

EA COPY TRADE USER GUIDE

How to Install

- 1 Install two MetaTrader platforms on one computer: one as the Master and one as the Slave.
- 2 Install **MASTER EA (master.ex5)** on the Master terminal and **SLAVE EA (client.ex5)** on the Slave terminal.
- 3 Attach the EA to the appropriate chart and enable AutoTrading.
- 4 All transactions opened, modified, and closed on the Master account will automatically be copied to the Slave account.

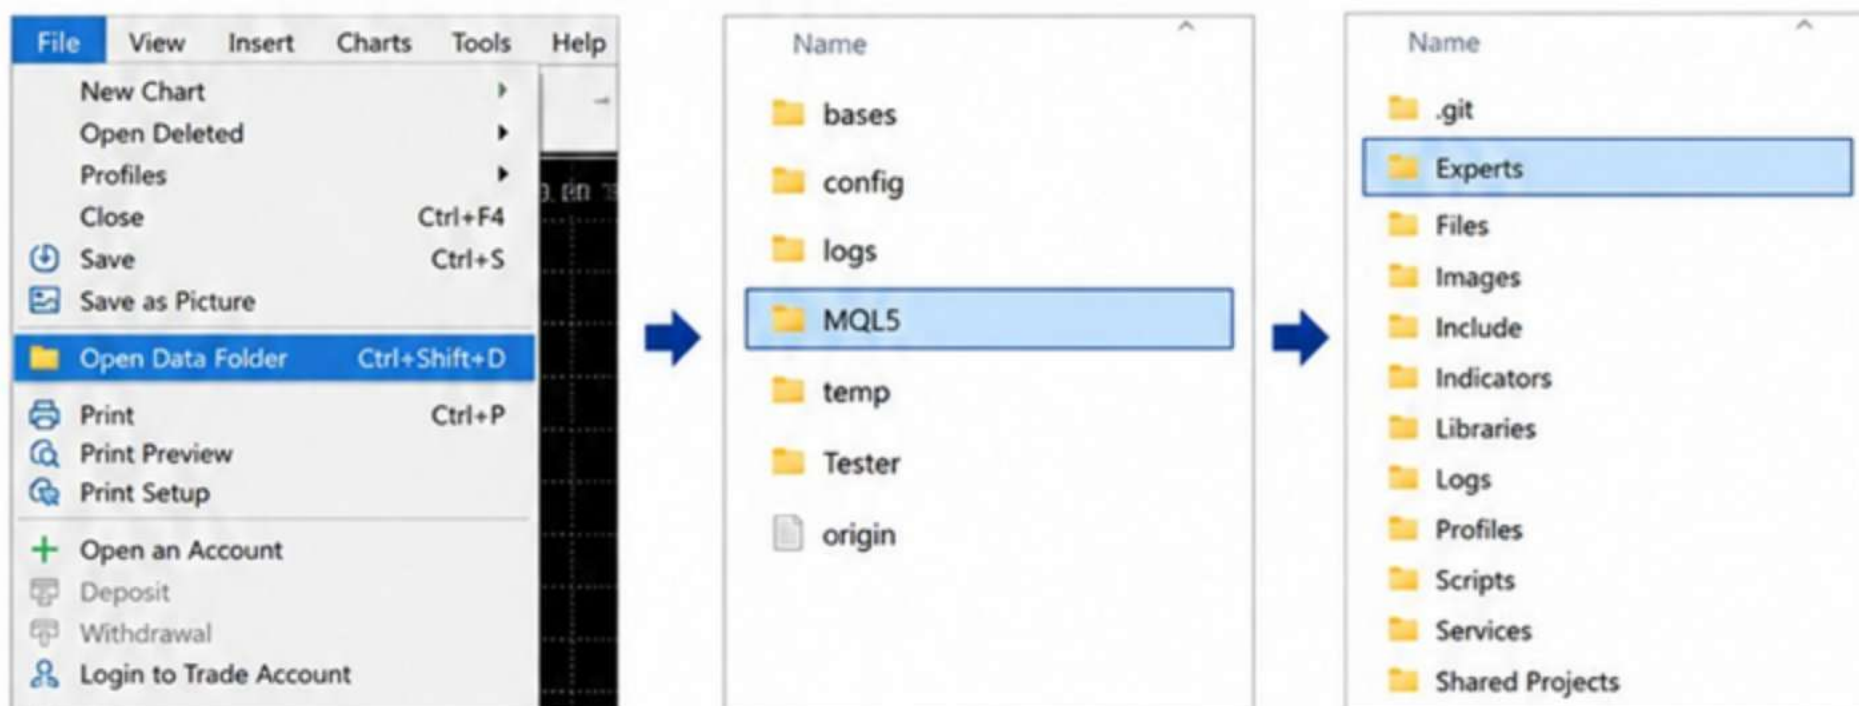

Input Parameters

Parameter	Description
InpReadIntervalMs	Interval (milliseconds) for the Slave EA to read data from the Master. Lower values provide faster copying but increase CPU usage.
InpReverseMode	Reverse trading direction. BUY becomes SELL and SELL becomes BUY.
InpCopyCurrentTrades	Copy currently open trades when the Slave EA starts.
InpLotMode	Lot calculation method. 'Percentage of Master Lot' means the Slave lot size is based on the master's lot.
InpFixedLot	Use a fixed lot size when Fixed Lot mode is selected.
InpLotPercent	Percentage of the Master lot to use.
InpMaxLot	Maximum lot size allowed.
InpMinLot	Minimum lot size allowed.
InpSymbolSuffix	Automatically detect or specify broker symbol suffix.
InpSymbolPrefix	Automatically detect or specify broker symbol prefix.
Symbol Map	Manual symbol mapping for brokers with different symbol names.
InpCopySL	Copy Stop Loss from Master.
InpCopyTP	Copy Take Profit from Master.
InpSlippage	Maximum allowed slippage during order execution.
InpCloseOnMasterClose	Automatically close Slave trades when the corresponding Master trade closes.
InpShowPanel	Show or hide the information panel.
Panel Background Color	Background color of the EA panel.
Text Color	Text color of the EA panel.

HOW TO INSTALL AN EA ON METATRADER 5

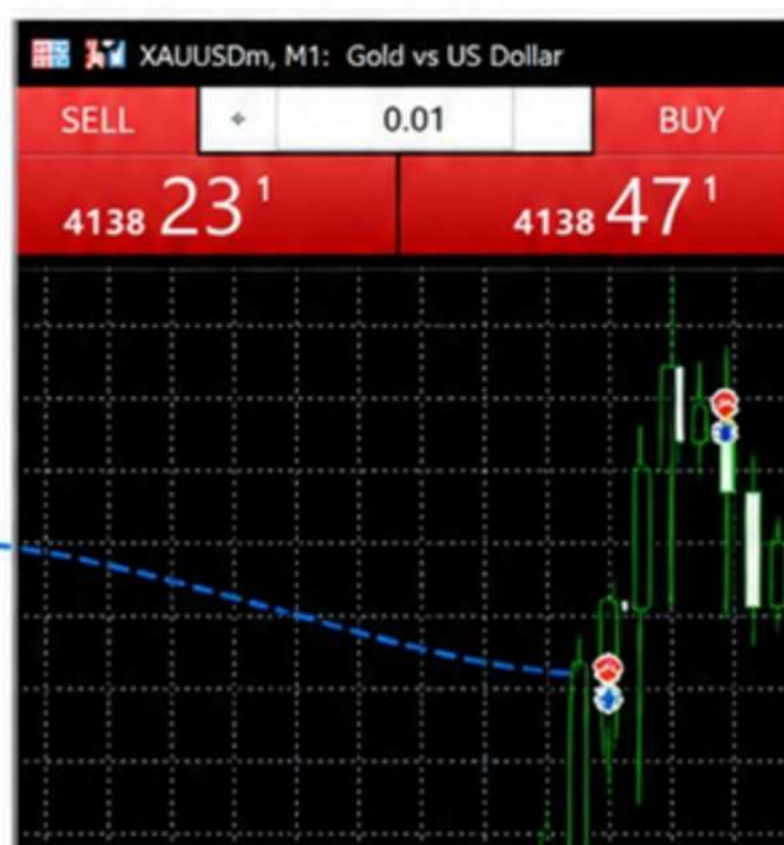

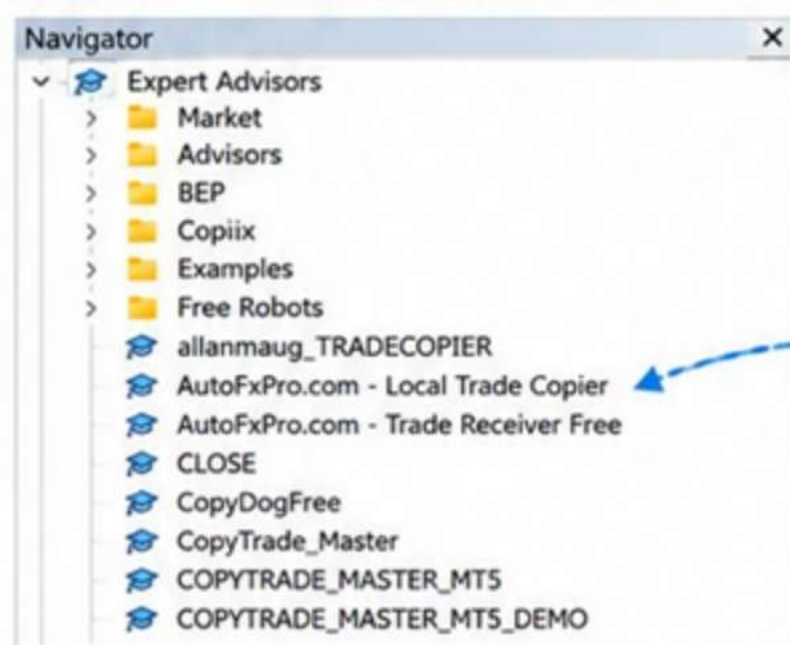

1 Copy and paste the EA file into the following Experts folder:

Click the **File** menu in the upper-left corner of MetaTrader, then select **"Open Data Folder"**. Open the **MQL5** folder, then open the **Experts** folder.

2 Restart MetaTrader, then press Ctrl + N to display the Navigator window.

Next, drag the EA from the Expert Advisors folder on the left panel onto the chart.

3 Enable Algo Trading

Open the **Common** tab in the EA properties window and check **"Allow Algo Trading"**

Important:

Make sure the Algo Trading button on the toolbar is green. If it is red, click it to enable Algo Trading.
