

COMPARISON OF REAL TRADES WITH TRADES FROM THE STRATEGY TESTER

Using an example, let's look at a live MT5 signal and compare it with a strategy tester. The MT5 strategy tester is closer to the results of real trading.

The account was opened and replenished on 2023.07.17, which is 10 weeks at the time of writing this article. During this time, the advisor "Antares" carried out 43 transactions, and earned just over 100% profit, with a 100% win rate.

To prove and demonstrate the quality of my development, we will compare the results of live transactions with transactions from the strategy tester.
