HA Pause Confirmation

A standalone visual strategy sheet extracted from the HA PRO guide. This page focuses only on the Heikin Ashi Pause Confirmation setup, its chart structure, core inputs, and suggested risk profiles.

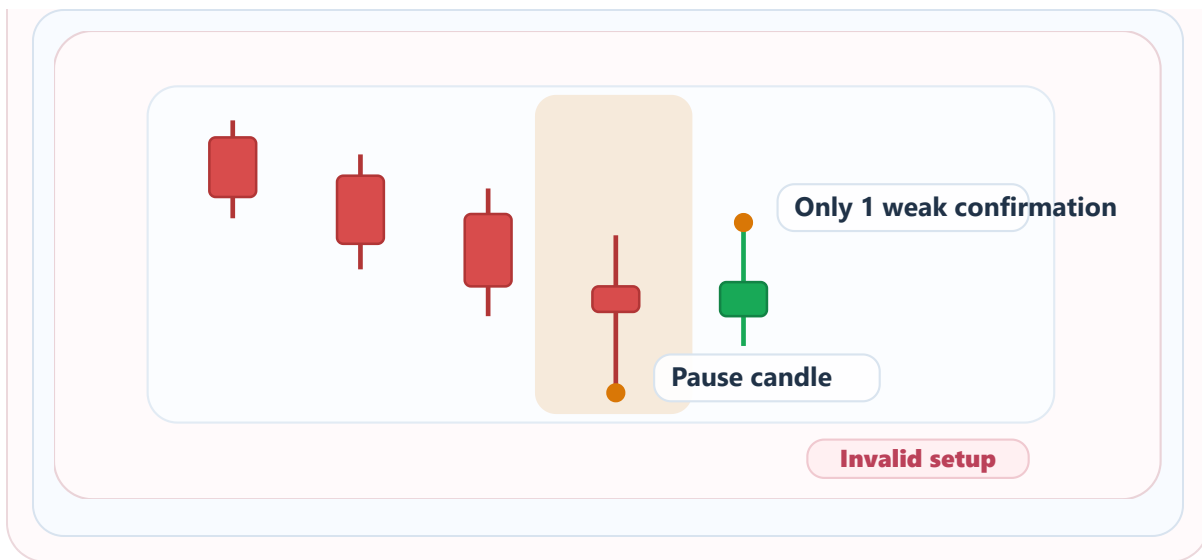

14. Mode Name: HA_PAUSE_CONFIRMATION

HA Pause Confirmation

Valid chart

Invalid chart

Idea

A strong directional run slows into a pause candle. The EA scores that pause and refuses to trade it alone; it waits for later proof such as a color flip, a break of the pause extreme, or another quality confirmation.

EA Inputs For This Strategy

ALWAYS SET

- Heikin Ashi Strategy Mode = HA_PAUSE_CONFIRMATION
- Primary Entry Execution Mode
- Signal Timeframe

STRATEGY-SPECIFIC SETTINGS

- Pause Lookback Trend Candles
- Minimum Trend Candles
- Pause Body Weakness Percent
- Maximum Pause Body Percent
- Minimum Opposite Wick Percent
- Minimum Pause Score
- Minimum Confirmations
- Maximum Bars After Pause
- Confirmation Body / Wick / Close Strength

Suggested Risk Profiles

Medium risk preset

- Lookback = 8
- Minimum Trend Candles = 3
- Pause Score = 70
- Minimum Confirmations = 2
- Maximum Bars After Pause = 3
- Close Strength = 55

High risk preset

- Lookback = 6
- Minimum Trend Candles = 3
- Pause Score = 60
- Minimum Confirmations = 1
- Maximum Bars After Pause = 4
- Close Strength = 45

Key Rules

- Require a real directional run before the pause.
- The pause candle must show weakened body quality and enough opposite pressure.
- The setup only becomes valid if enough confirmations appear inside the allowed bar window.

Numeric Example

Example: after 4 bearish HA candles, the pause candle prints with a 24% body and a strong upper wick, giving a pause score of 76. Within 2 bars, the chart flips bullish and breaks the pause high. With the confirmation count satisfied, the BUY becomes valid.
