

Project Name : Check indicator logic and amend as necessary

Project description:

This is an old indicator that I had. Recently using it again in MT4.

Purpose of the indicator is to identify candles that lies outside Bollinger Bands

Now in Dec 2018, it cannot detect and alerts candles that met the criteria

To check the programming what is missing and amend accordingly

Screenshots where indicator missed out alerts (in red circle)

Forex pair and time frame is indicated at bottom of chart

Date of event is at bottom of char

My Broker time is GMT-4 (New York time)

EURUSD H1

GBPJPY H1

USDJPY H1
