

Above is my 1 min Chart

Although I wanted 4 MA, But Lets make it 5 MAs,

I want a dashboard like the one on this screen, but the currency pair are the one that the Moving averages (MA) are all align, that is

MA200 > MA 125 > MA 75 > MA 50 > MA 21, Or MA200 < MA 125 < MA 75 < MA 50 < MA 21, And the space between the MA lines must be greater than a set Value , say 5 pips, then that currency pair should appear on that Dashboard,

If it is a down trend then, let the font be Red and Green, If uptrend

It Should be MTF and let it be that If I decide to consider only 3 MA, I can do that , May Something like if I set an MA to zero, IT should be ignored

Position of the dashboard on the chart will be customize

I want to be able to input the currency pairs to be monitored also

LWMA beside the currency pair is base on the logic I will share

I am attaching the Indicator of the LWMA where you can get the logic
