

ATOMIC ANALYST

Manual Trading Decision & Trade-Structuring Indicator

Atomic Analyst is a non-repainting, non-redrawing, and non-lagging MT5 indicator designed to help traders read market direction, filter weak setups, and plan trades with structured stop-loss and take-profit levels.

What Atomic Analyst Helps You Do

Read market direction clearly

Filter weak setups and reduce noise

Review market sentiment and multi-timeframe bias

Identify stop loss and up to 5 take-profit levels

Trade manually or connect with Smart Universal EA

Main Trading Uses

Scalping & Intraday Trading

Clear signals, fast chart reading, structured entry and exit zones.

Day Trading & Swing Support

Helps follow broader moves using trend, momentum, and direction.

Multi-Market Use

Suitable for forex pairs, gold, indices, and other liquid MT5 markets.

Recommended Use

Best Markets:
EURUSD, AUDUSD, XAUUSD, and other liquid markets

Recommended Timeframe:
H1

Recommended Account:
ECN or low-spread account

Non-Repainting

Multi-Timeframe Confirmation

Stop Loss + Up to 5 TP Levels

Alerts & Live Monitoring

Read the panel

confirm the setup

review SL/TP

manage the trade

HOW TO READ THE PANEL

Read the Verdict, Confirmation, and Trade Structure

Atomic Analyst turns market direction, filters, multi-timeframe confirmation, and trade structure into one compact decision panel.

- 01 **AI Atomic Decision**
This is the main verdict area showing the market trend and BUY ONLY or SELL ONLY.
- 02 **Quality %**
Shows how strongly current conditions support the active verdict.
- 03 **Atomic Controls**
Buttons to manage runtime options such as signal/filter mode, alert, theme/mode, and Hide All.
- 04 **Market Sentiment**
Displays bullish, wait, and bearish pressure in the current market.
- 05 **Atomic Filters**
Summarizes trend, momentum, RSI, MACD, moving average, stochastic, Bollinger, Fibonacci, Pivot Points, CCI, and more.
- 06 **Stats & Performance**
Shows tracked signal count and performance context. For reference only, not a promise of results.
- 07 **MTF Confirmation Grid**
Multi-timeframe bias and strength across major timeframes.

08 On-Chart Structure

Arrows, SL, and TP levels are plotted directly on the chart for clear trade planning.

Start with the Verdict

Read the AI Atomic Decision first. It tells you the current market direction and the authorized side (BUY ONLY or SELL ONLY).

Check Quality

Use Quality as confirmation strength, not certainty. Higher % = stronger support for the current verdict.

Review the Filters

See whether trend, momentum, volume, RSI, MACD, moving average, and other filters support the same direction.

Read Market Sentiment

Check if bullish, wait, or bearish pressure aligns with the verdict. Alignment increases confidence.

Check MTF Grid

Use the multi-timeframe boxes to confirm that higher and lower timeframes are on the same side.

Use the Chart Levels

Always review SL and TP levels on the chart before deciding your trade plan.

★ **Best reading sequence:** Verdict → Quality → Filters → Sentiment → MTF confirmation → SL/TP structure.

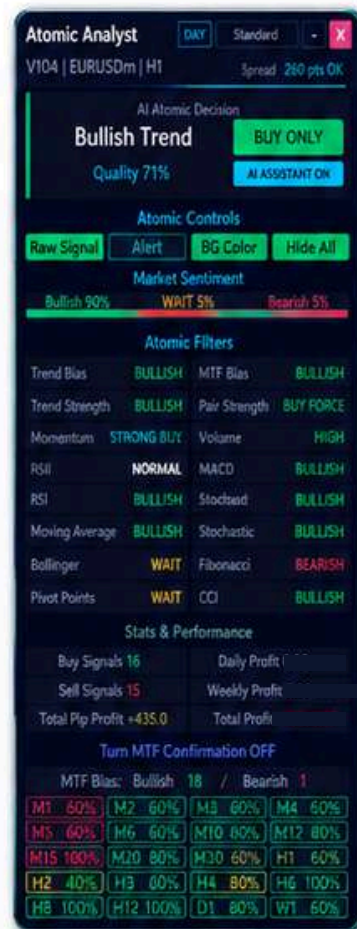

Read the verdict → confirm the setup → review SL/TP → decide with risk control

HOW TO USE IT FOR TRADES

Your Step-by-Step Trading Workflow

Atomic Analyst turns market analysis into a clear trading plan. Follow this workflow to evaluate the signal, confirm the setup, and manage the trade with discipline.

THE 8-STEP WORKFLOW

TRADE STRUCTURE ON CHART

TRADE MANAGEMENT OPTIONS

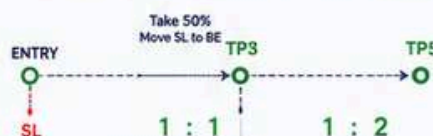

1 OPTION 1: TP5 ONLY (1:2 RRR)

Take profit at TP5 for a full 1:2 Risk to Reward ratio.

2 OPTION 2: TP3 + TP5 (1:1 & 1:2)

Take half profit at TP3 (1:1 RRR), move SL to BE, and let the rest run to TP5 (1:2 RRR).

EXAMPLES OF REAL TRADES

TIP: Use the panel for confirmation. The more elements aligned in your direction, the higher the probability setup. Always respect the SL level and manage your risk.

CONTROLS, FILTERS & CONFIRMATION

Customize Your Analysis and Filter the Market

Atomic Analyst gives you full control over how you analyze the market.

Use the controls, filters, sentiment, and MTF confirmation to improve your decision-making.

1 ATOMIC CONTROLS

Trend Filter

Alert

CUSTOM

Hide All

Trend Filter
Enable or disable the trend filter for cleaner signals.

Alert
Open alert settings for terminal, mobile, and email notifications.

CUSTOM / BG Color
Switch between Day, Night, Custom themes and change the background color.

Hide All
Hide all signals and levels from the chart for a clean view.

2 ATOMIC FILTERS GUIDE

Trend Bias	BEARISH	MTF Bias	BEARISH
Trend Strength	BEARISH	Pair Strength	SELL FORCE
Momentum	WEAK SELL	Volume	NORMAL
Volatility	NORMAL	Demand	BEARISH
RSI	BEARISH	MACD	WAIT
Moving Average	BULLISH	Stochastic	WAIT
Bollinger	BEARISH	Fibonacci	WAIT
Pivot Points	BEARISH	CCI	BEARISH

Atomic Filters analyze multiple market factors to confirm or reject the current setup.

BULLISH / BUY Pressure
BEARISH / SELL Pressure
WAIT / NEUTRAL
OFF / Not Active

3 MARKET SENTIMENT

Shows the current balance of bullish, neutral (wait), and bearish pressure in the market.

4 STATS & PERFORMANCE

Buy Signals	6	Daily Profit	
Sell Signals	4	Weekly Profit	
Total Pip Profit	+68300.0	Total Profit	

Tracks your signals and overall results.

Daily & Weekly performance overview.

Helps you review and improve.

5 MTF CONFIRMATION GRID

MTF Bias: Bullish 3 / Bearish 12

M1 80%	M2 40%	M3 40%	M4 80%
M5 80%	M6 60%	M10 40%	M12 60%
M15 60%	M20 80%	M30 60%	H1 80%
H2 100%	H3 80%	H4 60%	H6 60%
H8 60%	H12 80%	D1 80%	W1 60%

Shows the trend direction across multiple timeframes. The more green boxes in your direction, the stronger the confirmation.

Green
In your direction (confirmation)

Yellow
Neutral / Mixed (uncertain)

Red
Against your direction

TIP: Use all sections together. When Verdict, Sentiment, Filters, and MTF Confirmation align in the same direction, the probability setup becomes stronger and more reliable.

SETTINGS, MARKETS & BEST PRACTICES

Optimize Your Setup for Maximum Performance

Atomic Analyst works on multiple markets and timeframes.

Use the recommended settings, alerts, and best practices for consistent results.

1 DISPLAY & PANEL SETTINGS

Day / Night Mode

Switch between Day and Night themes for better visibility.

Compact / Standard

Compact for more chart space. Standard for full detailed view.

BG Color / Custom

Change the panel background color to your preference.

Hide All

Hide all signals, levels, and objects from the chart for a clean view.

Raw Signal / Trend Filter

Use Raw Signal for faster signals or Trend Filter for cleaner setups.

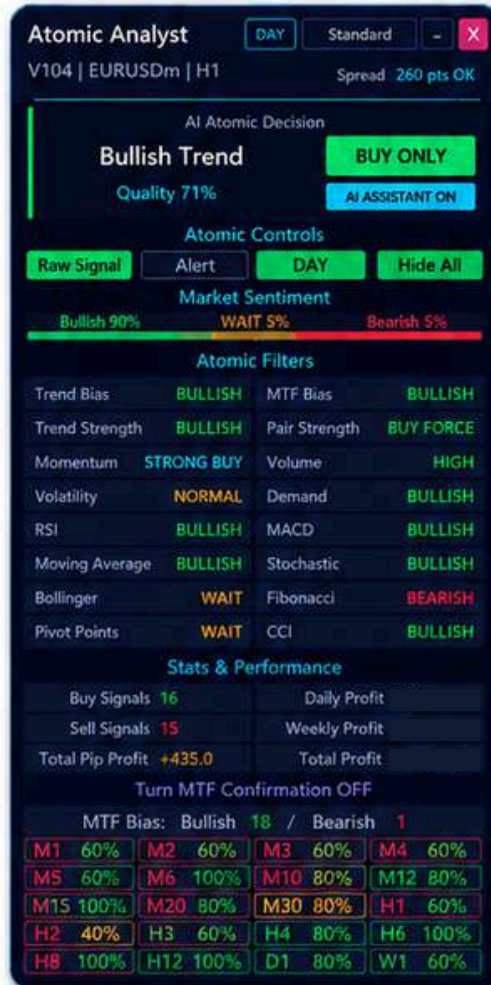

AI Filter

Enable AI Filter for advanced market quality confirmation.

Alert

Customize alerts for terminal, mobile, and email notifications.

2 ALERTS & NOTIFICATIONS

Alerts You Can Enable

Entry Signal

Notifies you when a Buy or Sell signal appears.

Take Profit 1 (TP1)

Alert when price reaches TP1 level (1:1 RR).

Take Profit 2 (TP2)

Alert when price reaches TP2 level (1:2 RR).

Stop Loss (SL)

Alert when price hits the Stop Loss level.

Trend Change

Alert on major trend direction changes.

Daily / Weekly Summary

Receive performance updates automatically.

Alert Channels

Terminal

Mobile

Email

3 RECOMMENDED MARKETS & TIMEFRAME

Best Markets

XAUUSD (Gold), EURUSD, AUDUSD, and other liquid pairs.

Recommended Timeframe

H1 (1 Hour) for best balance between accuracy and trade opportunities.

Account Type

ECN or Low Spread accounts recommended for better execution.

4 BEST PRACTICES

Wait for alignment:

Let Verdict, Sentiment, Filters, and MTF Confirmation agree.

Respect the SL:

Always use the SL level provided by Atomic Analyst.

Use TP levels correctly:

Either take profit at TP5 (1:2 RR) or use TP3 (1:1) + TP5 (1:2).

Risk 1% per trade:

Protect your capital and stay in the game long term.

Be patient:

Quality setups come less often, but they are much stronger.

Review performance:

Use the Statistics section to improve your strategy.

5 QUICK SETUP CHECKLIST

- ☐ Select your market (e.g., XAUUSD)
- ☐ Set timeframe to H1
- ☐ Choose Day or Night mode
- ☐ Enable Trend Filter
- ☐ Check Market Sentiment
- ☐ Review Atomic Filters
- ☐ Verify MTF Confirmation
- ☐ Set Alerts (Entry, SL, TP1, TP2)
- ☐ Start trading with discipline!

TIP: The more elements aligned in your favor, the higher probability setup you have. Patience, risk management, and discipline are the keys to long-term success.

ATOMIC ANALYST + SMART UNIVERSAL EA

Connect, Automate & Trade with Confidence

Smart Universal Expert Advisor can read Atomic Analyst through iCustom buffers. This allows both tools to work together so you can automate the setup, manage the trade, and take profit levels with stop loss.

01 · Smart Universal EA reads Atomic Analyst

The Atomic Analyst interface shows a 'Bullish Trend' signal with a 'BUY ONLY' button. The 'AI Atomic Decision' section displays 'Quality 71%' and 'AI ASSISTANT ON'. The 'Atomic Controls' section includes 'Raw Signal', 'Alert', 'DAY', and 'Hide All' buttons. The 'Market Sentiment' section shows 'Bullish 90%', 'WAIT 5%', and 'Bearish 5%'. The 'Atomic Filters' section lists various indicators like Trend Bias, MTF Bias, Trend Strength, Pair Strength, Momentum, Volume, Volatility, Demand, RSI, MACD, Moving Average, Stochastic, Bollinger, Fibonacci, and Pivot Points, each with a status (e.g., BULLISH, WAIT, BEARISH).

02 · Smart Universal EA executes the trade

The Smart Universal Expert Advisor interface shows 'SUEA Status' as 'EA ON' and 'SUEA Manager User Orders' with 'BUY' and 'SELL' buttons. The 'SUEA Signal Source' section includes 'Trend Indicator' and 'Custom Indicator'. The 'SUEA Strategies' section shows 'Martin Recovery' and 'Pure Grid'. The 'SUEA Controls' section includes 'Start Grid', 'Stop Grid', 'Close Grid', 'Close Manual', 'Close Martin', 'Stop Sig Grid', 'Cancel Pending', 'Close Profit', and 'Close All EA'. A trading chart on the right shows a candlestick pattern with a green arrow indicating an 'ENTRY 1910.124' and a red line indicating a 'SL - 1900.251'. Other levels shown include TP1 - 1919.386, TP2 - 1928.421, TP3 - 1936.717, TP4 - 1944.478, and TP5 - 1956.936.

Why connect Atomic Analyst with Smart Universal EA?

Atomic Analyst provides the signal, levels, and market structure. Smart Universal EA turns that information into automated trades with professional risk and money management.

Management

Better Results
& Consistency

How to Connect Atomic Analyst to Smart Universal EA

- 01 Open Smart Universal EA**

Attach Smart Universal EA to the chart.
- 02 Go to Custom Indicator**

Open the Custom Indicator settings inside the EA.
- 03 Select Atomic Analyst**

Type "Atomic Analyst" as the indicator name.
- 04 Assign Buffers**

Set Buy buffer = 8
Sell buffer = 9
Other buffers = -1
- 05 Save & Apply Settings**

Click OK and apply the settings.
- 06 Run the EA**

Enable the EA and let it run.

What each tool does

Atomic Analyst

- ✓ Provides market direction and strength
- ✓ Shows entry, SL, TP1-TP5 levels
- ✓ Filters noise and weak signals
- ✓ Sends alerts and updates in real time

Smart Universal EA

- ✓ Executes trades automatically
- ✓ Manages risk and lot size
- ✓ Handles positions and orders
- ✓ Helps lock profits and reduce losses

TIP: Let Atomic Analyst find the opportunity and structure the trade, then let Smart Universal EA execute and manage it with discipline.

Two powerful tools. One winning combination.
Atomic Analyst + Smart Universal EA = Smarter Trading.
