 Drawable TF	M5,M15,H1,H4,D1,K43
 Buy color	SteelBlue
 Sell color	Tomato
 X	0
 Y	20
 Panel Font Size	10
 Panel Font Face	Verdana

You have to type in the symbols of the pairs that you want to display on the chart. Make sure that if you are using a broker that has a suffix after the pair name, that you also type the suffix. If you want multiple pairs to display on the chart, then separate the pair names with a comma and don't use a space after the comma.

For example:

EURUSD,XAUUSD,GBPUSD

or if your charts have a suffix in the name like EURUSDm, type:

EURUSDm,XAUUSDm,GBPUSDm

- **The Drawable TF** will display the time frame that you type in, rather leave on default!
- **Take note:**
If you want to move the box, double click on it, it will make a little white box, then drag the box over the chart
