
Recommendations

For all Expert Advisor an ECN broker is strongly recommended, you can use:

<https://roboforex.com/?a=syok>

Having low spreads is very important, a high spreads, can totally compromises your trading, it can transform winnings into ->->->-> losses

You can also earn cash back at your favourite brokers, for every open trade:

https://www.cashbackforex.com#cid_1149

Also VPS is strongly recommended, you can use: <https://cheapvps.co/billing/aff.php?aff=383>

Your platform must remain open 24 hours a day

I recommend windows Vps, this is a sort of small computer, totally online, check this little example video for access to your new vps: <https://www.youtube.com/watch?v=xwjg5nGAYfE>

Thank you very much for your attention.

Dark Titan Full strategy explanation

BASIC SETTINGS

- Magic Number: ID number of the orders.
- Max Spread: maximum spread to trade.
- Max Average Spread: maximum average today spread to trade

Money Management Settings

- Money Management: if true enables the money management option.
- Risk Percent: if the money management option is enabled, it indicates the risk amount, based on your account balance.
- Lots: number of lots, if the money management option is disabled.

Trading Directions

- Allow Buy: if true, Ea can trade with buy orders.
- Allow Sell: if true, Ea can trade with sell orders.
- Max Number of orders: max number of open orders at the same time
- Max one trade any bar: if true, open max 1 trade for 1 bar
- Enable fifo mode: if true, it close orders in fifo order
- Allow Buy and Sell at the same time: If true, I can have 1 Trade buy and 1 Trade sell (or more) at the same time. If false, I cannot open a trade buy with 1 Trade Sell at market. and viceversa

Note: grid operations don't have to respect Allow Buy and Allow Sell, So if a sell order is already open, it is possible to open other sell orders

Target Settings

- Take Target: Coefficient Target in Point. (This is a Global Take Profit, for open orders on the current chart) (sell and buy separated)
- Close on open price: if true, close Trade only at end of bar. (I mean only at the end of the bar time, on the "Close" price)

Monetary Loss

- Enable Monetary Stop Loss: if true, close on "monetary loss amount".
- Monetary Stop Loss amount: Loss in Money for close all orders.
- If true, Multiply Monetary stop Loss: if true, Multiply "Monetary Loss amount" X 100 X Start Lot amount

Grid Settings

- Grid Management: Type of Lots management. -> Below you will find a very detailed explanation of this setting.
- Multiplier: Multiplier for, lots sum, martingale, all lots sum. -> Below you will find a very detailed explanation of this setting.
- Distance for next order: Min Distance for Next Order in Point. -> Below you will find a very detailed explanation of this setting.
- Max 1 grid order for bar: if true, robot can open only one trade for bar for grid orders.
- Bar for new grid order: timeframe (related on "One Trade Bar Grid")

Indicators Settings

Dark Inversion

- Dark Inversion timeframe: Timeframe for Dark Inversion Indicator
- Dark Inversion Period: Periods of Dark Inversion Indicator
- Dark Inversion Indicator Deviations: Dark Inversion indicator number of deviations
- Dark Inversion Applied Price: Price for Dark Inversion Indicator
- Dark Inversion Method: Method for Dark Inversion Indicator
- Dark Inversion H1 Filter: Additional Filter with H1 signals

Trading Days

- Monday: if true, Trading on this Day is allowed.
- Tuesday: if true, Trading on this Day is allowed.
- Wednesday: if true, Trading on this Day is allowed.
- Thursday: if true, Trading on this Day is allowed.
- Friday: if true, Trading on this Day is allowed.
- Saturday: if true, Trading on this Day is allowed.
- Sunday: if true, Trading on this Day is allowed.

Note: grid operations don't have to respect trading days

Trading Hour

- Enable Time Filter: if true, enables the time filter (if false, EA can trade during any hour)
- Trading Start Hour: operating start Hour
- Trading Start Minute: operating start minutes
- Trading Stop Hours: operating end Hour
- Trading Stop Minute: operating end minutes

- Freezes All Friday: no position will be changed, the Ea is completely frozen.
- Freezes Hour: Time of the previous parameter.
- Close Friday Night: it makes it much more likely that we will not have orders in the weekend, in fact, it closes all orders in earnings and prevents the opening of other orders. (but if we have orders at a loss, they will be left open, to allow the grid to recover)
- Close Friday Hour: Time of the previous parameter.
- Forced Close Friday Night: Forced closure even if orders are at a loss.
- Forced Close Friday Hour: Time of the previous parameter.

Note: grid operations don't have to respect trading hours

Graphic Settings

- Enable orders counter: if true, enable orders counter in comments
- Custom Chart: if true, use my favorite colors for the current trading chart.
- Show Panel: if true, Show Info Panel
- Show Button: if true, Show close Buy, close sell, and close all buttons
- Custom Comment: personalized comment for each order.

Note: If you use Mql5 VPS, please disable “Show Alert” otherwise EA can’t open trades

BASE

The First Trade is open based on **Dark Inversion** Indicator.

To be able to view the indicator on the chart, get it here:

MT4: <https://www.mql5.com/en/market/product/66785>

MT5: <https://www.mql5.com/en/market/product/66786>

Everything else acts as a filter and trade management.

Order Timeframe:

If Max one trade any bar is enabled, the expert opens maximum One Trade for bar. if we are on M1, will open 1 trade each 1 minute bar. it will therefore look like 1 trade every 1 bars (from the m1 view)

DARK INVERSION

Dark Inversion Strategies: To understand these, I Strongly recommended to apply the Dark Inversion on the chart, during a Backtest or demo trading

Ps. To be able to view the indicator on the chart, get it here:

MT4: <https://www.mql5.com/en/market/product/66785>

MT5: <https://www.mql5.com/en/market/product/66786>

Then the strategy is based on: Buy Green Arrow Sell Red Arrow

Here you can see, the first order, which was opened as a Sell, as the arrow is Bear (Red)

This is also because the Dark Inversion line is Red. So We go to Sell.

Instead, when the indicator line is green, a bull (green) arrow will appear, then the EA will go Buy.

If you want to suggest other strategies to add with this indicator, please contact me

FILTERS

All these indicators and settings are filters.

Clarification: all filters, will affect the first order open, grid orders will be opened anyway, on the step and modality defined below.

Standard time filter

Standard Trading Days filter

Standard Direction Filter

GRID

Grid Management: Type of Lots management.

4 forms of lots management are available

- Fix: all trades = fix lot
- Lots sum: we sum base lot * Coefficient grid management.

Example, if I have 1 order buy and grid management is 1, next buy order will be 0.02, 0.03, 0.04 ...

If I have 5 buy orders, first sell order will be 0.01.

All Lots Sum

we count all the orders.

Example, if I have 1 order buy and grid management is 1, next buy order will be 0.02, 0.03, 0.04 ...

If I have 5 buy orders, first sell order will be 0.06. all lots sum, buy + sell orders so

Martingale

Classic lot multiplier. So if Multiplier = 2. First order 0.01, second order 0.02, 0.04, 0.08, 0.16.....

You can also use decimal value for all Multiplier like 1.5, 1.1 etc.....

Distance for next order: Distance for Next Order in point, if "One Trade Bar Grid" is false and "Min Distance On Atr" is false. -> otherwise this is the Minimum Distance, for open a grid trade

If "Max 1 grid order for bar" is on true, we open only on Open of new Bar and Min Distance from previous order. Bar for new grid order, is the timeframe about this parameter.

Target Settings

Average Point Weighted: based on Lots value.

Example, we open 1 trade sell for 0.01 at 1.00010.

1 trade sell for 0.03 at 1.00050

So $(1.00050 \times 0.03) + (1.00010 \times 0.01)$ all / $(0.03 + 0.01)$

So $150 + 10 = 160$, / 4 = 40. So 1.00040, when price hit this point we close all trades.

for now these are the settings, for more information ask in telegram group! Very thanks!
