

# Final Master Specification - MT5 EMA 9 & EMA 20 M1 EA

**Trading Window (Dubai Time):** 11:30 AM to 7:00 PM. Best focus: 4:00 PM to 7:00 PM (London-New York overlap).

**Indicators:** M1, EMA9 Exponential Close, EMA20 Exponential Close.

**Entry:** Only after candle CLOSE. Buy if candle closes above both EMAs and  $EMA9 > EMA20$ ; Sell if candle closes below both EMAs and  $EMA9 < EMA20$ . Enter 2 trades on next candle open. Skip oversized breakout candles (recommended configurable 15-20 pips).

**SL:** Buy below breakout candle low (+buffer). Sell above breakout candle high (+buffer).

**Management:** Trade1 TP=50 pips. Trade2: at +50 pips move SL to breakeven, no TP, close only after fully closed opposite EMA confirmation candle. Never exit on intrabar EMA movement.

**Safety:** No duplicate entries. One signal opens exactly two trades. Do not open another trade in same direction until current cycle finishes.

**Inputs:** Lot size, TP, breakeven trigger, SL buffer, max spread, slippage, magic number, trading hours.

**Deliverables:** .mq5 source, .ex5 compiled file, commented code, bug-fix support.
