

Scan markets. Compare evidence. Focus on the strongest current setup.

Meet the Axiom Matrix Dashboard

Your scanner, evidence panel, and market overview in one place.

The dashboard brings the strongest setup, supporting evidence, and multi-timeframe scanner into one clean visual workspace.

01 • Best Axiom Pick

Shows the strongest current setup selected by Axiom Matrix, including symbol, timeframe, direction, and confidence.

02 • Evidence Engines

The side panels group trend, volume, volatility, momentum, support/resistance, and market-quality evidence.

06 • Mode & Refresh

Use the mode button to change the panel view, and Refresh to update the scanner display when needed.

03 • Axiom Engine

Summarizes the broader market picture through alignment, pressure, momentum, volume, and sentiment readings.

04 • Market Scanner

Compares symbols and timeframes in one matrix so you can quickly spot BUY, SELL, WAIT, and NO DATA conditions.

05 • Axiom AI

Controls the intelligent filtering layer that helps focus attention on cleaner setup conditions.

Start with the Best Axiom Pick, then confirm the Matrix and supporting evidence before making your own trading decision.

For Chat Support and Questions Click Here.

Start with the Best Axiom Pick

The fastest way to focus on the strongest current setup.

Best Axiom Pick highlights the symbol, timeframe, direction, and confidence that Axiom Matrix currently ranks as the strongest qualified setup.

STRONG BUY SETUP

Axiom AI ON

01 • Symbol & Timeframe

Shows which market and timeframe Axiom Matrix is currently highlighting as the strongest focus area.

02 • Direction

Displays the current setup direction, such as STRONG BUY, BUY, STRONG SELL, SELL, or WAIT.

03 • Confidence

Shows how strongly the active evidence supports the current Matrix decision. It is not a guaranteed win rate.

04 • Setup & Axiom AI

The setup label summarizes the action context, while Axiom AI shows whether intelligent filtering is active.

Understand What Is Driving the Setup

Six evidence engines help explain the market picture behind the decision.

The engine panels group different types of market evidence so you can see whether trend, momentum, volume, volatility, support/resistance, and market quality agree or conflict.

Trend & Direction Engine	
Trend Test: BTCUSDm · M15 · REAL · CHART	
Moving Average	BEARISH
MACD	BEARISH
ADX / DMI	STRONG
Ichimoku Cloud	BEARISH
Parabolic SAR	BEARISH

01 · Trend & Direction Engine

Shows whether core directional tools are leaning bullish, bearish, strong, weak, or mixed.

Volume & Money Flow Engine	
Volume Test: BTCUSDm · M15 · REAL · CHART	
Volume	HIGH
OBV	BEARISH
VWAP	BEARISH
Acc/Dist	BEARISH
Chaikin Money Flow	BEARISH

02 · Volume & Money Flow Engine

Reviews participation and money-flow behavior to show whether volume evidence supports or weakens the setup.

Volatility & Range Engine	
Volatility Test: BTCUSDm · M15 · REAL · CHART	
Bollinger Bands	BREAKDOWN
ATR	HIGH
Keltner Channel	BREAKDOWN
Donchian Range	RANGE
Std. Deviation	EXPANDING

03 · Volatility & Range Engine

Helps identify whether the market is expanding, ranging, breaking down, or moving with unusual volatility.

Momentum / Oscillators Engine	
Momentum Test: BTCUSDm · M15 · REAL · CHART	
RSI	OVERSOLD
Stochastic	OVERSOLD
CCI	WEAK
Williams %R	OVERSOLD
ROC	NEGATIVE

04 · Momentum / Oscillators Engine

Checks oscillator conditions such as oversold, weak, negative, or supportive momentum states.

Support & Resistance Engine	
Support Test: BTCUSDm · M15 · REAL · CHART	
Pivot Points	BELOW PIVOT
Fib Retracement	SUPPORT
Fib Extension	OWN EXTENSION
Camarilla	BREAKDOWN
Fractals	BREAKDOWN

05 · Support & Resistance Engine

Shows how price is behaving around pivot, Fibonacci, Camarilla, fractal, and support/resistance areas.

Market Quality Engine	
Quality Test: BTCUSDm · M15 · REAL · CHART	
Spread Guard	OFF
Volatility State	LOW
Session Quality	ACTIVE
Liquidity Pulse	STRONG
Noise Filter	CLEAN

06 · Market Quality Engine

Checks whether conditions are clean enough to trust the setup, including spread, volatility, session quality, liquidity, and noise.

How to read the engines

Each engine is a group of evidence. One row alone should not control your decision. Look for agreement across several engines before trusting the setup.

Read the Pick

Check the Engines

Confirm the Chart

Use the evidence engines to understand why Axiom Matrix is leaning toward a setup, then confirm the full Matrix and chart context.

[For Chat Support and Questions Click Here.](#)

Read the Final Summary

Axiom Engine condenses the broader evidence into one clear market picture.

The Axiom Engine helps you understand whether the active evidence is aligned, pressured, mixed, or unclear before you rely on a setup.

Axiom Engine

Axiom Test: BTCUSDm · M15 · REAL · CHART

MTF Alignment	NO DATA
Trend Pressure	BEARISH
Momentum Force	NEUTRAL
Volume Pulse	BEARISH
Market Sentiment	BEARISH

Best Axiom Pick

EURUSDm | M1

STRONG BUY

Confidence 100%

- 01 · MTF Alignment

Shows whether multiple timeframes are supporting the same directional view or giving unclear information.
- 02 · Trend Pressure

Summarizes whether the broader trend evidence is leaning bullish, bearish, neutral, or mixed.
- 03 · Momentum Force

Helps show whether momentum is supporting the current setup or losing strength.
- 04 · Volume Pulse

Reviews whether volume and money-flow evidence are supporting or weakening the setup.
- 05 · Market Sentiment

Summarizes the final market tone after the active evidence has been reviewed together.

Confidence is evidence strength

Confidence shows how strongly the active evidence supports the current Matrix decision. It is not a guaranteed win rate, and it should not replace your own chart review or risk control.

Good interpretation

Evidence is strongly aligned.

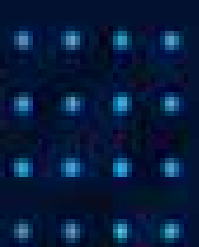

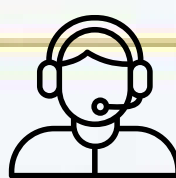

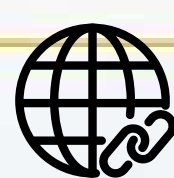

Wrong interpretation

This trade is guaranteed to win.

Use Axiom Engine and confidence together: they summarize evidence strength, but your final decision still needs chart confirmation and risk control.

Scan the Market at a Glance

The Matrix compares symbols and timeframes in one visual decision grid.

Each row represents a market, each column represents a timeframe, and each cell shows the current scanner state with its confidence level.

01 · Symbol Rows

Each row represents one scanned market from the active watchlist.

02 · Timeframe Columns

Each column shows the scanner result for a specific timeframe, from short-term to higher-timeframe views.

03 · Matrix Cells

Each cell combines the active evidence for one symbol and one timeframe.

04 · BUY / SELL / WAIT

The cell text shows the current scanner state: BUY, SELL, WAIT, or another visible condition.

05 · Confidence %

The percentage shows how strongly the active evidence supports that cell's current decision.

06 · NO DATA

NO DATA means the scanner does not currently have enough valid information for that market and timeframe.

Matrix states

BUY —

Evidence is leaning bullish.

SELL —

Evidence is leaning bearish.

WAIT —

Conditions are mixed or not clear enough.

NO DATA —

Not enough valid information is available.

Important

The Matrix helps you compare markets quickly. A strong cell is a focus point, not an automatic command to trade. Always confirm the chart and manage risk before acting.

1. Compare Symbols
Scan across your watchlist.

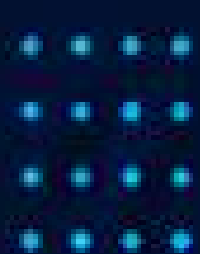

2. Check Timeframes
See how evidence shifts across time.

3. Open the Chart
Open the chart to review the setup in detail.

Use the Matrix to compare many symbols and timeframes quickly, then focus only on setups that deserve deeper chart review.

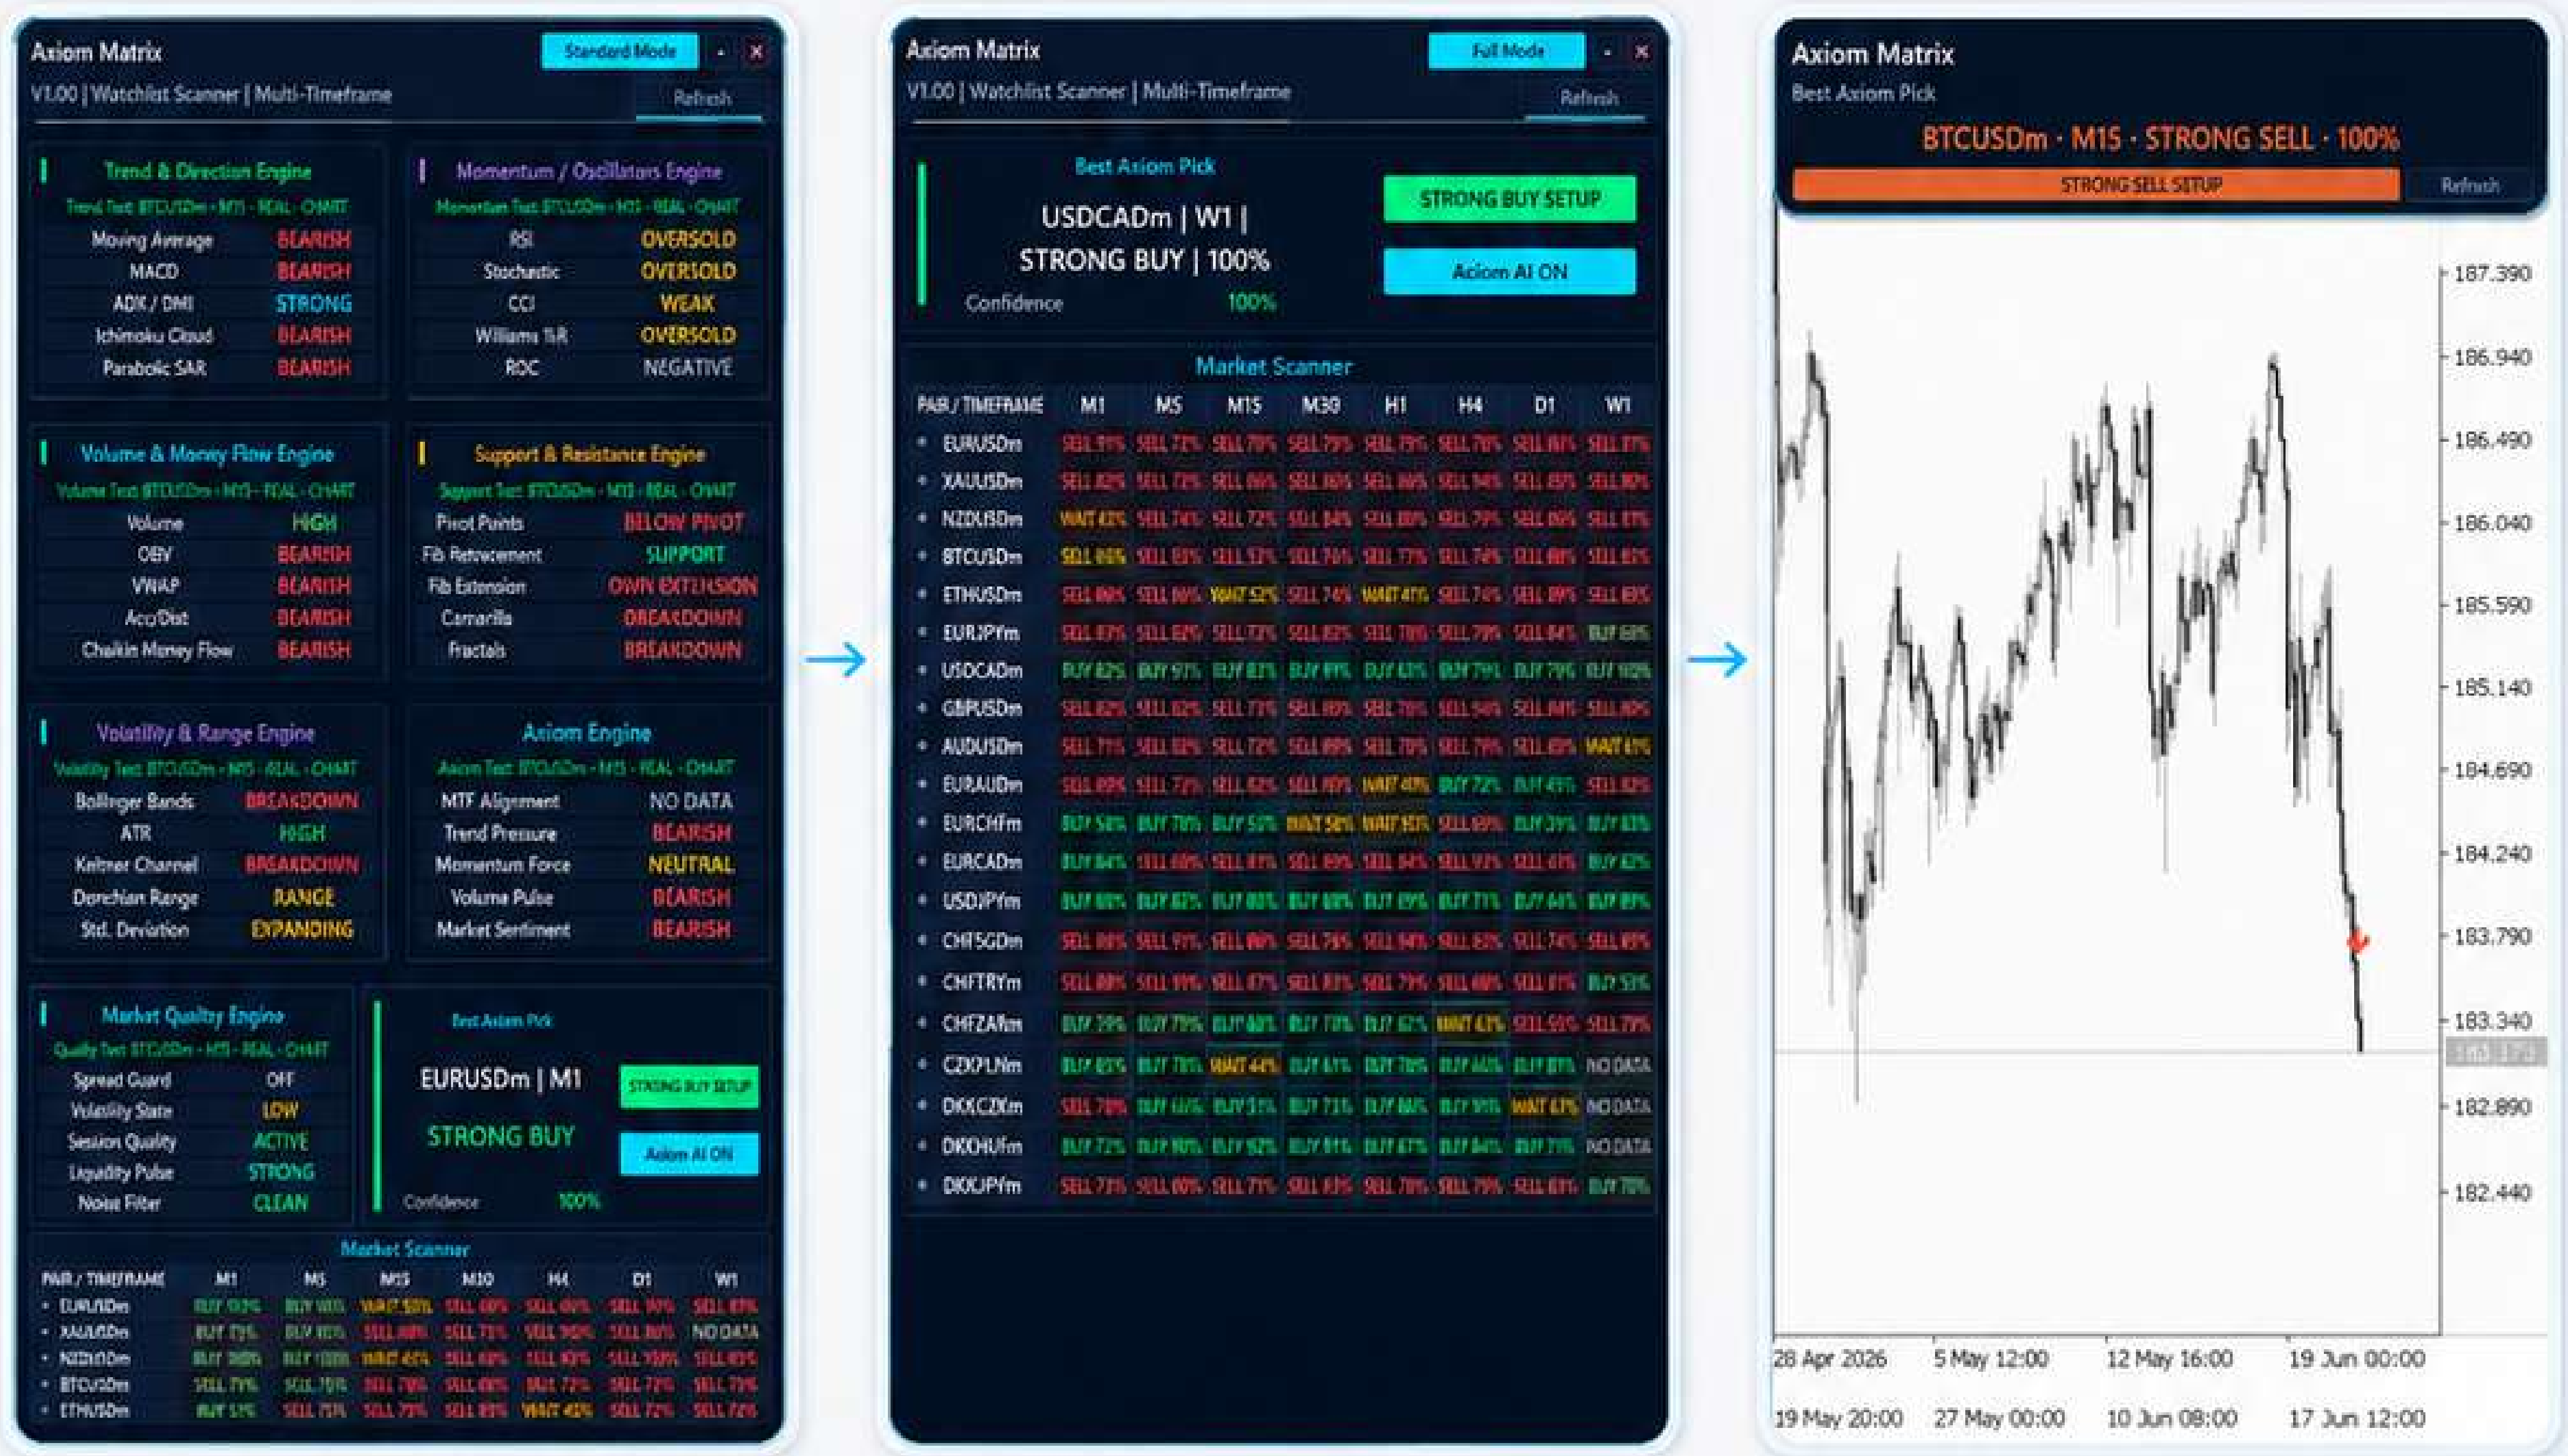

For Chat Support and Questions Click Here.

Switch Views and Move to the Chart

Use the scanner view to find the setup, then open the chart context.

Axiom Matrix lets you move between dashboard, scanner, and chart-focused views so you can compare opportunities and inspect the selected setup.

01 · Standard Mode

Use Standard Mode when you want the full dashboard picture: Best Axiom Pick, evidence engines, Axiom Engine, and the Matrix together.

02 · Full Mode

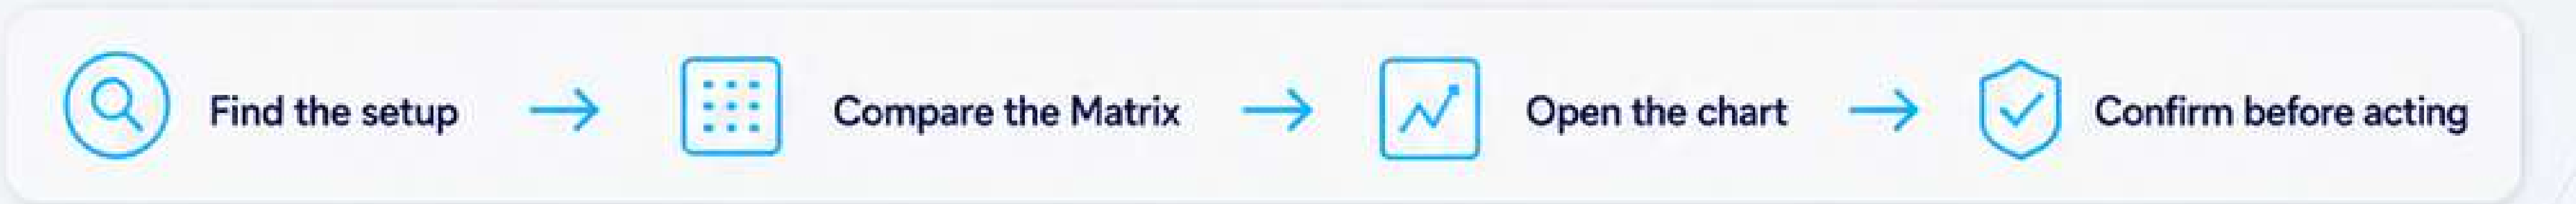

Use Full Mode when you want a larger scanner view for comparing many symbols and timeframes quickly.

03 · Chart Context

Move from the scanner to the chart to review price action, the setup strip, and any visible chart arrow before acting.

04 · Refresh

Use Refresh when you want to update the visible scanner display after market movement or view changes.

Important

Changing views helps you inspect the setup from different angles. It does not confirm a trade by itself. Always review the chart and manage risk before making a decision.

Use Standard Mode for the full evidence picture, Full Mode for scanner comparison, and the chart view for final context.

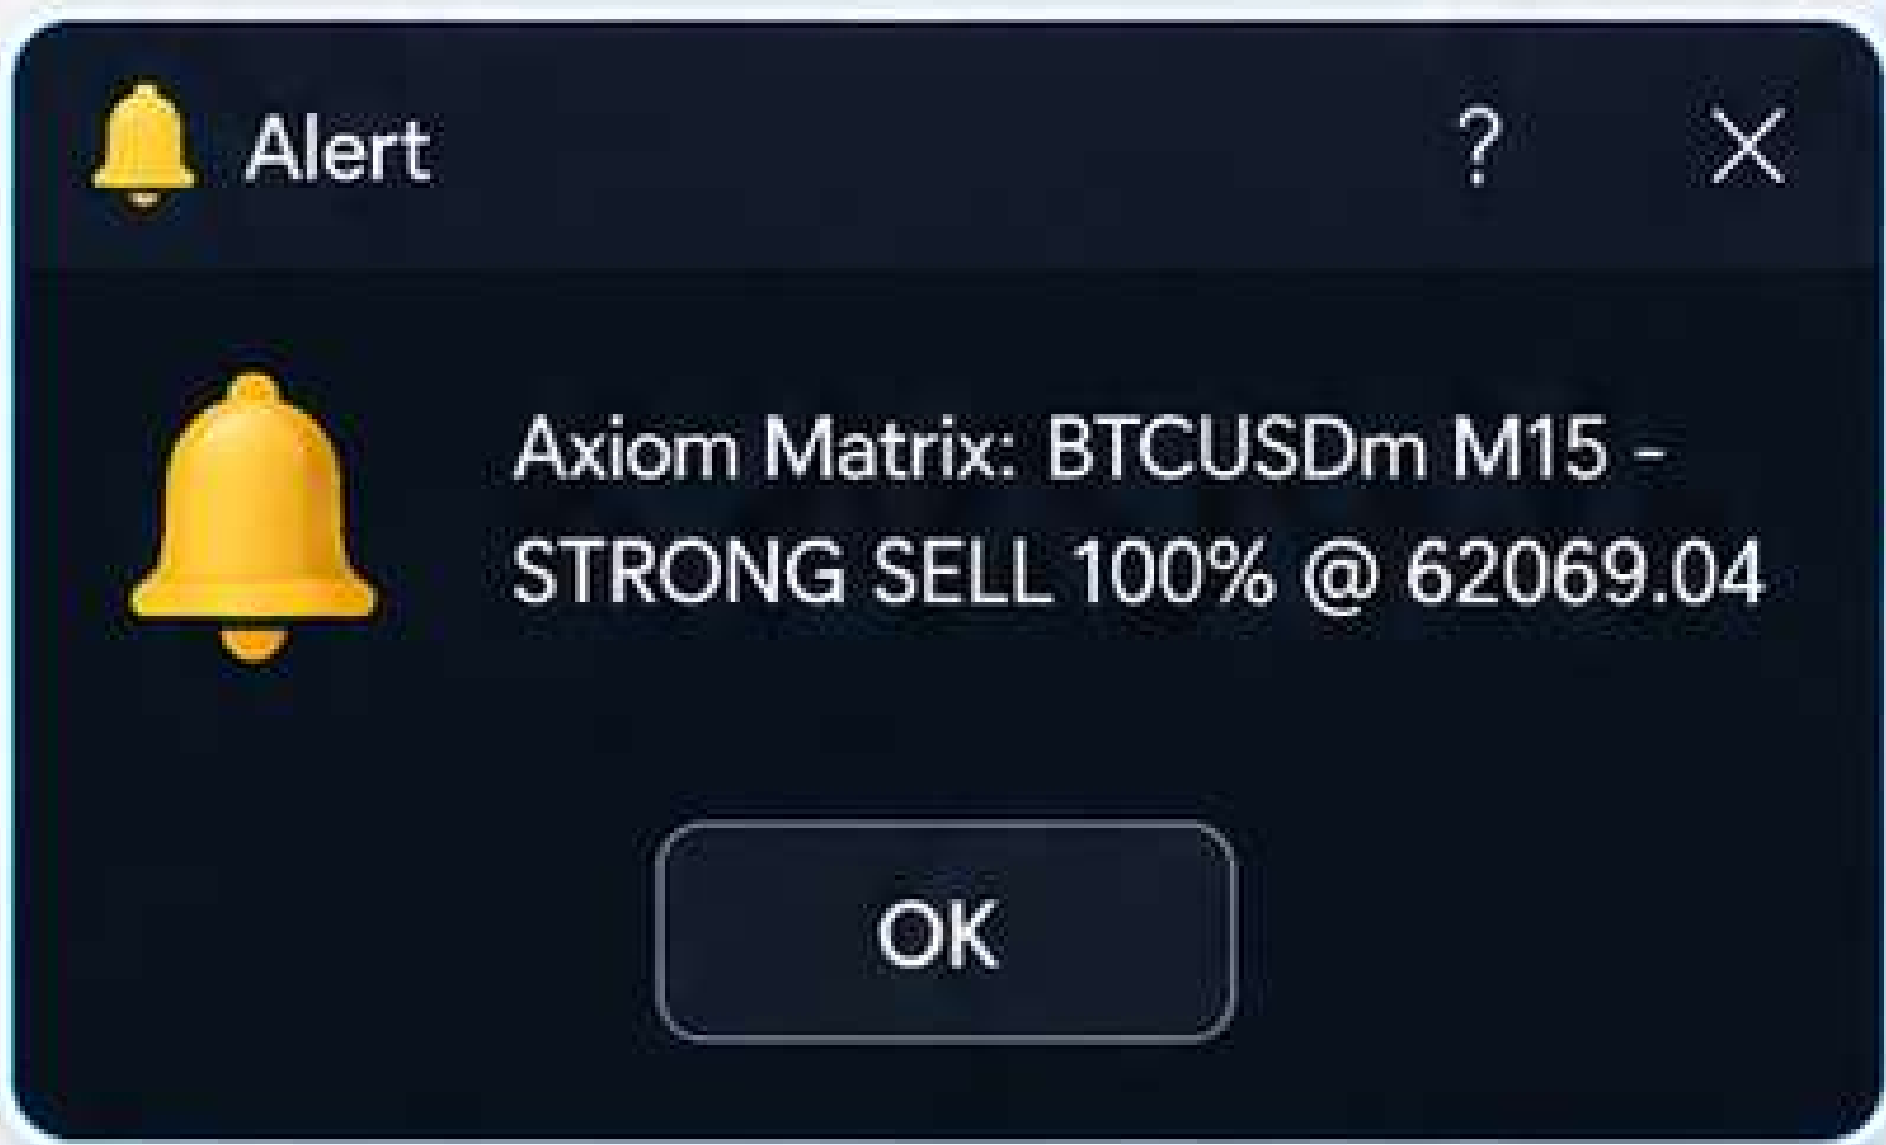

For Chat Support and Questions Click Here.

Stay Informed When a Strong Setup Appears

Alerts and chart arrows help you notice important scanner events.

When Axiom Matrix detects a strong qualified setup, alerts and arrows help bring your attention to the symbol, timeframe, direction, and chart context.

01 · Alert Notification

A popup alert appears when Axiom Matrix detects a strong qualified setup that matches your alert settings.

02 · Chart Context

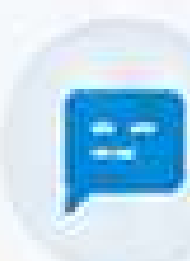

Open the chart to review price action, the setup strip, and the arrow that highlights the setup context on the chart.

01 · Terminal Alert

A popup alert can appear when Axiom Matrix detects a strong qualified setup that matches the alert settings.

02 · Alert Message

The message summarizes the symbol, timeframe, direction, confidence, and price area so you know what needs review.

03 · Chart Arrow

A chart arrow helps mark where the setup appears on the active chart, making the signal easier to locate visually.

04 · Review Context

Use the alert as a starting point, then review price action, Matrix evidence, confidence, and risk before making a decision.

What the alert is telling you

**BTCUSDm**
Symbol
The market to review.

**M15**
Timeframe
Where the setup appeared.

**STRONG SELL**
Direction
STRONG BUY or STRONG SELL context.

**100%**
Confidence
Evidence strength, not guaranteed win rate.

**@ 62069.04**
Price
The approximate alert price area.

Important

Alerts and chart arrows are awareness tools. They help you notice a setup, but they do not confirm a trade by themselves. Always review the chart, the Matrix, and your risk before acting.

Receive Alert

Open Chart

Confirm Setup

Use alerts and arrows to notice strong setups faster, then confirm the full chart and Matrix context before making your decision.

OK

01 · Check Best Axiom Pick

Start with the strongest current setup that Axiom Matrix is highlighting. Note the symbol, timeframe, direction, and confidence.

02 · Confirm the Matrix

Look across the Market Scanner to see whether the same symbol and related timeframes show supportive alignment or mixed conditions.

03 · Review the Evidence

Check the evidence engines to understand what is supporting or weakening the setup before relying on it.

04 · Read Confidence Correctly

Treat confidence as evidence strength, not as a guaranteed win rate or automatic trading instruction.

05 · Open the Chart

Move to the relevant chart and review price action, structure, volatility, and the active setup context.

06 · Use Alerts and Arrows as Support

Use alerts and chart arrows to notice strong setups faster, but always confirm the context yourself.

07 · Make Your Own Decision

Axiom Matrix helps focus your attention. Your final trade decision, risk control, and execution remain your responsibility.

Three rules to remember

1. Scan first

Use the Matrix to compare markets quickly.

2. Confirm second

Check evidence, confidence, and chart context.

3. Decide responsibly

The dashboard supports your decision; it does not replace it.

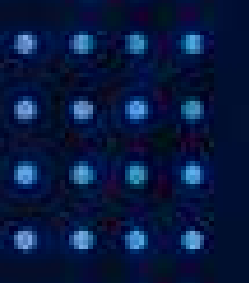

Important

Axiom Matrix is a scanner and decision-support dashboard. It helps you organize evidence and focus attention, but it does not guarantee outcomes or remove the need for chart review and risk management.

Understand the dashboard. Follow the evidence. Confirm the chart. Decide with discipline.

Use Axiom Matrix to find focus, compare evidence, confirm the chart, and make a disciplined final decision.

Use Axiom Matrix with Smart Trend Trading System

Let Axiom Matrix find the opportunity, then use Smart Trend Trading System to refine the entry.

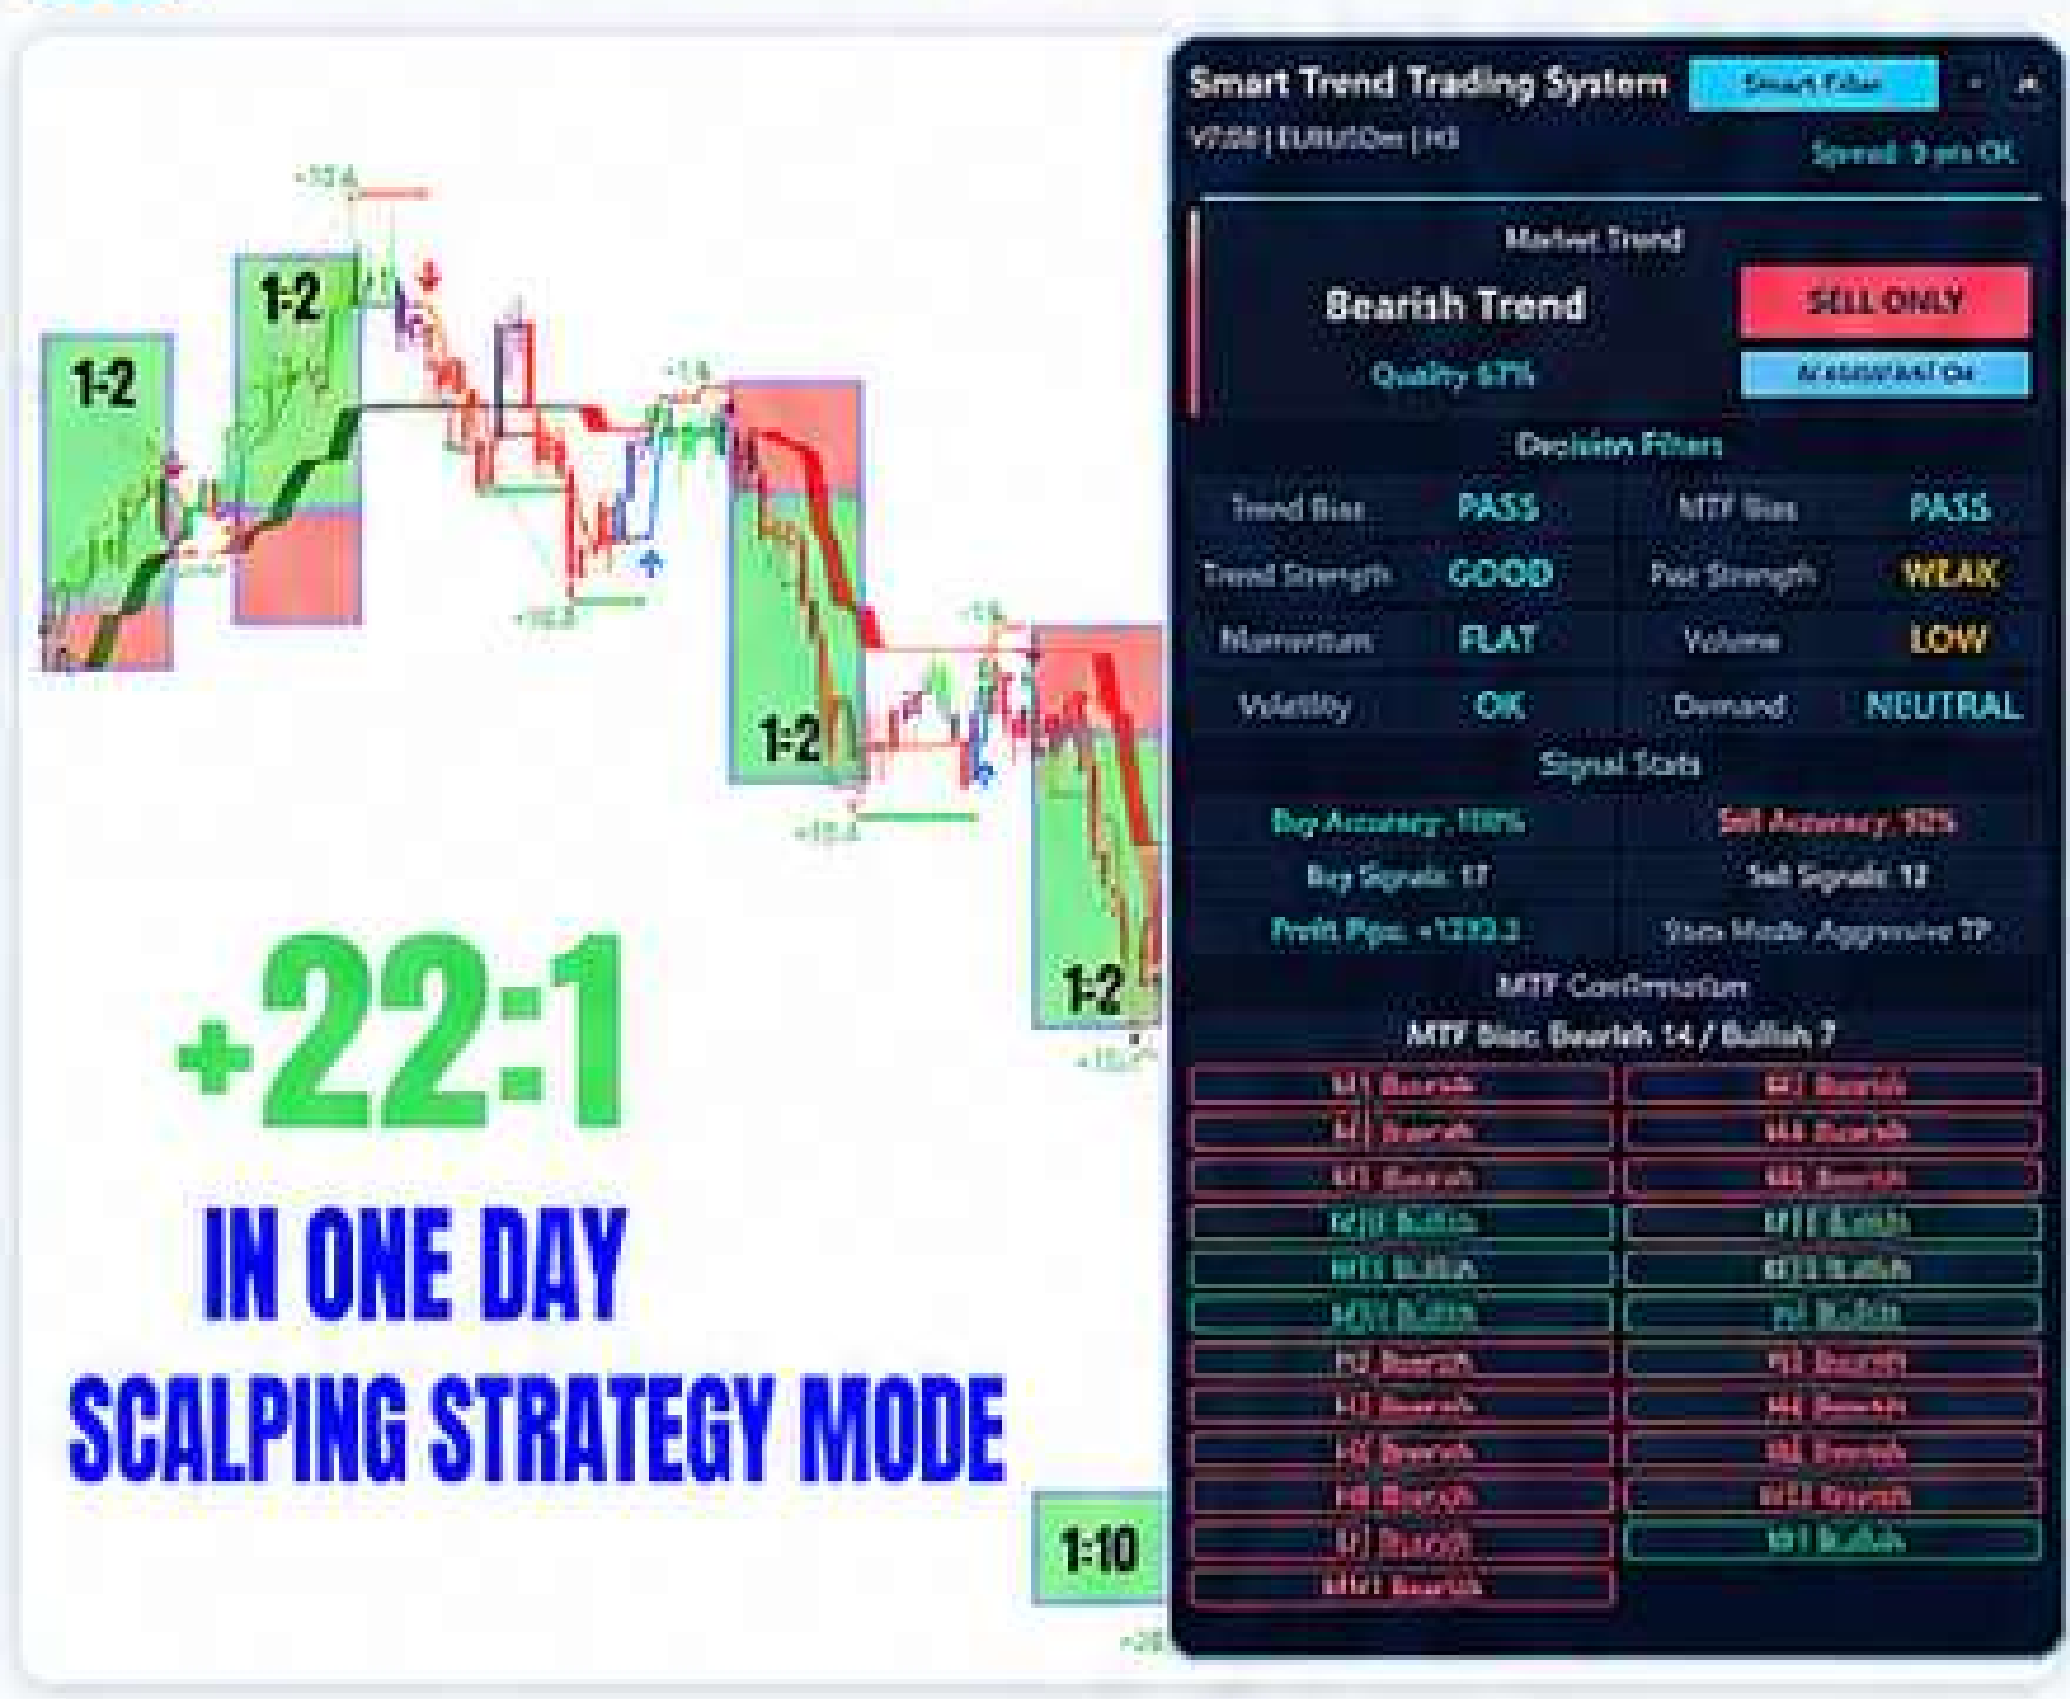

Axiom Matrix scans the market for strong opportunities across many symbols and timeframes, while Smart Trend Trading System helps you focus on the actual buy or sell entry after the signal is found.

01 · Axiom Matrix scans the market

Scans many symbols and timeframes automatically and highlights the strongest opportunities.

02 · Smart Trend Trading System refines the entry

Once Axiom Matrix finds the opportunity, use Smart Trend Trading System to inspect the chart and refine the buy or sell entry.

Why this combination matters

Without a scanner, reviewing many symbols across many timeframes manually is slow and exhausting. Axiom Matrix does that heavy work in the background from one chart and highlights the strongest opportunities. Once the signal is found, Smart Trend Trading System helps the trader focus on the actual buy or sell entry.

20
symbols

21
timeframes

Hundreds
of chart checks
avoided

How to combine them

01 · Let Axiom Matrix scan

Use Axiom Matrix to scan the Market Watch automatically and look for the strongest available setup.

02 · Wait for a strong signal

Focus only when Axiom Matrix highlights a strong buy or strong sell opportunity and sends your attention to a specific symbol and timeframe.

03 · Open Smart Trend Trading System

Go to the same symbol and timeframe in Smart Trend Trading System after the Axiom Matrix opportunity is identified.

04 · Look for the entry

Use Smart Trend Trading System to help identify the actual buy or sell timing within the direction already highlighted by Axiom Matrix.

05 · Make the final decision

Confirm the chart context and manage risk before taking the trade.

What each tool does

Axiom Matrix

- scans many markets
- detects strong opportunities
- saves time
- sends focus to the best setup

Smart Trend Trading System

- helps inspect the selected chart
- helps refine the entry
- helps identify buy or sell timing
- works after the opportunity is found

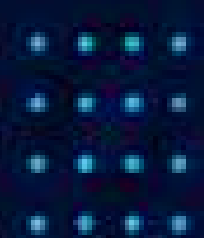

Important

Axiom Matrix helps you find the trade opportunity. Smart Trend Trading System helps you review the entry. Neither tool removes the need for chart confirmation, discipline, or risk management.

Use Axiom Matrix to scan the market efficiently,
then use Smart Trend Trading System to refine the entry on the selected setup.

Use Axiom Matrix with Atomic Analyst

Let Axiom Matrix find the opportunity, then use Atomic Analyst to confirm the setup and plan the trade.

Axiom Matrix scans the market for strong opportunities across many symbols and timeframes, while Atomic Analyst helps you review the selected chart, wait for the right condition, and identify stop loss and take profit levels.

01 · Axiom Matrix scans the market

Axiom Matrix acts as the radar scanner that finds the strongest opportunities from one chart.

02 · Atomic Analyst confirms and plans the trade

Atomic Analyst shows the selected chart with clear stop loss and multiple take profit levels for trade planning.

Why this combination matters

Without a scanner, reviewing many symbols across many timeframes manually is slow and exhausting. Axiom Matrix does the heavy work in the background from one chart and highlights the strongest opportunities. Once the opportunity is found, Atomic Analyst helps review the chart, wait for the right condition, and see practical stop loss and take profit levels.

20
symbols

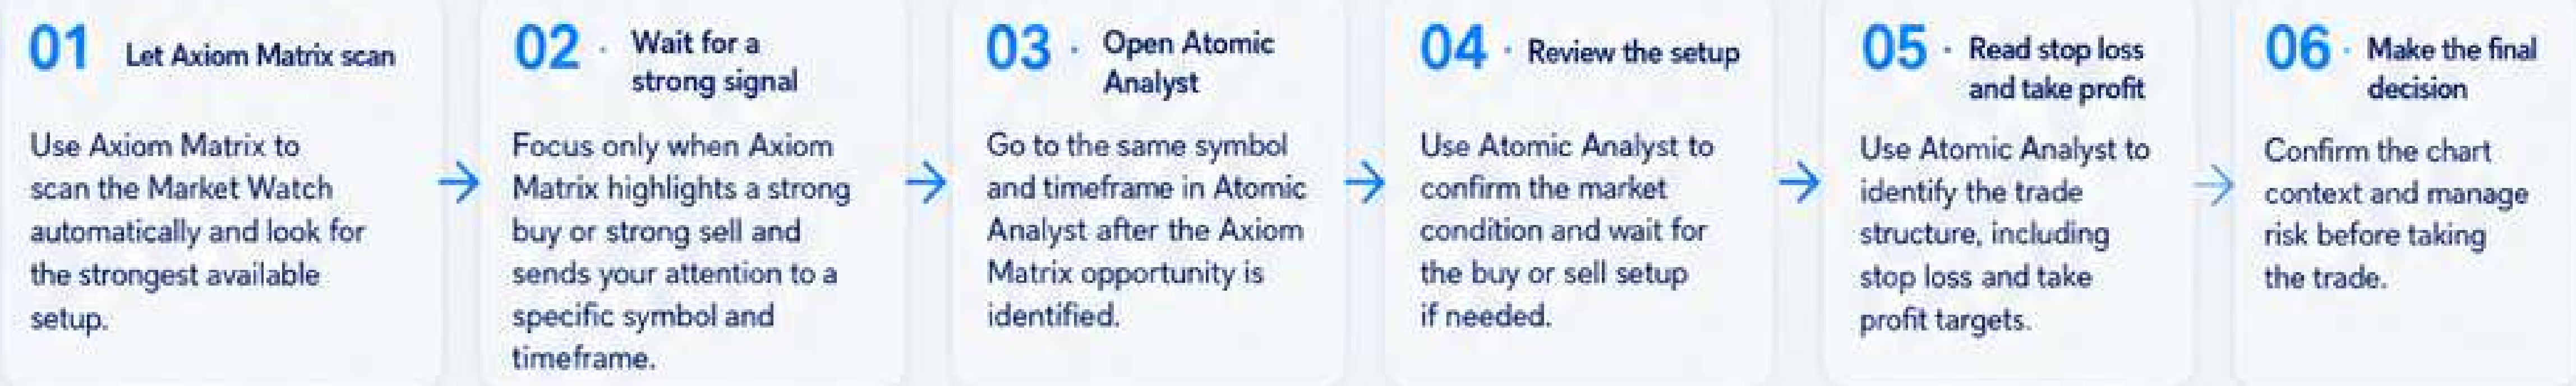

21
timeframes

Hundreds
of chart checks
avoided

How to combine them

What each tool does

Axiom Matrix

- ✓ scans many markets
- ✓ detects strong opportunities
- ✓ saves time
- ✓ sends focus to the best setup

Atomic Analyst

- ✓ helps inspect the selected chart
- ✓ helps confirm or wait for the setup
- ✓ shows stop loss
- ✓ shows take profit levels
- ✓ works after the opportunity is found

Extra confirmation from alerts

If alerts are enabled, you may sometimes receive both an Axiom Matrix alert and an Atomic Analyst alert for the same market direction. When both tools align, this can add confidence to the setup review — but chart confirmation and risk management are still required.

Important

Axiom Matrix helps you find the opportunity. Atomic Analyst helps you review and plan the trade. Neither tool removes the need for chart confirmation, discipline, or risk management.

Use Axiom Matrix to scan the market efficiently, then use Atomic Analyst to confirm the setup and plan the trade with stop loss and take profit levels.
