TOKYO SEMI-MANUAL GUIDE

SELL TRADES:

Check trend on H4 time frame

Check Trend on H4 and H1 time frame
Both time frames indicate it is a sell with pink line and panel on chart showing Sell and bearish
No switch to m15 or lower and look for sell signals:

Here down trend strong bearish and use panel on chart to only sell

Allow EA to only sell, best to stop and make NEW SERIES red when market goes sideways and wait for new trend or continuation

BUY TREND:

Look at trend on H4. Here we see start of uptrend on H4 and will go down on lower time frame

Here uptrend strong bullish and use panel on chart to only buy

You can use the same set files as on blog:
