Forex VDS Strategy is a Bundle of plug-ins that requires MetaTrader 4 to function.

If you already have MetaTrader 4 installed, place the following files:

Indicators goes:
into **C:/Program Files/xxxxx/experts/indicators**, where **xxxxx** is the name of your MT4.

For example, the MT4 from FxPro is called **FxPro - MetaTrader**, and the complete

Template goes:
into **C:/Program Files/xxxxx/templates**, where **xxxxx** is the name of your MT4.

After finished restart you MT4 platform for changes to apply.

Entry:

Go short:

1. VSD_HA turns into red color.
2. VSD_signal arrow applies with red color on MA cross each other.
3. VSD buy/sell zone applied with MACD turns red.
4. VSD Vostro spikes up, this is the main trade trigger to take trade, always wait for this indicator signal for perfect entry.

Go Long:

1. VSD_HA turns into green color.
2. VSD_signal arrow applies with green color on MA cross each other.
3. VSD buy/sell zone applied with MACD turns blue.
4. VSD Vostro spikes down, this is the main trade trigger to take trade, always wait for this indicator signal for perfect entry.

Trading on 15min chart we look up to 120 pips to book. You should put stop loss on previous candle high or low, it comes to 10-25 pip.

We simply exit trade when VSD buy/sell zone indicator changes color against our trade.

Below some chart examples.
