

Trade Panel

The trade panel below is good and we want it to include the following in addition:

1. Order duplication input box to be inserted on the trade panel. [More information below:](#)
2. The **yellow close button** must be changed to **close all** running trades.

Instant order execution and duplication

Eg. Instant order execution and duplication input box must allow to do the following:

- When one order is executed it should duplicate the same order/execution according to my specified entry point, lost size, take points & stop loss. Similar to the picture on the right.
- Allow a maximum of 100 times order duplication similar to the picture on the right.
- The trade panel must show the number of order duplication to be executed. For example:

Lot Size: from 1 to 100

Order Duplication: from 1 to 100

[illegible]
