## Frequently Asked Questions

**The pair names that I want to add on the dashboard have a suffix (Example, EURUSD.m), how can I implement this?**

**Example #1:** You want to add pairs with the same suffix on the dashboard. Example: EURUSD.m, USDCAD.m, XAUUSD.m NAS100USD.m, and GBPUSD.m (all pairs have same suffix of .m)

You will need to enter the suffix on the “Symbol Suffix” input setting. For example, if your brokers symbol for “EURUSD” is “EURUSD.m”, then you will need to enter “.m” on this input.

If you are adding any inputs on “Additional Pairs List” or “Custom Pairs List”, then you need to input the pair names without suffix and enter the suffix on the “Symbol Suffix” setting.

About Common Inputs Colors Visualization **Example only**

Variable	Value
123 Currency Pairs Preset	Popular 14 Pairs
ab Additional Pairs (Semi colon separated)	XAUUSD;NAS100USD
ab Custom Pairs List (Semi colon separated)	
ab Symbol Prefix	
ab Symbol Suffix	.m

**Example #2:** You want to add pairs with 2 or more different suffixes on the same dashboard. Example: EURUSD.m and XAUUSD.pro (.m and .pro suffix are different)

You will need to switch the “Currency Preset” to “Custom Pairs List” and manually type the pair names including the suffix on the “Custom Pairs List” input setting. You cannot input the suffixes on the “Symbol Suffix” because you are adding pairs with 2 or more different suffixes.

About Common Inputs Colors Visualization **Example only**

Variable	Value
123 Currency Pairs Preset	Custom Pairs List
ab Additional Pairs (Semi colon separated)	
ab Custom Pairs List (Semi colon separated)	EURUSD.m;XAUUSD.pro;
ab Symbol Prefix	
ab Symbol Suffix	

**Example #3:** You want to add pairs with a suffix AND pairs without suffix on the same dashboard. Example, EURUSD.m and GBPJPY (EURUSD has suffix and GBPJPY does not have suffix)

You will need to switch the “Currency Preset” to “Custom Pairs List” and manually type the pair names including any suffix on the “Custom Pairs List” input setting. You cannot input the suffix on the “Symbol Suffix” all pairs will use this setting to append the suffix on every pair names.

About Common Inputs Colors Visualization **Example only**

Variable	Value
123 Currency Pairs Preset	Custom Pairs List
ab Additional Pairs (Semi colon separated)	
ab Custom Pairs List (Semi colon separated)	EURUSD.m;USDCAD.m;GBPJPY;EURJPY
ab Symbol Prefix	
ab Symbol Suffix	

## How can I add more pairs to the trading dashboard?

You can go to the input settings of the EA and select your “Currency Pre-set” setting. The default is set to 7 Major Pairs but you are able to change this. You can also add custom pairs in addition to the currency pre-set. Please refer to page 41 for more info.

## How can I enable push notifications to my mobile phone?

You can enable push notifications by following this guide: [https://www.metatrader4.com/en/trading-platform/help/setup/settings\\_notifications](https://www.metatrader4.com/en/trading-platform/help/setup/settings_notifications)

You can also enable email notifications by following this guide: [https://www.metatrader4.com/en/trading-platform/help/setup/setup\\_email](https://www.metatrader4.com/en/trading-platform/help/setup/setup_email)

## How do I change the settings for Trailing Stop, Breakeven SL, and/or Partial Close?

There are 3 ways in which you can change the trailing stop, breakeven SL, and/or partial close values.

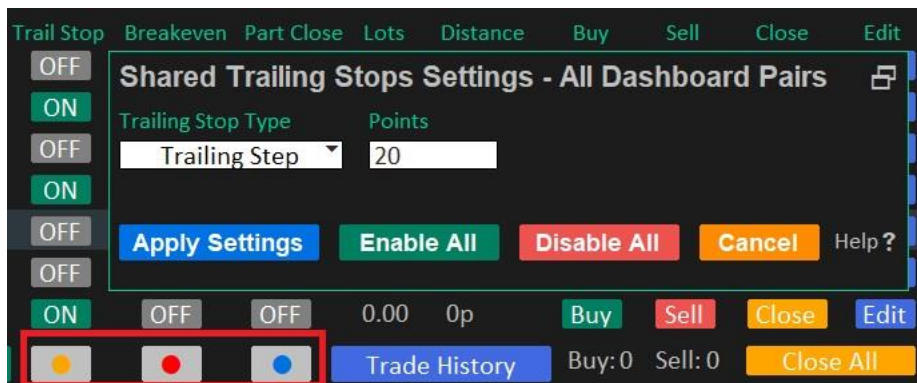

First, you can click the ON/OFF button under Trail Stop, BE-SL, and/or Part Close column on the main dashboard to open their respective management panel. From there, you can change the values for each pair. Please note that by doing this option, then each pair will have its own unique values for trailing stop, breakeven SL, and partial close.

Symbol	Price	Change%	Trail Stop	Breakeven	Part Close
EURUSD	1.04292	↗ +0.21%	OFF	ON	ON
GBPUSD	1.20880	↗ +0.27%	ON	OFF	OFF
USDJPY	136.850	↘ -0.91%	OFF	ON	OFF
USDCAD	1.34240	↗ +0.01%	ON	OFF	ON
AUDUSD	0.68045	↗ +0.26%	OFF	ON	OFF
USDCHF	0.94308	↘ -0.24%	OFF	OFF	ON
NZDUSD	0.63236	↗ +0.48%	ON	OFF	OFF

Second, if you wish to have the same values for trailing stop, breakeven SL, and/or partial close for all pairs on the dashboard, then you can change these settings under “Trailing Stop Management (Default Values)”, “Breakeven SL Management (Default Values)” and/or “Partial Close Management (Default Values)” section on the input settings of the EA and then set the “Apply Same Settings to All Pairs” to true. It will apply the same settings on the inputs tab for all pairs. Please note that by setting this setting to true, then the individually changing the trailing stop, breakeven SL, and partial close settings on the management dashboard will be disabled except for the ability to turn on/off for manual.

About Common Inputs Dependencies	
Variable	Value
<===== Trailing Stop Management (Default Values) =====>	
Apply Same Settings to All Pairs	true
Trailing Stop Calculation	Trailing Step
Trailing Step Points	20
ATR Trailing Stop Multiplier	3.0
ATR Trailing Stop Timeframe	1 Hour
Trailing Deduction Points	20
Trailing Deduction Frequency	15 Minutes
Moving Average Period	100
Moving Average Method	Exponential
Moving Average Timeframe	1 Hour
<===== Breakeven SL Management (Default Values) =====>	
Apply Same Settings to All Pairs	true
Breakeven SL Calculation	Breakeven Points
Breakeven SL Points	100
Breakeven SL Percentage	50
Breakeven SL Profit (Points)	10
<===== Partial Close Management (Default Take Profit) =====>	
Apply Same Settings to All Pairs	true
Enable TP1 Partial Close	false
Enable TP2 Partial Close	true

Third, if you also wish to have the same values for trailing stop, breakeven SL, and/or partial close for all pairs, but you also prefer to have an option to individually change the settings on a few pairs, then you can use the Shared Settings dashboard by clicking the Toggle All button. This will change the values of the settings for all pairs on the dashboard based on the settings you made on the input settings of the EA. You can click “Apply Settings” to apply the changes to all pairs on the dashboard.
