

# Atomic Analyst V81

AI MARKET VERDICT ENGINE

USER MANUAL & QUICK START GUIDE

# WHAT IS ATOMIC ANALYST?

Atomic Analyst V81 is a **standalone** MT5 signal indicator supported by an **AI Market Verdict Panel**.

The core engine detects **buy** and **sell** opportunities and displays structured trade levels, including stop loss and multiple take-profit targets.

The panel adds a second layer of intelligence by analyzing **market direction**, **indicator consensus**, **momentum**, **volatility**, **volume**, **spread**, **session conditions**, and **multi-timeframe alignment**.

Instead of relying on one signal alone, Atomic Analyst helps the trader see the **full market context** behind the setup.

THE **ENGINE** SHOWS THE TRADE OPPORTUNITY.  
THE **AI VERDICT** CONFIRMS THE MARKET CONTEXT.

## 1. SIGNAL ENGINE

Generates buy and sell signals with stop loss and up to 5 take-profit levels.

## 2. AI VERDICT PANEL

Analyzes market evidence from multiple layers to produce clear trading verdicts.

## 3. MARKET CONTEXT

Shows trend strength, dominance, momentum, volatility, volume, spread, session and more.

# WHAT IS ATOMIC ANALYST?

Atomic Analyst is an **AI-powered market verdict engine** that analyzes multiple forms of market evidence and converts them into a clear trading decision: **BUY, SELL, or WAIT.**

## THE MAIN IDEA

Instead of checking many indicators and timeframes manually, Atomic Analyst combines everything that matters and gives you one professional, easy-to-read verdict with full market context.

Atomic Analyst does not just show one signal. It analyzes everything important in the market:

Multi-Timeframe  
Direction

Indicator  
Consensus

Market  
Dominance

Trend Pressure &  
Momentum

Volatility &  
Volume

Signal Ticket  
Data

Performance  
Statistics

# HOW ATOMIC ANALYST WORKS

Atomic Analyst is built around a two-layer decision system that combines a powerful signal engine with an AI-powered market verdict panel.

The **engine** finds the opportunity.

The **AI** confirms the market context.

## KEY BENEFITS

More precise entries with structured SL and multi-TP levels.

AI confirmation helps avoid weak or counter-trend signals.

Full market context in one professional and easy-to-read panel.

Saves time by combining multiple analyses into one clear decision.

Two layers. One objective:  
Cleaner signals, better decisions, smarter trading.

### 1. SIGNAL ENGINE

- Scans the market continuously
- Detects **buy** and **sell** opportunities
- Prints signals directly on the chart
- Provides Stop Loss for each signal
- Provides up to 5 **Take Profit** levels

### OUTPUT

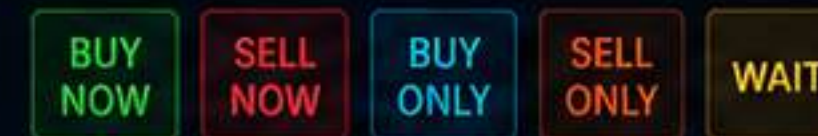

A structured trade setup with direction, entry area, stop loss, and take profit levels.

### 2. AI MARKET VERDICT PANEL

- Analyzes the broader market environment
- Combines 18+ indicators and data layers
- Measures trend pressure, momentum, volume, volatility, dominance, MTF, etc.
- Produces a clear market verdict

#### VERDICT EXAMPLES

Confidence: 81%

### OUTPUT

A clear verdict showing what the market currently favors: buy, sell, or wait.

### 3. FINAL TRADER DECISION

- Compare engine signal with AI verdict
- Use market context to confirm or avoid
- Filter weak or counter-trend setups
- Execute with discipline and risk control

TRADE

WAIT

IGNORE

### OUTPUT

A confident decision based on both opportunity and market context.

**IMPORTANT:** The engine may print a signal at any time. It is the trader's responsibility to use the AI verdict and market context to decide whether to **trade**, **wait**, or **ignore** the signal.

# WHO ATOMIC ANALYST IS DESIGNED FOR

Atomic Analyst is built for traders who want a clearer, more structured way to read market direction and confirm signals without checking many indicators manually.

It brings the most important market information into one professional dashboard, helping you make **smarter, more confident decisions**.

## THE GOAL

Atomic Analyst is a **decision-support** indicator, not a guarantee of profit.

The trader is responsible for risk, execution, broker conditions, and final decision-making.

## GREAT FOR

Manual traders who want clearer **buy/sell** confirmation.

Traders who use **multi-timeframe** analysis.

Traders who want to **avoid** counter-trend signals.

Signal providers who need **structured** signal information.

Traders who want **visual market** context before entering.

Traders interested in signal export or **automation workflows**.

Traders who want a **professional** dashboard instead of many separate indicators.

## NOT DESIGNED FOR

Traders looking for a **magic profit button**.

Traders who want to enter every signal **blindly**.

Traders who ignore **risk management**.

Traders who trade during extreme spread or high-risk news **without caution**.

## BUILT FOR STRUCTURE. DESIGNED FOR CLARITY.

Atomic Analyst helps you separate strong setups from weak ones, align with the market, and protect your capital with better information and better context.

# HOW TO INSTALL ATOMIC ANALYST IN MT5

Atomic Analyst V81 is an **MT5** indicator that installs like any other indicator. Follow the steps below based on how you **purchased the product**.

## IMPORTANT REMINDERS

Use MetaTrader 5 (MT5), not MetaTrader 4 (MT4).

Attach the indicator to a clean chart for best results.

Allow a few seconds for the engine and panel to load.

For alerts or notifications, check MT5 alert and notification settings.

For automation (EA), place EA files in MQL5 → Experts, not Indicators.

## YOU HAVE TWO OPTIONS TO INSTALL ATOMIC ANALYST

### OPTION 1: INSTALL FROM MQL5 MARKET (RECOMMENDED)

1

Open MetaTrader 5 and login with your MQL5 account.

2

Open Navigator and go to Market.

3

Go to Purchased tab.

4

Find Atomic Analyst V81.

5

Click Install.

6

Wait for installation to finish.

7

Drag Atomic Analyst onto the chart.

### OPTION 2: MANUAL INSTALLATION

1

Open MetaTrader 5

2

Click on File → Open Data Folder.

3

Open MQL5 → Indicators folder.

4

Paste the Atomic Analyst .ex5 or .mq5 file.

5

Restart MT5 or click right click in Navigator and select Refresh.

6

Drag Atomic Analyst onto the chart.

7

Allow the panel and engine to load.

### AFTER INSTALLATION

Once attached to the chart, Atomic Analyst will start its engine, read the market, and display signals, tradeTrading, and the AI Market Verdict Panel.

#### TIP

If you don't see the panel or signals, make sure the indicator is attached to the chart, objects are visible, and AutoTrading is allowed if you use alerts or automation.

#### NEED HELP?

Check the Troubleshooting section on the last pages of this manual.

## HOW TO INSTALL ATOMIC ANALYST IN MT5

Atomic Analyst V81 installs like any standard MT5 indicator. Follow the steps below to install and attach the indicator so the Signal Engine and AI Panel can load correctly.

### IMPORTANT REMINDERS

Use MetaTrader 5 (MT5), not MetaTrader 4 (MT4).

Attach the indicator to a clean chart for best results.

Allow a few seconds for the engine and panel to load.

For alerts or notifications, check MT5 alert and notification settings.

For automation (EA), place EA files in MQL5 → Experts, not Indicators.

### OPTION 1: INSTALL FROM MQL5 MARKET (RECOMMENDED)

1

Open MetaTrader 5 and log in with your MQL5 account.

2

Open Navigator and go to Market.

3

Go to Purchased tab.

4

Find Atomic Analyst V81.

5

Click Install.

6

Wait for installation to finish.

7

Drag Atomic Analyst onto the chart.

### OPTION 2: MANUAL INSTALLATION

1

Open MetaTrader 5

2

Click File → Open Data Folder.

3

Open MQL5 → Indicators folder.

4

Paste the Atomic Analyst indicator file.

5

Restart MT5 or click Refresh in Navigator.

6

Drag Atomic Analyst onto the chart.

7

Allow the panel and engine to load.

### AFTER INSTALLATION

Once attached to the chart, Atomic Analyst will start its engine, read the market, and display signals, trade levels, and the AI Market Verdict Panel automatically.

### NEED HELP?

Check the Troubleshooting section on the last pages of this manual.

## HOW TO INSTALL ATOMIC ANALYST IN MT5

Atomic Analyst V81 is an **MT5** indicator that can be installed in a few simple steps. Choose the installation method that matches where you purchased the product.

### IMPORTANT REMINDERS

Use **MetaTrader 5 (MT5)**, not **MetaTrader 4 (MT4)**.

Attach the indicator to a **clean chart** for best results.

Allow a few seconds for the **engine** and **panel** to load.

For **alerts** or notifications, check **MT5 alert** and **notification settings**.

For automation (EA), place EA files in **QL5** → **Experts**, not **Indicators**.

### OPTION 1: INSTALL FROM MQL5 MARKET (RECOMMENDED)

1

Open MetaTrader 5 and log in with your MQL5 account.

2

Open Navigator and go to Market.

3

Go to Purchased tab.

4

Find Atomic Analyst V81.

5

Click Install.

6

Wait for installation to finish.

7

Drag Atomic Analyst onto the chart.

### OPTION 2: MANUAL INSTALLATION

1

Open MetaTrader 5

2

Click File → Open Data Folder.

3

Open MQL5 → Indicators folder.

4

Paste the Atomic Analyst indicator file.

5

Restart MT5 or click right click in Navigator and select Refresh.

6

Drag Atomic Analyst onto the chart.

7

Allow the panel and engine to load.

### AFTER INSTALLATION

Once attached to the chart, Atomic Analyst will start its engine, read the market, and display signals, trade levels, and the AI Market Verdict Panel.

**TIP** If you don't see the panel or signals, make sure the indicator is attached to the chart, objects are visible, and AutoTrading is allowed if you use alerts or automation.

### NEED HELP?

Check the Troubleshooting section on the last pages of this manual for common issues and solutions.

## UNDERSTANDING THE ATOMIC ANALYST PANEL

The Atomic Analyst Panel is your **AI cockpit**. It combines multiple market intelligence layers to deliver a clear market verdict and actionable signal information in one professional dashboard.

### 1. MTF RAIL

See multi-timeframe direction at a glance to identify alignment and trend structure.

### 2. INDICATOR CONSENSUS

Classic indicator matrix that shows what the major tools are suggesting right now.

### 3. ATOMIC AI DECISION

The AI market verdict with confidence score and advisory protocol (Buy/Sell/Wait).

### 4. MARKET DOMINANCE

Shows who is in control: Buyers, Sellers, or Uncertainty and by what percentage.

### 5. ATOMIC EVIDENCE MATRIX

The "why behind the verdict" using trend, momentum, volume, volatility and more.

### 6. ACTIVE SIGNAL TICKET

Live signal details: direction, entry, SL, TP levels and time of the signal.

### 7. STATISTICS / PERFORMANCE

Signal activity and performance overview for the current session and day.

### 8. CONTROL RAIL

Quick status & controls for filters, alerts, spread, gradient and connection.

### TIP

Use all sections together. The strongest setups happen when the Signal Engine agrees with the AI Decision and the market context supports the trade.

### REMEMBER

The panel confirms the environment. You decide the execution and you are always responsible for risk management.

## PANEL OVERVIEW THE AI COCKPIT

The Atomic Analyst Panel is your complete **AI cockpit**. It combines multiple intelligence layers to deliver a clear market verdict, explain the reason behind it, and show the active signal information in one professional dashboard.

- 1 MTF RAIL**  
Multi-timeframe direction at a glance. Shows BUY / SELL / WAIT alignment.
- 2 INDICATOR CONSENSUS**  
Classic indicator matrix that shows what the major tools are suggesting now.
- 3 ATOMIC AI DECISION**  
The main AI verdict with confidence score and advisory protocol (Buy/Sell/Wait).
- 4 MARKET DOMINANCE**  
Shows who is in control: Buyers, Sellers or Uncertainty with live percentages.
- 5 ATOMIC EVIDENCE MATRIX**  
The "why behind the verdict" using trend, momentum, volume, volatility and more.
- 6 ACTIVE SIGNAL TICKET**  
Live signal details: direction, entry, SL, TP levels and time of the signal.
- 7 STATISTICS / PERFORMANCE**  
Signal activity and performance overview for the current session and day.
- 8 CONTROL RAIL**  
Quick status & controls for filters, alerts, spread, gradient and connection.

## THE SIGNAL ENGINE

### Buy, Sell, Stop Loss & Take Profit Levels

Atomic Analyst includes its own signal engine. The engine scans the market and prints buy or sell signals directly on the chart. Each signal can include a stop-loss level and multiple take-profit targets, giving the trader a structured trade map.

#### SIGNAL

Buy (green arrow) or Sell (red arrow) is printed when the engine detects a valid opportunity.

#### ENTRY

The entry is taken at market price when the conditions are aligned with your strategy.

#### STOP LOSS (SL)

The Stop Loss level is automatically calculated and shown on the chart to manage risk.

#### TAKE PROFIT LEVELS

Up to 5 Take Profit levels (TP1 – TP5) help you scale out and lock in profits step by step.

The AI Market Verdict Panel confirms whether the market environment supports this signal. The engine shows the opportunity. The AI verifies the context.

EURUSD,M15 1.08945 1.08987 1.08931 1.08968

#### KEY POINTS

- ✓ Signals are generated by the Atomic Analyst engine.
- ✓ Each signal includes a structured trade plan.
- ✓ Use AI Market Verdict Panel to confirm market support.
- ✓ Manage risk and trade with discipline.

**ATOMIC  
ANALYST**

AI CONFIRMS.  
YOU DECIDE.  
YOU EXECUTE.

## THE SIGNAL ENGINE BUY, SELL, SL & TP LEVELS

Atomic Analyst V81 includes its own signal engine. It scans the market and prints **BUY** or **SELL** signals directly on the chart with a Stop Loss and multiple Take Profit targets.

### SIGNAL DETECTION

The engine detects high probability opportunities based on price action, momentum and market structure.

### BUY / SELL SIGNALS

Signals are printed on the chart with clear visual marks for fast identification.

### STOP LOSS LEVEL

Every signal includes a recommended Stop Loss level for proper risk control.

### MULTIPLE TAKE PROFITS

Up to 5 Take Profit levels are provided to help you scale out and secure profits.

### AI PANEL CONFIRMATION

The AI Market Verdict Panel confirms whether the market environment supports the signal.

### TIP

Always confirm the signal with the AI Verdict, MTF alignment, and Market Dominance for higher quality setups.

### RISK REMINDER

Trading involves risk. Use proper position sizing and never risk more than you can afford to lose.

### BEST PRACTICE

Let the signal, AI verdict, and market context agree. That is where the strongest opportunities appear.

### EXAMPLE: SELL SIGNAL ON EURUSD (M5)

EURUSDm, M5 1.14768 1.14776 1.14736 1.14741

### WHAT YOU SEE

- ✓ Clear SELL signal
- ✓ Stop Loss for risk control
- ✓ 5 Take Profit targets
- ✓ Fibonacci structure
- ✓ Market reaction after signal

### ACTIVE SIGNAL TICKET

DIRECTION	SELL ↓

### SIGNAL STRENGTH 81%

QUALITY HIGH

FIT EXCELLENT

*i* Use the AI Verdict Panel to confirm the signal context before entering.

## ATOMIC AI DECISION HOW TO READ THE VERDICT

The Atomic AI Decision is the core of the panel. It converts all market intelligence into a clear verdict and confidence level so you can take action with more clarity.

### BUY NOW

Strong market conditions for buying. High probability long opportunities.

### SELL NOW

Strong market conditions for selling. High probability short opportunities.

### BUY ONLY

Market bias favors BUY side. Look only for long opportunities.

### SELL ONLY

Market bias favors SELL side. Look only for short opportunities.

### WAIT

Market is unclear or mixed. Best choice is to wait for confirmation.

### CONFIDENCE LEVEL

Confidence shows the strength of the current market verdict. Higher confidence = stronger market alignment behind the decision.

- 75% - 100% Very Strong
- 50% - 74% Moderate
- 0% - 49% Weak / Unclear

### BUY NOW

Take long opportunities with confidence.

### SELL NOW

Take short opportunities with confidence.

### BUY ONLY

Focus on long setups only.

### SELL ONLY

Focus on short setups only.

### WAIT

Better to wait for market confirmation.

### TIP

Always align the Signal Engine with the AI Decision, MTF Rail, and Market Dominance. This alignment creates the highest quality trading opportunities.

### REMEMBER

The panel gives you the market context. Your plan, risk management, and execution make the difference.

### IMPORTANT

Trading involves risk. Past performance does not guarantee future results.

## MULTI-TIMEFRAME RAIL

### SEE MARKET DIRECTION ACROSS TIMEFRAMES

The MTF Rail shows the directional state of multiple timeframes in one line. It helps you quickly see whether the market is aligned, mixed, or in conflict.

#### ALIGNED

Most timeframes show the same direction. Market structure is cleaner and bias is stronger.

#### MIXED

Timeframes show different directions. Use more caution and wait for clarity or alignment.

#### CONFLICT

Lower timeframes go against higher timeframes. High risk of fakeouts. Wait for confirmation.

#### TIP

Stronger setups appear when M1 to H4 are aligned with D1 and W1. Mixed rails call for patience and confirmation.

#### MTF RAIL EXAMPLE

M1	M5	M15	M30	H1	H4	D1	W1	MN1
BUY	BUY	BUY	BUY	BUY	BUY	BUY	BUY	WAIT

#### ALIGNED EXAMPLE

Strong bullish alignment across all major timeframes.

M1	M5	M15	M30	H1	H4	D1	MN1
BUY	BUY	BUY	BUY	BUY	BUY	BUY	BUY

- ✓ All timeframes are in the same direction.
- ✓ Trend is strong and market structure is in agreement.
- ✓ Better probability environment.

#### MIXED EXAMPLE

Directions are mixed. Market needs more clarity.

M1	M5	M15	M30	H1	H4	D1	W1	MN1
BUY	BUY	BUY	SELL	BUY	WAIT	SELL	BUY	WAIT

- ✓ Mixed signals across timeframes.
- ✓ Market may consolidate or reverse.
- ✓ Wait for alignment or stronger evidence.

#### CONFLICT EXAMPLE

Lower timeframes go against higher ones. High risk of traps.

M1	M5	M15	M30	H1	H4	D1	W1	MN1
BUY	BUY	SELL	SELL	SELL	SELL	SELL	SELL	SELL

- ✓ Lower timeframes are bullish, but higher timeframes are bearish.
- ✓ High risk of fake breakouts.
- ✓ Best choice: avoid for alignment.

#### HOW TO USE THE MTF RAIL

- 1 Check the rail before taking any signal.
- 2 Look for alignment from M1 to H4 with D1/W1.
- 3 If mixed, reduce position size or wait.
- 4 If in conflict, avoid trading or wait for confirmation.

#### KEY TAKEAWAYS

Alignment = Stronger trend, cleaner setup.

Mixed = Reduce risk, wait for clarity.

Conflict = High risk, avoid or wait.

MTF Rail is a quick filter for market direction.

ATOMIC  
ANALYST

Use the MTF Rail with the AI Verdict, Evidence Matrix and Market Dominance for the best results.

## INDICATOR CONSENSUS CLASSIC INDICATORS

The Indicator Consensus block shows what the most popular technical indicators are suggesting right now. Instead of checking each indicator manually, Atomic Analyst organizes them into one clear consensus matrix so you can see the overall agreement at a glance.

### HOW TO USE IT

When most indicators are **BUY**, the market has strong technical support.

When most indicators are **SELL**, the market has strong technical pressure.

When indicators are **mixed**, be more careful and wait for more alignment.

### IMPORTANT

Indicator Consensus is only one part of the full AI decision. Always confirm with the AI Verdict, MTF Rail, Market Dominance and Evidence Matrix.

### TIP

A strong consensus increases the quality of a setup. When indicators agree with the AI Verdict and Market Dominance, the signal has more context.

### REMEMBER

No single indicator is perfect. The power comes from alignment between indicators, AI logic, market pressure and multi-timeframe direction.

### CAUTION

If the consensus is mixed or weak, wait for better conditions before taking a trade.

## ATOMIC EVIDENCE MATRIX THE "WHY" BEHIND THE VERDICT

The Atomic Evidence Matrix explains the forces behind the AI decision. It shows how trend, momentum, volume, volatility and multi-timeframe alignment come together to create the current market verdict.

### EVIDENCE FACTORS

#### ATOMIC BIAS

Overall directional bias based on all market intelligence.

#### TREND PRESSURE

Measures the strength of the current trend and market direction.

#### MOMENTUM FORCE

Shows how strong the momentum is behind the current move.

#### VOLUME PULSE

Analyzes the volume flow and buying/selling participation.

#### VOLATILITY

Measures current market volatility and price expansion.

#### CURRENCY / PAIR

Monitors currency strength and pair correlation environment.

#### MTF ALIGNMENT

Checks alignment across multiple timeframes for direction.

#### RSI PRESSURE

Evaluates RSI position and pressure in the current price zone.

### TIP

The Evidence Matrix gives you the real reason behind the verdict. Use it to understand market context before taking any trade.

### REMEMBER

When evidence factors agree with the verdict, the setup quality is higher. When they conflict, proceed with caution.

### BEST PRACTICE

Combine the Evidence Matrix with MTF Rail, Market Dominance and Active Signal Ticket for the best decision quality.

### NEED HELP?

Check the Support section on the last pages of this manual or contact Issam Kassas through MQL5 private message.

## MARKET DOMINANCE UNDERSTANDING THE BAR

Market Dominance shows the balance between bullish and bearish forces. It is one of the most important components behind the AI Verdict.

- BULLISH ZONE (0% - 35%)**  
Buyers are in control. The market has bullish strength but still needs confirmation from other factors.

- WAIT ZONE (35% - 65%)**  
Market is balanced. No clear dominance. Best choice is to wait for stronger confirmation.

- BEARISH ZONE (65% - 100%)**  
Sellers are in control. The market shows strong bearish pressure.

- CURRENT POSITION**  
The white marker shows the current market dominance value in real time.

- DOMINANT SENTIMENT**  
The panel displays the dominant sentiment based on the current dominance level.

**TIP** Use Market Dominance with the Evidence Matrix and MTF Rail for the best results. Do not rely on one factor alone.

### BEST PRACTICE

When dominance is above 65% (bearish or bullish), look for setups in the same direction with other factors aligned.

### KEY TAKEAWAY

Market Dominance helps you see which side is controlling the market right now.

## ACTIVE SIGNAL TICKET COMPLETE TRADE OVERVIEW

The Active Signal Ticket displays all key trade information in one place. It helps you understand the entry, risk, and target structure of the current signal at a glance.

### DIRECTION

Shows whether the current signal is BUY or SELL.

### ENTRY & STOP LOSS

Displays the recommended entry price and stop loss level for the trade.

### TAKE PROFITS (TP1 - TP5)

Five take profit levels help you scale out and manage the trade efficiently.

### RISK & REWARD

Shows risk in pips, total reward, and the risk-to-reward ratio.

### TIME STAMP

Records the exact time when the signal was generated.

### TIP

Use the Active Signal Ticket together with the Evidence Matrix, MTF Rail and Market Dominance for higher quality trading decisions.

### BEST PRACTICE

Plan your entry, stop loss and take profits in advance. Follow your trading plan and manage risk properly.

### REMEMBER

The Signal Engine provides opportunities. The AI Panel confirms the market context. You make the final decision.

SIGNAL TIME 18 Jun 2026 12:22

## HOW TO USE THE SIGNAL TICKET

Check the direction and make sure it aligns with the AI Verdict.

Confirm the stop loss and ensure your risk is within your plan.

Use the take profit levels to plan partial exits and secure profits.

Evaluate the risk-to-reward ratio before taking the trade.

### IMPORTANT

Prices are updated in real time. Always confirm with the chart before placing any trade.

Past performance does not guarantee future results.

### EQUITY CURVE

### TIP

Review your statistics regularly. Consistency comes from quality setups, proper risk management and discipline.

### BEST PRACTICE

Use the data to find what works best for you. Focus on high-probability setups and avoid forced trades.

### REMEMBER

Past performance is for evaluation only. The future depends on your decisions and market conditions.

## EQUITY CURVE & PERFORMANCE INSIGHTS

The Equity Curve and Performance Insights help you evaluate your progress over time. Monitor growth, drawdown, consistency and overall strategy quality with clear visual data.

### EQUITY CURVE

Visualize your balance growth over time. Understand your long-term performance at a glance.

### PERFORMANCE METRICS

Track profit, drawdown, win rate, profit factor and more. All key numbers in one place.

### DRAWDOWN ANALYSIS

See maximum drawdown and recovery levels to understand risk exposure.

### CONSISTENCY OVER TIME

Measure how consistent your strategy is across days, weeks and months.

### MAKE BETTER DECISIONS

Use data-driven insights to improve your strategy, manage risk and stay disciplined.

### TIP

Review your equity curve regularly. Look for steady growth, controlled drawdowns and consistent performance over time.

### BEST PRACTICE

Focus on consistency, not perfection. Protect your capital, follow your plan and let high-probability setups work over the long term.

### REMEMBER

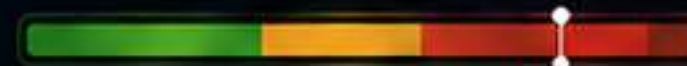

Past performance is for evaluation only. The future depends on your decisions and market conditions.

## ATOMIC FILTER

### REDUCE COUNTER-TREND SIGNALS

The Atomic Filter helps reduce signals that conflict with the dominant market condition. It works with the AI Market Verdict, Evidence Matrix, and Market Dominance.

You can enable or disable the filter anytime. Use it as a tool, not a rule.

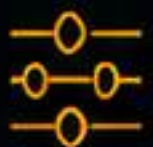

#### FILTER PURPOSE

Helps reduce low-probability signals that go against the dominant market direction.

#### CLEANER SETUPS

Keeps your chart cleaner by filtering weak or conflicting opportunities.

#### OPTIONAL CONTROL

You decide when to enable or disable the filter based on your strategy and market condition.

#### NOT A GUARANTEE

The filter does not guarantee better results. Risk management is still your responsibility.

#### KEY TAKEAWAY

The Atomic Filter is a tool to help you focus on signals that align with the dominant market direction. Use it wisely.

#### IMPORTANT REMINDER

No filter can replace good risk management. Always protect your capital and trade with discipline.

ATOMIC  
ANALYST

The Engine Finds Opportunities.  
The AI Confirms the Context.  
You Take the Decision.

### HOW ATOMIC FILTER WORKS

#### FILTER ON (SUPPORTS MARKET DIRECTION)

Counter-trend signals are reduced or hidden.

AI DECISION

**SELL ONLY**

CONFIDENCE 82%

Market Bias: **BEARISH**

MARKET DOMINANCE

Bearish 76% Wait 18% Bullish 6%

EURUSD,M15

Result:

Only high-quality signals that align with the dominant direction are shown.

VS

#### FILTER OFF (SHOWS ALL SIGNALS)

Counter-trend signals may appear.

AI DECISION

**SELL ONLY**

CONFIDENCE 82%

Market Bias: **BEARISH**

MARKET DOMINANCE

Bearish 76% Wait 18% Bullish 6%

EURUSD,M15

Result:

More signals appear, including those that go against the dominant direction.

#### EXAMPLE SCENARIO

AI Verdict: **SELL ONLY**

Market Dominance: Bearish 78%

Evidence Matrix: Strong Bearish

MTF Rail: Mostly **SELL** / **WAIT**

Filter **ON**:

Weak **BUY** signals that go against the market are filtered out.

Filter **OFF**:

Both **BUY** and **SELL** signals are shown.

#### WHEN TO USE THE FILTER

- ✓ When the market is trending clearly.
- ✓ When the AI verdict shows strong directional bias.
- ✓ When you want cleaner, higher-quality setups.
- ✓ When you want to avoid fighting the dominant trend.

#### WHEN YOU MAY DISABLE THE FILTER

- ✗ When trading reversals or counter-trend strategies.
- ✗ When the market is ranging or choppy.
- ✗ When you want to see all signals for analysis.

#### FILTER CONTROL

Enable or disable the Atomic Filter from the Control Rail.

AI FILTER

**ON**

Green = Filter is ON  
Gray/Red = Filter is OFF

## UNDERSTANDING THE AI VERDICT COMPONENT BREAKDOWN

The AI Verdict is generated from multiple market components working together. Each component provides a piece of the market puzzle.

### INDICATOR CONSENSUS

Aggregates multiple indicators to detect trend strength and direction.

### ATOMIC EVIDENCE MATRIX

Analyzes key market forces and evidence to determine bullish or bearish pressure.

### MARKET DOMINANCE

Measures the balance between buyers and sellers in the current environment.

### MTF DIRECTION (RAIL)

Checks alignment across multiple timeframes for trend confirmation.

### VOLATILITY & MOMENTUM

Evaluates market energy, momentum strength and trend sustainability.

### VOLUME, SPREAD & SESSION

Confirms market participation, liquidity quality and trading session conditions.

ATOMIC  
ANALYST

Session Quality	<b>High</b>

### KEY TAKEAWAYS

- Strong bearish evidence across key components.
- Market dominance favors sellers (81%).
- Multiple timeframe alignment is bearish.
- Best approach: Look for sell setups only.
- Wait for high-probability confirmation.

### VERDICT MEANING

- BUY NOW** Strong bullish alignment. Consider long entries.
- SELL NOW** Strong bearish alignment. Consider short entries.
- BUY ONLY** Only long setups are valid. Avoid shorts.
- SELL ONLY** Only short setups are valid. Avoid longs.
- WAIT** No clear edge. Wait for better conditions.

**TIP** The AI Verdict is not just a signal. It is a complete market assessment. Use it to filter trades and improve your win rate.

### BEST PRACTICE

Always align your trades with the AI Verdict. Avoid taking trades against strong market dominance and evidence.

### REMEMBER

The AI Panel confirms market context. You stay in control of entry, risk and trade management.

### NEED HELP?

Check the Support section at the end of this manual or contact us via MQL5 private message.

## HOW TO READ A SIGNAL

### Signal + AI Verdict + Market Context

A high-quality setup comes from combining the signal engine with the AI verdict and all supporting market evidence.

Follow this 8-step process every time.

- 1 CHECK THE SIGNAL ENGINE**  
Identify the Buy or Sell signal on the chart.
- 2 CHECK ENTRY, SL & TP LEVELS**  
Confirm the entry price, Stop Loss and Take Profit levels (TP1 – TP5).
- 3 READ THE AI DECISION**  
Check the AI verdict (Buy Now, Sell Only, Buy Only, Sell Now or Wait).
- 4 CHECK CONFIDENCE**  
Higher confidence means stronger market support for the signal.
- 5 CHECK MTF ALIGNMENT**  
Review the MTF Rail for alignment across timeframes.
- 6 REVIEW EVIDENCE MATRIX**  
More green dots = stronger agreement between indicators.
- 7 CHECK MARKET DOMINANCE**  
Understand who is in control and the probability of continuation or reversal.
- 8 CONFIRM SPREAD & SESSION**  
Ensure spread is OK and the current session is suitable for trading.

**ATOMIC ANALYST**

**ATOMIC AI DECISION**  
**BUY NOW**

### MAKE THE DECISION

If everything aligns, **take the trade** with proper risk management. If not, wait or **ignore** the signal.

### KEY POINT

The more boxes you confirm, the stronger the setup.

### DISCIPLINE

A strong process is more important than predicting the next move.

### FOCUS

Let the engine find opportunities. Let the AI confirm the context.

**ATOMIC ANALYST**

The Engine Finds.  
The AI Confirms.  
**You Decide.**

## WHEN TO AVOID TRADING WHEN TO WAIT

Atomic Analyst is powerful not only for finding trades, but also for helping you avoid poor conditions. Waiting for the right environment is part of a professional trading process.

### REMEMBER:

Protecting capital by avoiding weak setups is more important than forcing trades.

### KEY SITUATIONS TO WAIT

#### AI VERDICT = WAIT

The AI decision says WAIT. The market does not support a clear direction.

#### LOW CONFIDENCE

Confidence is weak. The edge is low and the risk is higher.

#### MTF RAIL IS MIXED

Timeframes are not aligned. Mixed direction increases uncertainty.

#### SIGNAL CONFLICTS WITH AI VERDICT

The engine signal fights against the dominant market condition.

#### SPREAD NOT OK

High spread increases cost and reduces the quality of execution.

### ADDITIONAL REASONS TO AVOID TRADING

#### UNCLEAR DOMINANCE

Market dominance is weak or changing. Direction is not reliable.

#### ABNORMAL VOLATILITY

Volatility is too high or unusual. Price may be unstable and random.

#### LOW VOLUME

Volume is low. Breakouts and moves may lack strength.

#### MAJOR NEWS NEAR

High impact news is upcoming. Better to wait for the release.

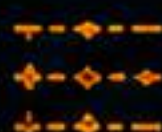

#### RANGING MARKET

Price is ranging with no clear direction. Breakouts may fail.

#### OVEREXTENDED PRICE

Price is stretched too far from the mean or key levels.

#### NO KEY LEVELS

No strong support or resistance nearby to work with.

#### SESSION NOT ACTIVE

Market session is not active. Liquidity may be too low.

### EXAMPLE: WHY WAITING MATTERS

#### BAD MARKET CONDITION – AVOID

Result: High risk, low quality.  
Best decision is to WAIT.

- ❌ AI Decision: WAIT
- ❌ Confidence: 28%
- ❌ MTF Rail: Mixed
- ❌ Dominance: Weak
- ❌ Spread: High
- ❌ Volume: Low
- ❌ Volatility: High
- ❌ News: High Impact Soon

VS

#### GOOD MARKET CONDITION – TRADE

Result: High probability setup.  
Plan your trade and manage risk.

- ✅ AI Decision: BUY NOW
- ✅ Confidence: 82%
- ✅ MTF Rail: Aligned
- ✅ Dominance: Bullish
- ✅ Spread: OK
- ✅ Volume: High
- ✅ Volatility: Normal
- ✅ News: No Major News

ATOMIC  
ANALYST

AI DECISION

**WAIT**

CONFIDENCE 32%

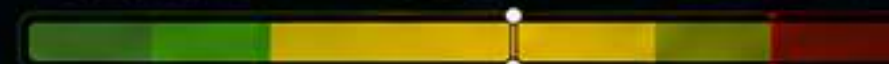

### MARKET DOMINANCE

Bullish 20%

Wait 60%

Bearish 20%

### MTF RAIL

M1	M5	M15	M30	H1	H4	D1	W1	MN1

Signal icon	Volatility	High	Wi-Fi icon	Gradient	ON
Bar chart icon	Volume	Low	Wi-Fi icon	Connection	Connected
Filter icon	AI Filter	ON	Bell icon	Alerts	ON

Market conditions are not ideal.  
Waiting is the smarter decision.

### KEY TAKEAWAY

- ✅ Not every signal is a good signal.
- ✅ Wait for alignment, clarity and confirmation.
- ✅ Avoid weak conditions and save your capital.
- ✅ The best trades come in the best conditions.
- ✅ When in doubt, do nothing.

**BLOOD TRADING IS NOT ABOUT HOW OFTEN YOU TRADE, BUT HOW WELL YOU WAIT.**

Protect your capital. Wait for the right context. Then execute with confidence.

ATOMIC  
ANALYST

THE ENGINE FINDS OPPORTUNITIES.  
THE AI CONFIRMS THE CONTEXT.  
**YOU TAKE THE RIGHT DECISION.**

## ALERTS & SIGNAL EXPORT

### SUPPORT EXTERNAL SIGNAL WORKFLOWS

Atomic Analyst can trigger alerts and export signal data to a file for external use. This allows you to integrate with notification services, APIs, or signal-delivery workflows when properly configured.

#### PANEL ALERTS

Get notified instantly when a new signal appears, when AI decision changes, or when confidence is strong.

#### SIGNAL FILE EXPORT

Signals can be written to a file with full details: symbol, action, price, SL, TP1–TP5, confidence, and time.

#### EXTERNAL INTEGRATION

The exported file can be used by external scripts, APIs, dashboards, or third-party signal services.

#### FLEXIBLE & OPTIONAL

All alerts and export features are optional. Use what fits your workflow and strategy.

#### IMPORTANT NOTES

- Alerts and export features depend on your MT5 settings and broker conditions.
- Make sure file permissions are enabled in MetaTrader (Tools > Options > Expert Advisors).
- Signal export is for informational use. Final trading decisions are always your responsibility.
- We do not guarantee delivery through any third-party platforms or services.

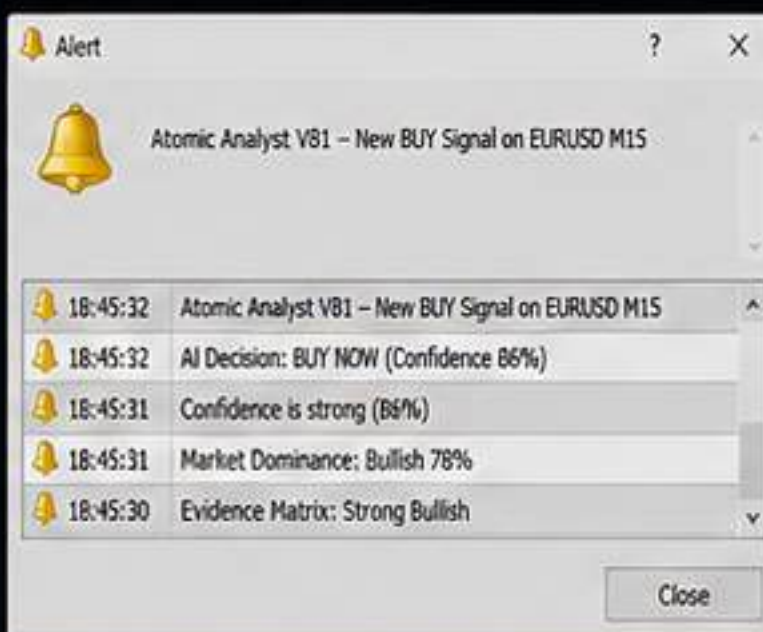

### 1. ALERTS – GET NOTIFIED IN REAL TIME

### 3. FROM ATOMIC ANALYST TO YOUR WORKFLOW

#### COMMON USE CASES

Signal Services

Telegram / Discord  
Notifications

Custom Dashboards  
& Websites

API Trading  
Systems

Trade Copiers  
& Automation

#### BEST PRACTICES

- ☒ Use AI Filter and Market Dominance to improve signal quality.
- ☒ Keep your MT5 terminal connected for reliable alerts.
- ☒ Test your workflow in demo before using on live accounts.
- ☒ Always validate external integrations before going live.

#### KEY TAKEAWAY

Atomic Analyst gives you the signal and the market context. Alerts and Signal Export help you deliver and integrate those signals in the way that fits your workflow.

### OPTIONAL AUTOMATION PATH

#### ATOMIC ANALYST + SMART UNIVERSAL EA

Atomic Analyst can be combined with Smart Universal Expert Advisor to create an optional automation path.

Atomic Analyst provides the signal, levels and market context. Smart Universal EA can read this information and execute trades automatically based on your configuration.

#### IMPORTANT

Automation does not replace risk management. You remain responsible for settings, testing, and final configuration.

#### HOW THE INTEGRATION WORKS

- ✓ Atomic Analyst writes signal information to a file or variable.
- ✓ Smart Universal EA reads the data in real time.
- ✓ EA validates the signal with its own filters and risk rules.
- ✓ If approved, EA opens a trade and manages it automatically.
- ✓ All settings are fully customizable.

#### COMPATIBILITY

- ✓ MetaTrader 5 (64-bit)
- ✓ Smart Universal EA
- ✓ Atomic Analyst V81
- ✓ VPS Recommended

#### AUTOMATION WORKFLOW OVERVIEW

#### SYSTEM ARCHITECTURE

#### SMART UNIVERSAL EA KEY FEATURES

- Multi-asset and multi-timeframe support
- Advanced money management
- Trailing stop, break-even, partial close
- News filter and spread filter
- Recovery and safety systems
- Detailed real-time reporting

#### EXAMPLE AUTOMATION SETTINGS

You define the risk

You monitor the results

You decide the direction

#### YOU STAY IN CONTROL

**ATOMIC ANALYST**

Atomic Analyst finds opportunities. Smart Universal EA executes the plan. You control the journey. **This is intelligent automation.**

Automation involves risk. Past performance is not indicative of future results. Always test thoroughly and trade responsibly.

For more information about Smart Universal EA, visit its product page on [MQL5](#).

## CUSTOMIZING YOUR VIEW FOCUS ON WHAT MATTERS

Atomic Analyst V81 allows you to customize what you see on the panel. Enable or disable sections based on your trading style and screen space.

- 1 SHOW / HIDE SECTIONS**  
Turn any panel section ON or OFF. Focus only on the data you use.
- 2 COMPACT MODE**  
Enable Compact Mode to reduce panel size and keep your chart clean and uncluttered.
- 3 ADJUST PANEL SIZE**  
Resize the panel width and height for the perfect fit on your screen.
- 4 COLOR THEMES**  
Choose the theme that suits your preference and reduces eye strain.
- 5 SAVE YOUR LAYOUT**  
Save your preferred layout and load it anytime with one click.

### TIP

Customize the panel to match your workflow. A clean and focused layout helps you make faster and better decisions.

### BEST PRACTICE

Start with a clean layout. Add more data as you gain experience and understand what works best for your trading style.

### REMEMBER

The goal is clarity, not complexity. Use the panel to remove noise and focus on high-probability opportunities.

## DECISION WORKFLOW HOW TO USE IN REAL MARKETS

Follow this simple workflow to turn signals and AI insights into better trading decisions.  
Discipline + Process = Consistency.

**1 CHECK THE SIGNAL**  
Review the active signal ticket.  
Confirm direction, entry, SL and TP levels.

**2 CHECK AI VERDICT**  
Look at the AI decision and confidence.  
Make sure the market bias supports the signal direction.

**3 REVIEW KEY EVIDENCE**  
Scan the Atomic Evidence Matrix,  
Market Dominance and Indicator  
Consensus for alignment.

**4 MANAGE THE TRADE**  
Use the TP levels for scaling out.  
Move SL to breakeven and lock profits  
as the trade progresses.

**5 REVIEW & IMPROVE**  
Review your results in the Statistics  
section. Learn and refine your process  
over time.

**TIP** Always align your trade with the AI Verdict and the broader market context. High probability setups lead to better results.

**BEST PRACTICE**  
Combine the signal engine with the AI panel.  
Let the engine find opportunities and the AI  
verify the environment.

**REMEMBER**  
No indicator is perfect. Manage risk,  
follow your plan and stay consistent.  
Discipline creates long-term success.

## UNDERSTANDING THE AI VERDICT STRENGTH

The AI Verdict Strength shows how strongly the market environment supports the current decision. It is based on the combined evidence from all panel components.

### VERY STRONG (80 – 100%)

All key factors are aligned.  
High probability environment.

### STRONG (60 – 79%)

Most factors are aligned.  
Good probability environment.

### MODERATE (40 – 59%)

Mixed signals in the market.  
Trade with caution and confirmation.

### WEAK (20 – 39%)

Many factors are not aligned.  
Avoid or wait for better conditions.

### VERY WEAK (0 – 19%)

Market environment is against your trade.  
High risk. Stay out.

### EQUITY CURVE (EXAMPLE)

### SESSION & MARKET CONTEXT

Session	Europe
Market Volume	High
Average Spread	1.2 pips
Liquidity	Good
Session Quality	High

### TIP

Use the AI Verdict Strength to gauge the quality of the setup. Stronger alignments lead to better results.

### BEST PRACTICE

Look for 60% or higher strength for execution. Combine with proper risk management and structured trade levels.

### REMEMBER

There is no perfect trade. The goal is high probability, not perfection.

# ATOMIC ANALYST V81

AI MARKET VERDICT ENGINE

USER MANUAL & QUICK START GUIDE

22  
PAGE

## PANEL LAYOUT OVERVIEW EVERY SECTION EXPLAINED

The AI Market Verdict Panel is built to give you a complete view of the market in one place. Each section plays a specific role in confirming whether the current signal is high quality.

- TOP STATUS BAR**  
Shows session, spread, connection and key real-time market conditions.
- AI DECISION CENTER**  
Displays the AI Verdict, confidence level and market bias for quick decision making.
- MTF RAIL**  
Multi-timeframe direction at a glance to confirm alignment across timeframes.
- EVIDENCE & DOMINANCE**  
AI Evidence Matrix and Market Dominance show the strength behind the verdict.
- INDICATOR CONSENSUS**  
See which indicators agree with the direction and the final consensus result.
- BOTTOM ANALYTICS**  
Statistics, equity curve, session data and active signal ticket for full transparency.
- CUSTOMIZATION**  
Control everything: visibility, layout, colors and panel behavior.

**TIP** Focus on the big picture. Use the panel to understand the market context before you execute any trade.

### BEST PRACTICE

Combine the signal engine with the AI panel. Align both for the highest probability setups and better risk management.

### REMEMBER

The panel is a tool, not a guarantee. Discipline, risk management and patience are the keys to consistent results.

## TROUBLESHOOTING & SUPPORT

Common issues and how to resolve them quickly.  
If you need additional help, contact support.

### COMMON ISSUES

#### PANEL NOT APPEARING

The panel does not show on the chart after attaching the indicator.

#### NO SIGNALS APPEAR

No buy or sell signals are printed on the chart.

#### PANEL SIZE ISSUES

The panel is too big, too small, or not fitting the chart properly.

#### ALERTS NOT WORKING

Alerts, notifications, or popups are not triggering.

#### DATA / CONNECTION ISSUES

Market data not updating, connection problems or latency.

#### SIGNAL EXPORT FILE NOT FOUND

Signal file is not created or cannot be located.

### SOLUTIONS

- ✓ Make sure the indicator is attached to the chart.
- ✓ Refresh the chart (Right click → Refresh).
- ✓ Go to MT5: View → Objects → Show All.
- ✓ Check panel mode and scale in the inputs.
- ✓ Restart MT5 if the issue persists.

- ✓ Market conditions may not meet the signal rules.
- ✓ Try another symbol or timeframe.
- ✓ Check AI Filter settings (may be filtering signals).
- ✓ Check spread status and session.

- ✓ Adjust Panel Scale in inputs.
- ✓ Use Compact, Standard, or Full mode.
- ✓ Resize the chart window.
- ✓ Check screen resolution and MT5 UI scale.

- ✓ Enable alerts in MT5 (Tools → Options → Alerts).
- ✓ Check "Allow WebRequest for listed URL" if using push.
- ✓ Verify sound file path if using custom sounds.
- ✓ Ensure alerts are enabled in indicator inputs.

- ✓ Check your internet connection.
- ✓ Ensure you are logged in to your broker.
- ✓ Try a different server.
- ✓ Restart MT5 and wait for data to load.

- ✓ Check the correct folder path in inputs.
- ✓ Ensure "Signal Export" is enabled.
- ✓ Write permissions are required.
- ✓ Refresh chart or restart MT5.

### SUPPORT

For product support and assistance, contact

**ISSAM KASSAS**  
through MQL5  
private message.

**MQL5**  
PRIVATE MESSAGE

### IMPORTANT NOTES

- ✓ Always keep your MT5 platform and data updated.
- ✓ Some features depend on broker conditions and symbol availability.
- ✓ Use on a demo account first to understand the behavior.
- ✓ Trading involves risk. Use proper risk management.

#### TIP

If the panel behaves differently after an update, reset to default settings and reapply.

#### BEST PRACTICE

Use the official recommended settings for your trading style.  
Consistency and testing lead to better results.

#### REMEMBER

The AI panel is a decision-support tool.  
You are always responsible for your trading decisions.

## TROUBLESHOOTING & SUPPORT

Most issues can be solved quickly. Follow the steps below to get Atomic Analyst running at its best.

### QUICK CHECKLIST

- ✓ MT5 platform updated
- ✓ Internet connection stable
- ✓ Indicator attached to chart
- ✓ DLL permissions enabled
- ✓ All settings configured
- ✓ Broker supports required data

## USEFUL TOOLS

**Control Rail**  
Adjust settings & behavior

**Atomic Filter**  
Filter low-quality signals

**Evidence Matrix**  
See supporting evidence

**Market Dominance**  
Understand market strength

**MTF Rail**  
Check multi-timeframe direction

### IMPORTANT REMINDERS

- Atomic Analyst is a tool. You are responsible for your decisions.
- Always use proper risk management.
- Past performance is not indicative of future results.
- Test settings on a demo account first.
- Use only with brokers that provide reliable data.

### SYSTEM REQUIREMENTS

- ✓ Platform: MetaTrader 5 (Build 3000+)
- ✓ OS: Windows 10 / 11 (64-bit)
- ✓ RAM: 4GB or higher recommended
- ✓ Internet: Stable connection
- ✓ Disk Space: 200MB free space
- ✓ Permissions: DLL imports allowed

### RECOMMENDED SETUP

- ✓ Use a VPS for 24/7 stability
- ✓ Low latency to broker server
- ✓ Keep MT5 and OS updated
- ✓ Backup your settings regularly

### BEFORE CONTACTING SUPPORT

- ✓ Check this troubleshooting guide
- ✓ Review the user manual sections
- ✓ Try on a demo account
- ✓ Collect logs if the issue continues

This helps us solve your issue faster and efficiently.
