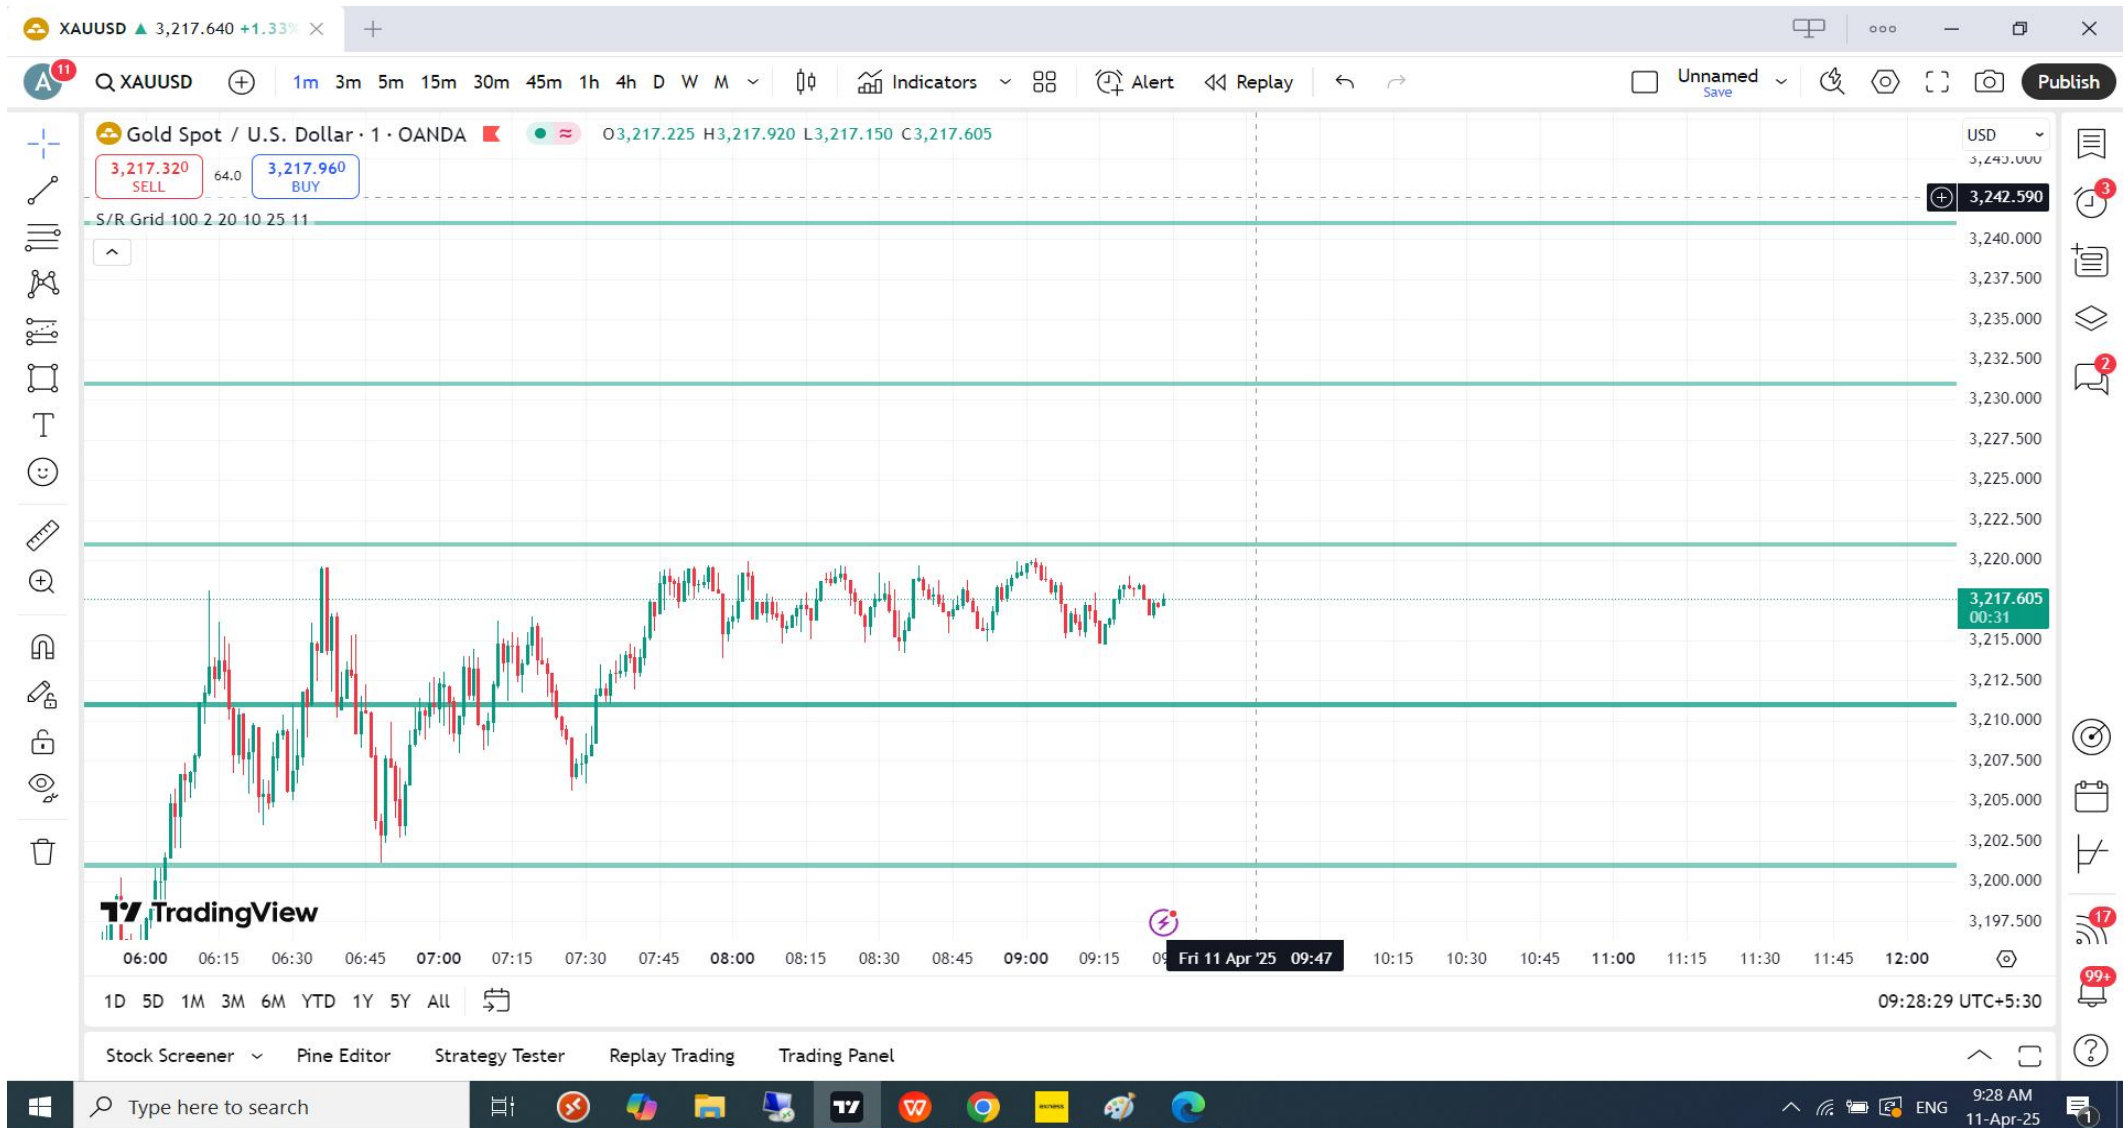

When I select Grid Switch=10 pips

5)Zone Color:

Example:

When I select this option it effect all grid lines for upward lines and downward lines same color.

6)Zone Border Color:

Example:

When I selected black border in input options,as you see the border applied to the zone in the below picture

There are total 6 inputs need to be added in the indicator

- 1) Zone level distance(In Pips):100(default)
- 2) Number of Zones:20 (Default)
- 3) Zone Width: 1(Default)
- 4) Zone Switch:0 (Default)
- 5) Zone Color:White (Default)
- 6) Zone Border Color:Yellow (Default)

Note:

Maximum Zone level distance (1-99999)

Maximum Number of Zones (1-1000)

Maximum selected zone width (1-5) only.

Maximum selected zone switch (0-999999) for crypto also work
