

Good day Zakri, I hope you're doing well. I would like you to update the following Expert Advisors: Igniters FX, Scalpro FX, and Trendseeker and smart money EA.

Please allow all the 4 EA to show the zone even if the market is closed because of the analysis over the weekend .

Part 1 - Drawdown Limit Option

For these three EAs, please add an additional option to set the **drawdown limit in percentage %** .

For example:

- If the account balance is **\$10,000** and the user sets a drawdown limit of **10%**, the EA should stop taking trades once the drawdown reaches **\$1,000**.
- Trading should only resume once the drawdown falls back below the defined percentage threshold.

taking trades and will resume taking trade when the drawdown is below

Part 2 - Trading Below Previous Highs Please add an option that allows the EA to trade below specific previous highs.

- **Previous Day High** → Can be activated or deactivated by the user.
- **Previous Week High** → Can be activated or deactivated by the user.
- **Previous Month High** → Can be activated or deactivated by the user.

When enabled, the EA will reference the selected high (day, week, or month). For example, if the **Previous Day High** option is activated, the EA will only take trades below the previous day's highest price.

Part 3 - Trading above Previous Low Please add an option that allows the EA to trade above specific previous lows.

- **Previous Day Low** → Can be activated or deactivated by the user.
- **Previous Week Low** → Can be activated or deactivated by the user.
- **Previous Month Low** → Can be activated or deactivated by the user.

When enabled, the EA will reference the selected high (day, week, or month). For example, if the **Previous Day Low** option is activated, the EA will only take trades **above the previous day's lowest price**.

Part 4 Update for Smart Money EA :

EA Mode: Smart Money Mode

Add Buy Zone or Sell Zone timeframe

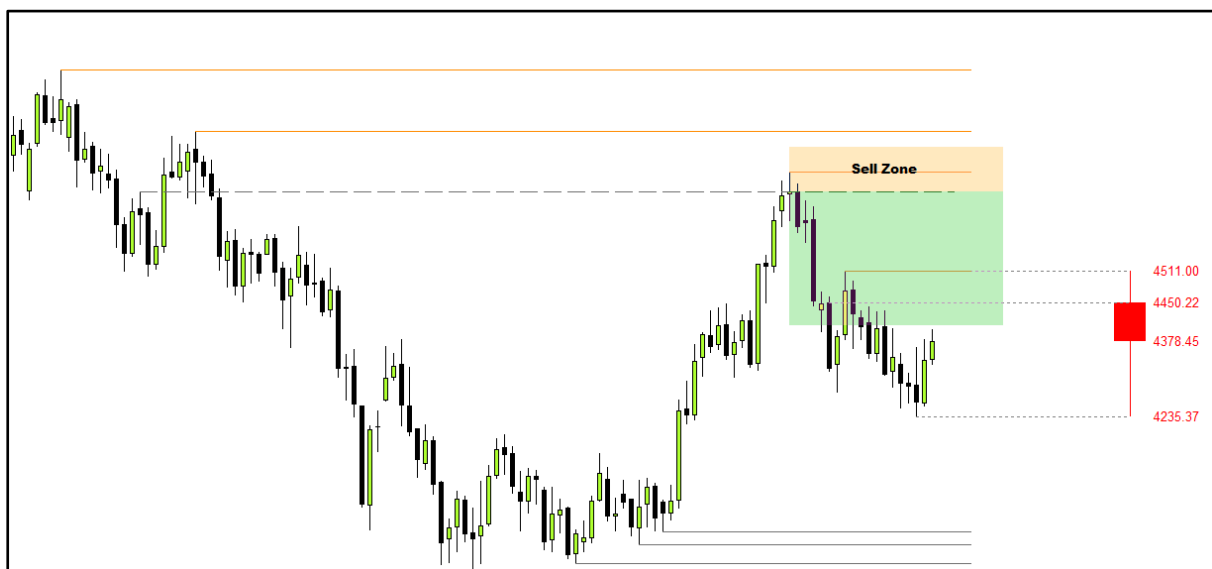

Market Order

When market order is activated, automatically trading functionality will be based on IgnitersFX option.

On IgnitersFX , add the selected timeframe the USER will choose to take EA.

On IgnitersFX if Automatic Mode is activated, it means that the EA will only trade within the Sell Zone or Buy Zone

And here below is the Sell zone picture, which mean that, the EA will only take sales within the sell zone limit.

So, in the Sell zone, the EA will trade based on Igniters function, which is a sell, So the EA will only take trade within the sell zone

2: Add continuous Mode option.

When continuous Mode option is activated: If the EA has detected a sell Zone or Buy zone. The EA will take a trade based one the sell Zone or buy zone /

Example:

Example:

- If a **Sell Zone** is detected and Continuous Mode is enabled, the EA will keep taking sell trades even as price moves below the Sell Zone.
- If a **Buy Zone** is detected and Continuous Mode is enabled, the EA will keep taking buy trades even as price moves above the Buy Zone.

- 3 If the EA detected From a Buy Zone the EA detect a new Buy Zone, the EA will keep taking trade without any interruption.
- 4 If EA has detected Buy Zone, and now has detected a Sell Zone, the EA will stop all buy trade , and now start taking sell trades .

• 5 Add Buy Zone or Sell Zone timeframe

The Buy Zone and Sell Zone Timeframe = Untested High/Low

Please add it below Market Order

Variable	Value
ab ===== Common Settings =====	=====
EA Mode	Smart Money Mode
Market/Pending Mode	Market Order

Buy Zone or Sell Zone timeframe, the user chooses Daily Timeframe, on the

-untested High /Low will have the Same Timeframe.

-FVG will have the same timeframe

-Trading timeframe zone will be the same

- 6 When take profit zone is reached, the EA will close all the trade, and it will pause and flash, like if the daily, or overall profit was reached.

The user can press the resume button or not.

- 7 For tested high and tested Low , please add an option where the user can the number of tested high and tested Low

• 8 Add - Drawdown Limit Option

For these three EAs, please add an additional option to set the **drawdown limit in percentage %** .

For example:

- If the account balance is **\$10,000** and the user sets a drawdown limit of **10%**, the EA should stop taking trades once the drawdown reaches **\$1,000**.
- Trading should only resume once the drawdown falls back below the defined percentage threshold.

taking trades and will resume taking trade when the drawdown is below

9 ADD - Trading Below Previous Highs

Please add an option that allows the EA to trade **below specific previous highs**.

- **Previous Day High** → Can be activated or deactivated by the user.
- **Previous Week High** → Can be activated or deactivated by the user.
- **Previous Month High** → Can be activated or deactivated by the user.

When enabled, the EA will reference the selected high (day, week, or month). For example, if the **Previous Day High** option is activated, the EA will only take trades **below the previous day's highest price**.

10 Add - Trading above Previous Low Please add an option that allows the EA to trade **above specific previous lows**.

- **Previous Day Low** → Can be activated or deactivated by the user.
- **Previous Week Low** → Can be activated or deactivated by the user.
- **Previous Month Low** → Can be activated or deactivated by the user.

When enabled, the EA will reference the selected high (day, week, or month). For example, if the **Previous Day Low** option is activated, the EA will only take trades **above the previous day's lowest price**.
