

ShowUpDnArrows-enable / disable the display of arrows of the probable direction  
 ArrowUpCode-code of the up arrow symbol  
 ArrowDnCode - code of the down arrow symbol  
 Show old patterns history — enable/disable display legacy shapes (patterns),  
 Enable alert messages, if actual history OFF — enable/disable alerts in the formation/change figures important in the history turned off,  
 Enable alert notification, if actual alert messages is enabled — enable/disable notifications (MQ ID) in the formation/change figures important in the history off,  
 Enable alert sounds actual if history is OFF — enable/disable sound when the education/changing shapes when switched off, the true history,  
 AlertsSoundFileName — name of the sound file for the alarm,  
 Back color — background color,  
 Main text color — color of the main text,  
 Main text font size — the font size of the main text,  
 PeriodLowest - period search algorithm vertices  
 DivLLPeriod is a divisor of the period for the search algorithm vertices  
 LLMethod1 - method 1 averaging algorithm of search of tops  
 LLMethod2 - 2 method of averaging for the search algorithm vertices  
 LLPrice1 price type of 1 for search algorithm vertices  
 LLPrice2 price type of 2 for search algorithm vertices  
 TriggerSensitivity - sensitivity of the smoothing filter (or minimum ograniczenie when using options in a dynamic mode)  
 UseDynamicSensitivity - enable/disable dynamic filtration  
 DynamicSensitivityPeriod - period dynamic filtration  
 DynamicSensitivityMul - factor of the dynamic filter  
 UseMinSensitivityFilterForDynamic - enable/disable minimum value of the threshold sensitivity with dynamic filtering (the value entered in the parameter TriggerSensitivity)  
 DrawPnts - enabling/disabling the display of vertices  
 ArrowCode code simola vertices  
 Limit points to search patterns is the number of vertices to search for figures,  
 Price deviation allowable price deviation in the calculation of the vertices of the figures,  
 Fibo deviation allowable price deviation in the calculation of Fibonacci levels  
 SHS price deviation allowable price deviation in the calculations of the shape SHS (Head-shoulder),  
 SHS time deviation — permissible deviation of time in the calculations of the shape SHS,  
 Camel price deviation allowable price deviation in the calculations of the shape of the Camel,  
 One2One price deviation allowable price deviation in the calculations of the shape One2One (1:1),  
 Vibration price deviation allowable price deviation in the calculation of vibrations,  
 Vibration time deviation – permissible deviation of time in the calculations of vibrations,  
 Draw projection lines — enable/disable display of the projection lines of movement of the figures,  
 Draw relation lines (gartley) — enable/disable the display of the connecting lines (figure Hartley),  
 Draw gartley pattern dimensions — enabling/disabling the display of dimensions of shapes Gartley  
 gartley Draw detailed dimensions — enabling/disabling the display of additional dimensions of shapes Gartley,  
 Gartley detailed dimensions color — the text color of the dimensions of Gartley shapes,  
 Draw pattern descriptions-enabling/disabling the display of the shape description,  
 Draw limits rectangle-enabling/disabling the display of the bounding rectangle,  
 Limit rectangle color — the color of the bounding rectangle,  
 Draw PRZ (gartley) — enabling/disabling the display of projection zones,  
 Show not ready patterns — enabling / disabling the display of shapes in the process of formation,  
 Formed Pattern Koeff — acceptable deviation coefficient for forming shapes,  
 Formed bullish color — the color of the forming figure of the upward movement ("bullish"),  
 Formed bearish color — the color of the forming figure of the downward movement ("bearish"),  
 Show ABCD — enable / disable the display of ABCD shapes.  
 Show I+ABCD-enable / disable the display of I+ABCD shapes (perfect ABCD)  
 Show I+T+ABCD — enable / disable the display of I+T+ABCD shapes,

Bullish color — color of ABCD shapes moving up ("bullish"),  
 Bearish color — color of ABCD shapes moving down ("bearish"),  
 Descriptions font color — color of the text description of ABCD shapes,  
 Show Batman — enable / disable the display of Batman figures,  
 Bullish color — color of Batman figures moving up ("bullish"),  
 Bearish color — color of Batman figures moving down ("bearish"),  
 Descriptions font color — color of the text of the description of Batman figures,  
 Show WXY — enable / disable the display of WXY shapes.  
 Bullish color — color of the WXY figures moving up ("bullish"),  
 Bearish color — color of the WXY figures moving down ("bearish"),  
 Group Gartley patterns-enable / disable grouping of Gartley figures,  
 Show Gartley — enable / disable the display of "general" Gartley shapes.  
 Show only ideal Gartley — enabling/disabling display only "perfect" "total" figures Gartley,  
 Bullish color — color "common" shapes Gartley movement up (bullish),  
 Bearish color — color "common" shapes Gartley movement downward ("bear"),  
 Descriptions font color — color of the text describe the "overall" figures Gartley,  
 Show Butterfly — enable / disable the display of "Butterfly" shapes.  
 Show only ideal Butterfly — enable / disable the display of only "ideal" Butterfly shapes,  
 Bullish color — the color of the Butterfly shapes moving up ("bullish"),  
 Bearish color — the color of the Butterfly shapes moving down ("bearish"),  
 Descriptions font color — the color of the text of the description of the Butterfly shapes,  
 Show Crab — enable / disable the display of "Crab" shapes.  
 Show only ideal Crab — enable / disable displaying only "ideal" Crab shapes,  
 Bullish color — color of Crab shapes moving up ("bullish"),  
 Bearish color — color of Crab shapes moving down ("bearish"),  
 Descriptions font color — color of the text of the description of Crab shapes,  
 Show Bat — enable / disable the display of Bat shapes.  
 Show only ideal Bat — enable / disable displaying only "ideal" Bat shapes,  
 Bullish color — color of Bat shapes moving up ("bullish"),  
 Bearish color — color of Bat shapes moving down ("bearish"),  
 Descriptions font color — color of the text of the description of Bat shapes,  
 Show SHS — enable / disable the display of SHS shapes.  
 Show I+SHS — enable / disable the display of I+SHS shapes,  
 Bullish color — color of SHS shapes moving up ("bullish"),  
 Bearish color — color of SHS shapes moving down ("bearish"),  
 Descriptions font color — color of the text of the description of SHS shapes,  
 Show 3 Drives — enable/disable display of figures 3 Drives,  
 Bullish color 1 — color 1 pieces 3 Drives upward movement (bullish),  
 Bullish color 2 — color 2 pieces 3 Drives upward movement (bullish),  
 Bearish color 1 — color 1 pieces 3 Drives movement downward ("bear"),  
 Bearish color 2 — color 2 pieces 3 Drives movement downward ("bear"),  
 Descriptions of font color — text descriptions of figures 3 Drives  
 Show 5-0 — enable / disable the display of figures 5-0,  
 Bullish color — color of figures 5-0 moving up ("bullish"),  
 Bearish color — color of figures 5-0 moving down ("bearish"),  
 Descriptions font color — color of the text of the description of figures 5-0,  
 Show One-2-One — enable / disable the display of One-2-One shapes.  
 Show Enh. One-2-One — enabling / disabling the display of E121 shapes,  
 Show S. One-2-One-enable / disable the display of S121 shapes,  
 Show One-2-One fibo-enable / disable the One-2-One fibo display,  
 Bullish color — the color of the 1:1 upward movement patterns ("bullish"),  
 Cor. bullish color — cor. color of the 1:1 upward movement patterns ("bullish"),  
 S. cor. bullish color — cor. color of the 1:1 upward movement patterns ("bullish"),  
 Bearish color — color of the 1:1 downward movement patterns ("bearish"),  
 Cor. bearish color — cor. color of figures 1:1 moving down ("bearish"),

S. cor. bearish color — cor. color of figures 1:1 moving down ("bearish"),  
Descriptions font color — color of the text of the description of figures 1:1,  
Show Camel — enable / disable the display of the Camel shape,  
Bullish color — the color of the Camel shapes moving up ("bullish"),  
Bearish color — the color of the Camel shapes moving down ("bearish"),  
Descriptions font color — the color of the text of the Camel shape description,  
Show Vibrations — enable / disable the display of Vibration,  
Vibrations Price+Time color — color of price and time vibrations,  
Vibrations Price color — color of price vibrations,  
Vibrations Time color — color of time vibrations,  
Show Contracting triangle-enable / disable the display of converging triangle shapes(triangle),  
Bullish color — the color of shapes with upward movement triangle ("bullish"),  
Bearish color — the color of shapes with downward movement Triangle ("bearish"),  
Show I+Contracting triangle — enable/disable the display of the "perfect" triangle,  
Bullish color — the color of the ICTriangle shapes moving up ("bullish"),  
Bearish color — the color of the ICTriangle shapes moving down ("bearish"),  
Show NIcontracting triangle — enabling / disabling the display of NCTriangle shapes,  
Bullish color — the color of the NSCTriangle shapes moving up ("bullish"),  
Bearish color — the color of the NSCTriangle shapes moving down ("bearish"),  
Descriptions font color — the color of the text describing the CTriangle shapes,  
Show diagonal triangle — enable/disable display of figures diagonal triangle (DTriangle),  
Bullish color — color figures DTriangle movement up (bullish),  
Bearish color — color figures DTriangle movement downward ("bear"),  
Descriptions of font color — text description of the figures DTriangle,  
Bullish color — obrona Fibo movement upwards (bullish),  
Bearish color — obrona Fibo movement downward ("bear"),  
ShowFibo — enable / disable Fibo display.  
ShowFibo382 — enabling / disabling Fibo display 38.2%,  
ShowFibo500 — enable / disable the display of Fibo 50.0%,  
ShowFibo618 — enabling / disabling Fibo display 61.8%,  
ShowFibo786 — enabling / disabling Fibo display 78.6%,  
ShowFibo886-enable / disable Fibo display 88.6%,  
FiboLevels-array with the value of general fibo  
levels fiboextretlevelstr-array with the value of external fibo levels  
fibointretlevelstr-array with the value of internal fibo levels  
fiboprojlevelstr-array with the value of projection fibo levels  
fiboappprojlevelstr-array with the value of projection fibo levels
