

Scalp Nightingale User Manual

TLDR: The legendary Scalp Nightingale utilises an in-house developed signal guided by trend anchorage to perform night scalping on multiple currencies. There are a few different trading modes available depending on the user's risk appetite. Try it, love it, own it...!

Lot Size Parameters	
<input checked="" type="checkbox"/> Lot size calculation	Auto lot size
<input checked="" type="checkbox"/> Fixed lot size	0.01
<input checked="" type="checkbox"/> Lot size in deposit percentage	5

Lot Size Parameters:

- Lot size calculation: There are three calculation modes available
 - Fixed lot size
 - Lot percent: Lot size based on the account balance percentage.
 - Auto lot size: Lot size will be automatically calculated to fully optimise the account balance.
- Fixed lot size
- Lot size in deposit percentage: Percentage of the allocated fund to be used to calculate the lot size.

Trade Parameters	
<input checked="" type="checkbox"/> Magic number	168168
<input checked="" type="checkbox"/> Comments	Scalp Nightingale
<input checked="" type="checkbox"/> Trading mode	KJ Salvation

Trade Parameters:

- Magic number: Magic number used to open a trade. The magic number will be the same for each currency pair, however it will be handled independently. Please note that the magic number has to be unique for every single expert advisor on the same account.
- Comments: The comment that will print out in the log file.
- Trading mode: There are five trading modes available
 - KJ Salvation: Low risk with small equity drawdown
 - KJ Defender: Moderate risk with balanced profit and equity drawdown
 - KJ Salvation: High risk with higher profit and equity drawdown
 - User defined: User defined parameters

Customised Trade Parameters (User Defined Mode)
