## Recommendations

---

Having low spreads is very important, a high spreads, can totally compromises your trading, it can transform winnings into ->->->-> losses

For all Expert Advisor an ECN broker is strongly recommended, you can use:

<https://roboforex.com/?a=syok>

## Dark Dione Full strategy explanation

### BASIC SETTINGS

- Magic Number: ID number of the orders.
- Max Spread: maximum spread to trade.
- Take, stop Target and Trailing on atr: if true, take profit, stop loss and trailing stop, will be calculated based on atr value with the following formula:  $Atr \text{ Multiplier} * Atr * Take \text{ Target}$  (in this case with take target)
- Target Atr Multiplier: is simply a value for the formula

### Target Settings

- Take Target: Coefficient Target in Point. (This is a Global Take Profit, for open orders on the current chart) (sell and buy separated)
- Stop Target: Coefficient Stop in point. (this is a Global Stop Loss in point, for open orders on the current chart) (fir Buy or sell) Note: By default is disabled, for enabled it, check next parameter
- Stop Target Mode: by default disabled, then you can change in "First Order" or "default"  
"First order" mean, The global Stop Loss will be placed X points from the first order. When it is reached, all open orders will be closed at a loss (sell and buy separated)  
"Default" mean, the global Stop Loss will be placed X point from the 'Weighted average of the entry point' for the current open orders. When it reached, all open orders will be closed at a loss. (sell and buy separated)
- Close Trades Only at End of Bar: if true, close Trade only at end of bar. (I mean only at the end of the bar time, on the "Close" price)

### Average Trailing Stop

- Enable Average Trailing Stop: if true, enable average trailing stop
- Only In Profit: if true, the average trailing stop start only if trades are in Profit
- Broker Commission: Put your broker commission amount for 1 lot trade
- Average Trailing Stop Value: Trailing Stop Value in point
- Average Trailing Step Value: Trailing Step Value in point

Note: The Average Trailing Stop, acts on all open orders in one direction (buy and sell) by calculating the weighted average entry point

Note 2: you can see the Yellow line for it

### Indicators Settings

#### Dark Breakout

- Dark Breakout Range Start Hour: Start Hour for calculate the Breakout range
- Dark Breakout Range Start Minute
- Dark Breakout Range End Hour
- Dark Breakout Range End Minute
- Dark Breakout Strategies: The strategies describe themselves, very intuitive, otherwise refer fully explain below
- Moment of the signal: “bar close price” The previous bar will be considered for each signal
- “Current Price” the current Bar Price (or bid) will be considered for each signal
- Dark Breakout Timeframe: Timeframe of Dark Breakout Indicator

### Money Management Settings

- Lots: number of lots, if the money management option is disabled.
- Money Management: if true enables the money management option.
- Risk Percent: if the money management option is enabled, it indicates the risk amount, based on your account balance.
- Max Lot Amount: the EA cannot open a lot larger than this (put 0 for disable)

### Closure on Indicator

- Enable Closing on Dark Breakout: Enable to close Trades on Dark Breakout Rules
- Closure Type: Select the rules, for close orders on Dark Breakout  
‘Close on Opposite signal’: Buy orders will be closed when we have a Sell signal, and viceversa
- Respect Spread Allowed While Closing On Indicator: if true, Close on indicator can close orders only if spread is under the “Max Spread” value
- COI Only in Profit (COI = Close on indicator): if true, close on indicator can close orders only if Profit is more then 0.
- Forced Close Friday Night: Forced closure even if orders are at a loss.
- Forced Close Friday Hour: Time of the previous parameter.

### Trading Directions

- Allow Buy: if true, Ea can trade with buy orders.
- Allow Sell: if true, Ea can trade with sell orders.
- Allow Buy and Sell at the same time: If true, I can have 1 Trade buy and 1 Trade sell (or more) at the same time. If false, I cannot open a trade buy with 1 Trade Sell at market. and viceversa
- Allow Order From others charts at same time: If true, I can have 1 Trade from this chart and 1 Trade from another chart (or more) at the same time. If false, I cannot open a trade from the current chart with 1 Trade from another chart at market.

Note: grid operations don't have to respect Allow Buy and Allow Sell, So if a sell order is already open, it is possible to open other sell orders

### Trading Days

- Monday: if true, Trading on this Day is allowed.
- Tuesday: if true, Trading on this Day is allowed.

- Wednesday: if true, Trading on this Day is allowed.
- Thursday: if true, Trading on this Day is allowed.
- Friday: if true, Trading on this Day is allowed.
- Saturday: if true, Trading on this Day is allowed.
- Sunday: if true, Trading on this Day is allowed.

Note: By default, grid operations don't have to respect trading days, to change this, go to grid settings

### Grid Settings

- Enable Grid: if true, enable grid orders, if false, disable grid orders, in this case, I recommended you, to go to set a stop loss.
- Grid Management: Type of Lots management. -> Below you will find a very detailed explanation of this setting.
- Coefficient Grid Management: Multiplier for, lots sum, martingale, all lots sum. -> Below you will find a very detailed explanation of this setting.
- Min Distance: Min Distance for Next Order in Point. -> Below you will find a very detailed explanation of this setting.
- One Trade Bar Grid: if true, robot can open only one trade for bar for grid orders.
- Enable Monetary Loss: if true, close on "monetary loss amount".
- Multiply Monetary Loss: if true, Multiply "Monetary Loss amount" X 100 X Start Lot amount
- Stop EA after Monetary loss: Remove the EA from chart When Maximum Monetary Loss is Hit.
- Maximum Monetary Loss: Loss in Money for close all orders.

### Graphic Settings

- Custom Comment: personalized comment for each order.
- Show Panel: if true, Show Info Panel
- Show Button: if true, Show close Buy, close sell, and close all buttons
- Custom Chart: if true, use my favorite colors for the current trading chart.
- Show Alert: if true, show spread and others useful alert
- Spread Value for alert: if spread is over this value, EA show an alert
- Latency Value for Alert: if latency in MS is more then this, EA show an alert

Note: these alerts are only on during the first start of the EA

Note: If you use Mql5 VPS, please disable "Show Alert" otherwise EA can't open trades

### Optimization Settings

- Minimum Trades: If the number of Trades is less than this, OnTester value will be 0

Note: for this EA, by default, OnTester Value is net Profit/Monetary Drawdown

## **BASE**

The First Trade is open based on **Dark Breakout** Indicator.

To be able to view the indicator on the chart, get it here:

MT4: <https://www.mql5.com/en/market/product/66550>

MT5: <https://www.mql5.com/en/market/product/66551>

Everything else acts as a filter and trade management.

### DARK BREAKOUT

Dark Breakout Strategies: To understand these, I Strongly recommended to apply the Dark Breakout on the chart, during a Backtest or demo trading

Ps. To be able to view the indicator on the chart, get it here:

MT4: <https://www.mql5.com/en/market/product/66550>

MT5: <https://www.mql5.com/en/market/product/66551>

Then: Buy Green Arrow Sell Red Arrow

Here you can see, the first order, which was opened as a Sell, as the arrow is Bear (Red)

The arrow appeared on the chart, since the price broke the breakout level. (Support red line)

On the other hand, when the price rises, the green line is crossed, and a green arrow will form, for the Buy signal

Strategy 2: Buy Red Arrow Sell Green Arrow: This strategy does the opposite of the previous one

If you want to suggest other strategies to add with this indicator, please contact me

## **FILTERS**

All these indicators and settings are filters.

Clarification: all filters, will affect the first order open, grid orders will be opened anyway, on the step and modality defined below. You can also activate these filters in the grid settings, Separately.

Standard Trading Days filter

Standard Direction Filter

## **GRID**

Grid Management: Type of Lots management.

4 forms of lots management are available

- Fix: all trades = fix lot
- Lots sum: we sum base lot \* Coefficient grid management.

Example, if I have 1 order buy and grid management is 1, next buy order will be 0.02, 0.03, 0.04  
...

If I have 5 buy orders, first sell order will be 0.01.

All Lots Sum

we count all the orders.

Example, if I have 1 order buy and grid management is 1, next buy order will be 0.02, 0.03, 0.04  
...

If I have 5 buy orders, first sell order will be 0.06. all lots sum, buy + sell orders so

Martingale

Classic lot multiplier. So if Coefficient Grid Management = 2. First order 0.01, second order 0.02, 0.04, 0.08, 0.16.....

You can also use decimal value for all Grid management coefficient like 1.5, 1.1 etc.....

Min Distance: Distance for Next Order in point, if “One Trade Bar Grid” is false and “Min Distance On Atr” is false. -> otherwise this is the Minimum Distance, for open a grid trade

If “One Trade Bar Grid” is on true, we open only on Open of new Bar and Min Distance from previous order. Grid Order Timeframe is about this parameter.

### Closure on Indicator

This section enable you to close the Trades on the Main Indicator of the EA, in this case, Dark Breakout

“Close on Opposite Signal” mean, the trade or trades will be close on the opposite signal (of the current strategy, so if there is Sell Signal, all Buy trades will be closed

If you want to suggest others strategies to close, contact me

### Close Trade Settings

- Take, stop Target and trailing On Atr: when this setting is active, the target value they will be multiplied by Atr and by the Multiplier.

Example:

Target Atr Period: 14

Target Multiplier: 500

Take Target: 100

If we are in M5, Ea create a Atr Indicator, with 14 periods, in M5. If for example value is 0.00100, it multiply the value \* 500 \* 100 so = 50 point this is our New Take Target value for this trade

for now these are the settings, for more information ask in telegram group! Very thanks!

### Recommendations

---

For all Expert Advisor an ECN broker is strongly recommended, you can use:

<https://roboforex.com/?a=syok>

Having low spreads is very important, a high spreads, can totally compromises your trading, it can transform winnings into ->->->-> losses

You can also earn cash back at your favourite brokers, for every open trade:

[https://www.cashbackforex.com#cid\\_1149](https://www.cashbackforex.com#cid_1149)

Also VPS is strongly recommended, you can use: <https://cheapvps.co/billing/aff.php?aff=383>

Your platform must remain open 24 hours a day

I recommend windows Vps, this is a sort of small computer, totally online, check this little example video for access to your new vps: <https://www.youtube.com/watch?v=xwjg5nGAYfE>

Thank you very much for your attention.
