Trade Manager

www.goolforexsystem.com

As far as the Trade Manager, here are the settings I like using (Setting Based on 5 Digit

StopLoss.Pips: 25

TakeProfit.Pips: TP1=25pips, TP2=50 , TP3 =75 and TP4= 100 pips

Example if you want to open a position of 0.4 lots you can open for position of 0.1 lots

The first position with StopLoss.Pips=25pips and TakeProfit.Pips =25pips

The 2th position with StopLoss.Pips=25pips and TakeProfit.Pips =50pips

The 3th position with StopLoss.Pips=25pips and TakeProfit.Pips =75pips

The 4th position with StopLoss.Pips=25pips and TakeProfit.Pips =100pips

Trading

This system I designed does not have a pdf manual. You have to understand a couple of basic forex knowledge for setups with resistance/support followed by news in conjunction of my template and change your mindset to play defense in order to beat the insiders, market makers, big capital institutions with their daily agendas. I have attached a chart to show what I see trading this system.

Two condition to buy or sell

For buy position : sell signa with red arrow + price under EMA 200

For sell position : buy signal with green arrow + price \geq EMA 200
