

Indicator Input Parameters:

- Fixed pips range - fixed number of points, distance between two opposite points (ZZ extremum points) if you do not use dynamic calculation
- UseDynamicRange=TRUE - enable/disable dynamic calculation
- Dynamic volatility period - period of currency course for dynamic calculation
- Dynamic volatility coefficient - multiplier of currency course for dynamic calculation
- Optimization mode - the mode of using the indicator in the expert advisor
- Draw ZigZag lines - display/not to display the main lines (connection of opposite extremum points from lower to upper or from upper to lower)
- Draw ZigZag descriptions - display/not to display description of the main lines
- Show description points - show/hide points in description of the main lines
- Show description bars - show/hide number of bars in description of the main lines
- Main description font size
- Main description color

Additional settings:

- Draw ZigZag relations - display/not to display additional lines (connection of extremum points from upper to upper and from lower to lower)
- Show relations description - show/hide description of additional lines
- Show relations percent - show/hide percentage in description of additional lines
- Show relations points - show/hide points in description of additional lines
- Show relations bars - show/hide number of bars in description of additional lines
- Price deviation for % - price deviation for calculating percentage between extremum points
- Rel.lines description font size - additional information font size
- Rel.lines description color - additional information font color
- Draw ZigZag extremum points - display/not to display extremum points (circles by default)
- Arrow code for ZigZag extremum points - arrow code to display extremum points (see the code of the Windings symbol)
- Draw ZigZag revers line - display/not to display reverse lines
- Up revers line color - upward reverse line color
- Dn revers line color - downward reverse line color
- Up&down shift for description text

Alert settings:

- Enable Alert message on ZigZag extremum fixing - display/not to display a message about fixing an extremum point and change of direction
- Enable Notification on ZigZag extremum fixing - send/not to send a notification about fixing an extremum point and change of direction
- Enable Sound on ZigZag extremum fixing - play/not to play a sound when fixing an extremum point and changing a direction
- AlertsSoundFileNameZZ - alert sound file name

Statistic settings:

- Calculate statistic - enable statistics calculation
- Statistic extremum count - number of vertices to analyze
- Statistic X shift - offset on the X axis
- Statistic Y shift - offset on the Y axis
- Statistic Y between imul - a ratio of the distance between the lines
- Statistic font name - font name

- Statistic font size - font size
- Statistic color - font color
- Statistic base corner - base corner
- Statistic anchor point - anchor point
