90% Accuracy

MORE INFORMATION

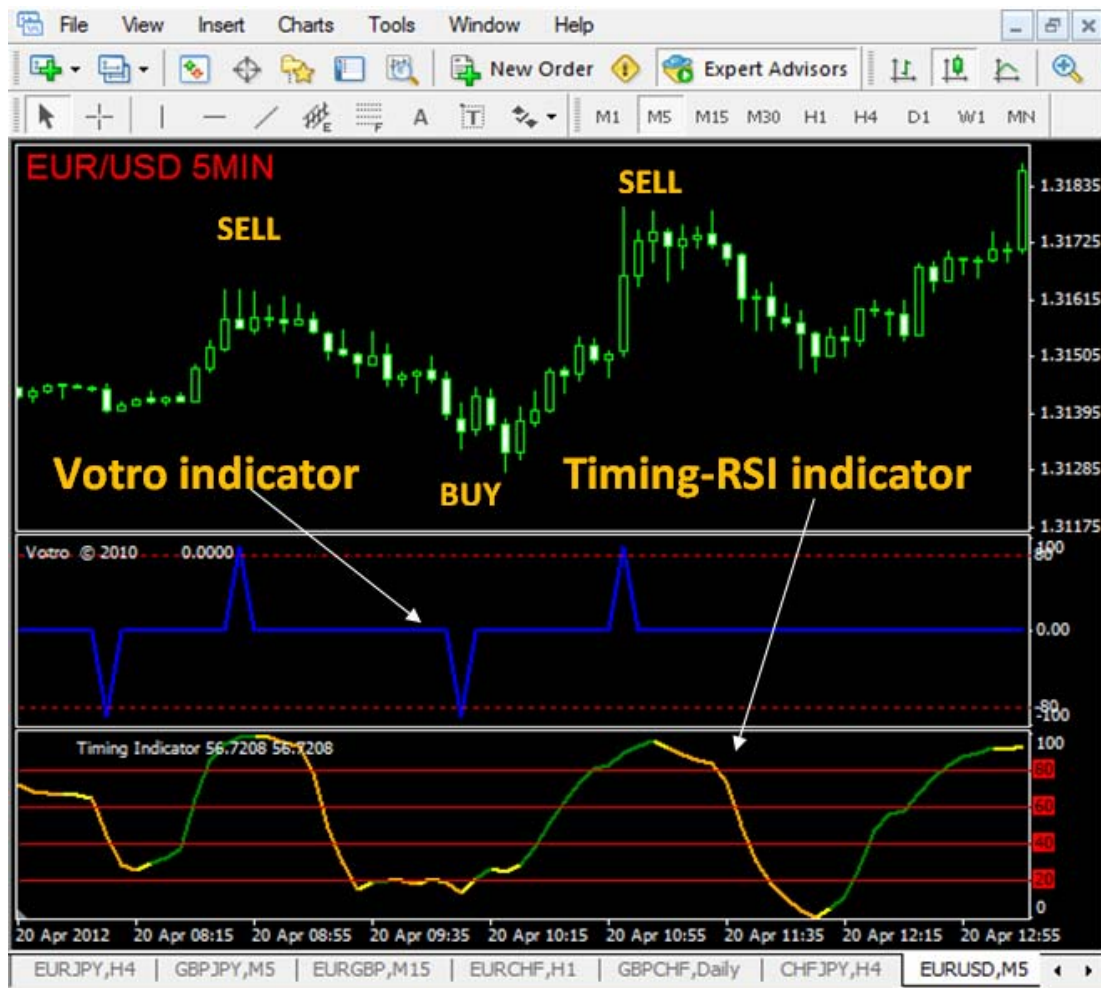

For MetaTrader users:

- VFX SYSTEM **does not repaint**
- VFX SYSTEM **does not backplot**
- VFX SYSTEM works in **ALL Time Frames and in All Markets(forex, stocks...)**
- VFX SYSTEM is excellent in all trading strategies : scalping/day trading/swing

This System use a combination of two indicators:

- Timing-RSI indicator
- Votro indicator

HOW TO USE VFX SYSTEM?

VFX SYSTEM is very simple to use. To take position:

- Votro indicator gives buy signal (Signal at the bottom) and sell signal (Signal at the top)
- Timing-RSI gives a confirmation of signal given by Votro indicator: BUY in return of line 20 and SELL in return to line 80

Take position = Signal of Votro+ Confirmation Signal of Timing-RSI

-

How to BUY using VFX SYSTEM?

- Choose a frame time for your trade
- When Votro indicator gives a buy signal you wait for a confirmation signal of Timing-RSI indicator

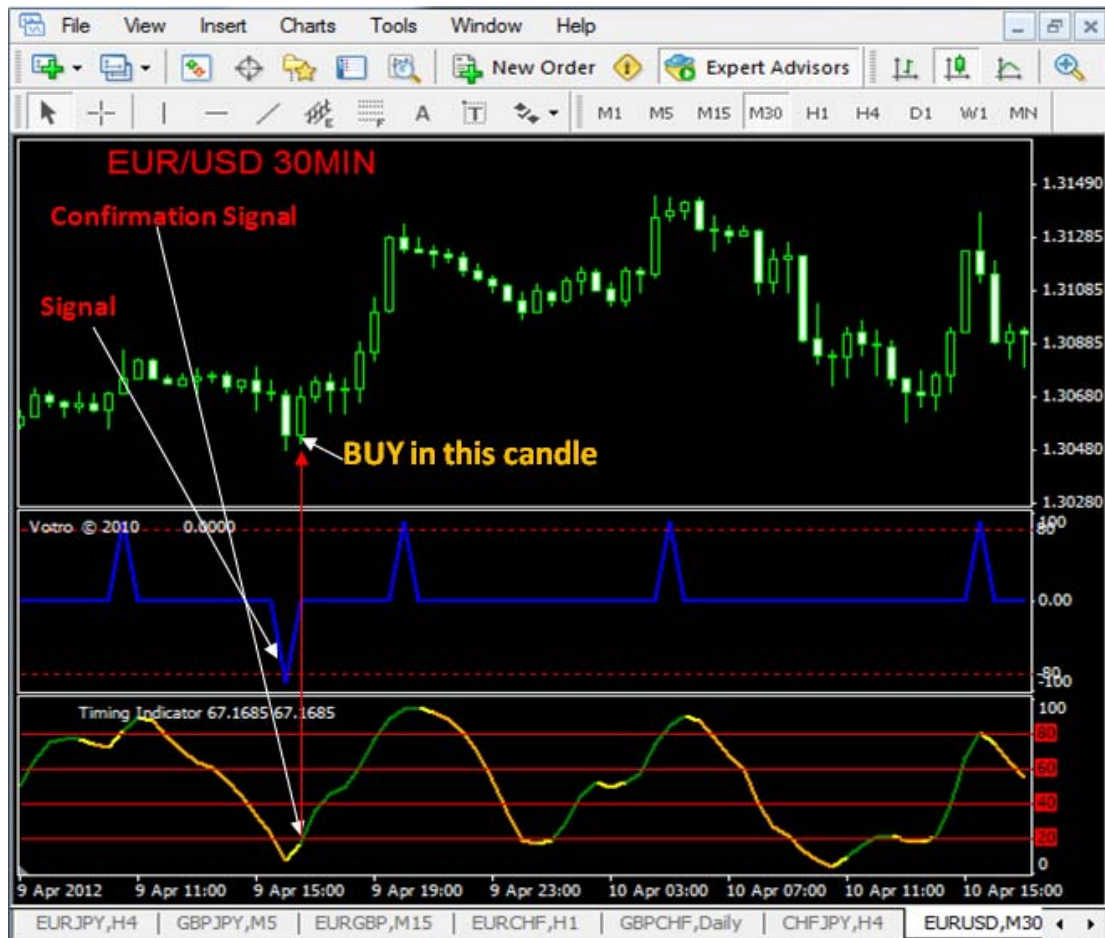

- You BUY When Timing-RSI returns to line 20

How to SELL using VFX SYSTEM?

- Choose a frame time for your trade
- When Votro indicator gives a sell signal you wait for a confirmation signal of Timing-RSI indicator
- You SELL When Timing-RSI returns to line 80

All in chart below

How to define profit Targets using VFX SYSTEM?

When you buy:

1. first profit target: when Timing-rsi reaches line 40
2. second profit target: when Timing-rsi reaches line 60
3. 3rd profit target: when Timing-rsi reaches line 80
4. last target: after line 80 in the apperance of votro signal

When you sell:

1. first profit target: when Timing-rsi reaches line 60
2. second profit target: when Timing-rsi reaches line 40
3. 3rd profit target: when Timing-rsi reaches line 20
4. last target: after line 20 in the apperance of votro signal

How define Stop loss using VFX SYSTEM?

- When you sell you place your stop loss on the candle corresponding to higher value of Timing-RSI
- When you buy you place your stop loss on the candle corresponding to lower value of Timing-RSI
- You must respect obligatory money management strategy (less than 2% risk)

EXAMPLES OF TRADE SETUPS

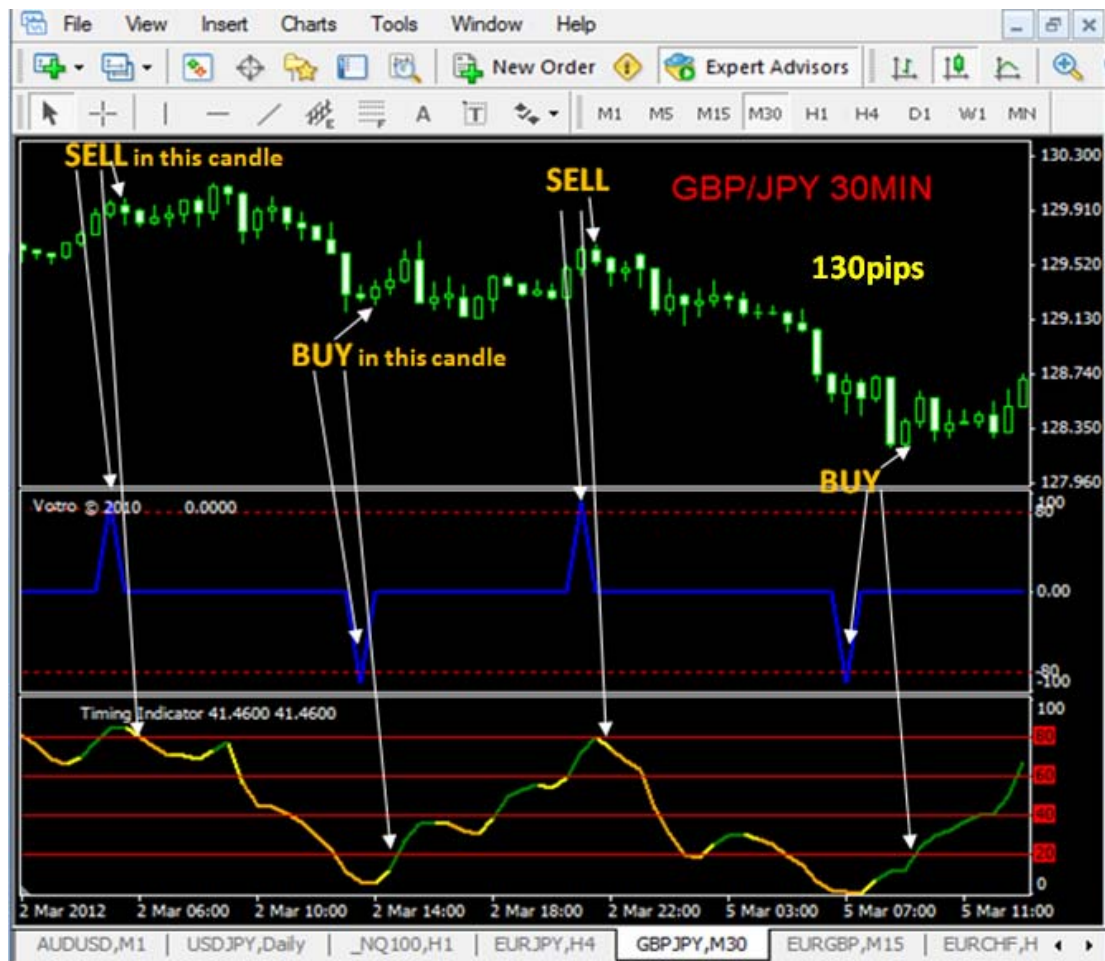

When you want to take a position you **MUST** respect the following steps

- **First: Signal from Votro indicator**
- **Second: Confirmation signal from Timing-RSI indicator**

After Votro signal you **MUST** wait for confirmation signal from Timing-RSI to take position

If you have no confirmation signal don't take position (example chart below)
