

HOW TO TRADE WITH TREND USING:

INDICATORS:

Gold Stuff Indicator

1. The first step is to get the trend on higher time frames like Daily and H4:

Here you can clearly see that the Gold Stuff Indicator is drawing a red line, the Multi Time Frame at the bottom right shows all time frames are red and that the Trend Scanner indicator on the top left shows all blocks and time frames are red so trend on Daily is clearly DOWN or BEARISH!

On H4 chart we see the same confirmation – all indicators point to a bearish trend.

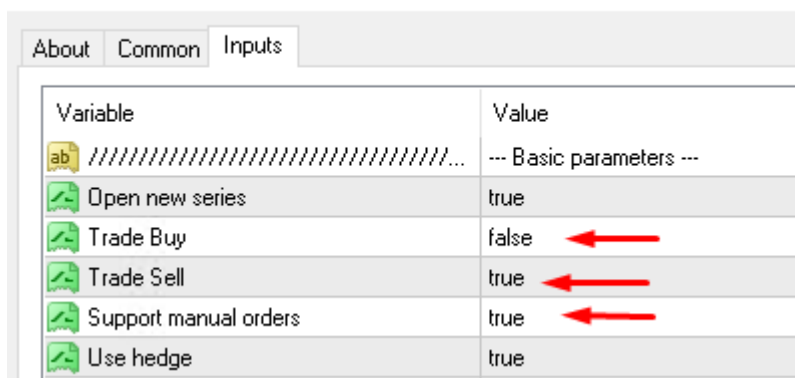

- The next step is to switch to a m15 chart and make sure that the indicators still points to down or bearish. (If the higher time frames point to a bearish trend but lower time frames point to bullish then wait for market to turn bearish on lower time frame. Always trade with trend on **higher time frame!**)

You will do the opposite for an up trend.

A: Trading with EA Gold Stuff:

Drag EA Gold Stuff on the chart and open the EA settings and make sure you make "Trade Buy" false and "Trade Sell" true and make "Support manual orders" true. So any manual order or order that you enter using panel on chart will be controlled by the EA according to your parameters or settings in the EA, like start lots, multiplier, TP etc.

Expert - EA Gold Stuff

Now you can click on the panel of EA Gold Stuff and make sure Trade Buy is red. EA will now only allow sell orders.

See example above of how to trade with trend using Gold Stuff Indicator, Trend Scanner and Strong Support! Every indicator points down and the price dropped through support, so it is clearly a sell!

In the above chart you can see that the main trend is down, so even if H4 points up all the other time frames points down, so it was a good idea to wait for the indicator to paint a red line. As you can see the price could not go through resistance and was rejected and dropped all of a sudden to close the 3 trades in profit and even enter another short position later, all with down trend!

Use the panel on the chart to control the EA to trade only with the trend!

If there are no open trades and you click on this button it will not start a new cycle.</p>

B: Trading with GS Trade Assistant

Follow the same procedure. Get the trend on higher time frames like Daily and H4, then look for the entry on lower time frame like m15.

First check your settings in the Trade Assistant EA, like multiplier, distance, lot size etc.

Here you can clearly see the trend is down

You can use the panel on the chart to enter the lot size and click on the “Open S” tab which means open a short/sell order. (You will click “Open B” for a buy order)

Here you can see the short trades that have been entered. After the big drop the H1 and H4 indicators bottom right and the Trend Scanner on top has changed from red to blue so it is the best to stay out of the market until all time frames point to either up (blue) or down (red)

On the chart above you can see the trend is down again, all indicators points to a sell!

EXAMPLE OF HOW TO ENTER BUY ORDERS IN AN UP TREND WITH EA GOLD STUFF OR TRAD ASSISTANT:

In the chart above you can clearly see the trend is up!

As you can see all indicators points upwards and price found support on the “Possible Support”

Above is an example of trading the uptrend with EA Gold Stuff

(Take note that the “Trade Sell” on the Panel is red, so EA will only take long positions!)

Above is an example of trading the uptrend with Trade Assistant. All indicators show that the trend is up. Use only the “Open B” tab to open buy orders in an uptrend and vice versa in down trend.

Example: Trading with the trend for one month using these 4 tools!

C. SPECIAL OFFERS

a) Get all EA's for free!!

Open an account with **RoboForex** (<https://roboforex.com/>), deposit a minimum of \$ 500 and get all EA's free: Use code "twds" when opening the account and contact me to get free EA's: @vstrukovEA or @ Dkmillion on telegram.

Open a Trading Account - RoboForex Ltd

The image shows a screenshot of the RoboForex "Trading Account" registration form. The form has tabs for "Real", "Demo", "CopyFX Trader", and "Contest", with "Real" selected. Fields include: "Trading platform" (MetaTrader 5), "Account Type" (MT5 ProCent), "Hedge system" (Yes/No), "Currency" (USD), "Leverage" (1:1000), "Password", "Confirm Password", and "Affiliate code" (twds). A red arrow points to the "twds" code in the affiliate code field. A "Confirm" button is at the bottom.

Please enter affiliate code "twds" as in screen shot above

RoboForex cents accounts:

mt5: minimum lot is 0.01

mt4: minimum lot is 0.1

Please send me the account number. The EA will be coded for your TWDS account number and **will only work on that account number**, not on any other account (also not on a demo you may request for a demo).

Let me know if it is mt4 or mt5

Send me a list of the EA's you want, take note that these EA's are martingale and it is better to use a cents account as you need about 3000 per chart but for Network you can start with \$500

(Please remember that author will first check if your account number is on his affiliate list. It takes time to code every EA for your specific account number and if you open an account with \$500 then obviously it will be impossible to run every EA's on that account. So think about this and plan your system before making your request. Remember that every time you change account number you have to use the TWDS code again and request author to code EA for new account number.)

b) Discount on a good and fast, reliable vps!!
