Frequently Asked Questions

The pair names that I want to add on the dashboard have a suffix (Example, EURUSD.m), how can I implement this?

Example #1: You want to add pairs with the same suffix on the dashboard. Example: EURUSD.m, USDCAD.m, XAUUSD.m NAS100USD.m, and GBPUSD.m (all pairs have same suffix of .m)

You will need to enter the suffix on the “Symbol Suffix” input setting. For example, if your brokers symbol for “EURUSD” is “EURUSD.m”, then you will need to enter “.m” on this input.

If you are adding any inputs on “Additional Pairs List” or “Custom Pairs List”, then you need to input the pair names without suffix and enter the suffix on the “Symbol Suffix” setting.

About Common Inputs Colors Visualization **Example only**

Variable	Value
123 Currency Pairs Preset	Popular 14 Pairs
ab Additional Pairs (Semi colon separated)	XAUUSD;NAS100USD
ab Custom Pairs List (Semi colon separated)	
ab Symbol Prefix	
ab Symbol Suffix	.m

Example #2: You want to add pairs with 2 or more different suffixes on the same dashboard. Example: EURUSD.m and XAUUSD.pro (.m and .pro suffix are different)

You will need to switch the “Currency Preset” to “Custom Pairs List” and manually type the pair names including the suffix on the “Custom Pairs List” input setting. You cannot input the suffixes on the “Symbol Suffix” because you are adding pairs with 2 or more different suffixes.

About Common Inputs Colors Visualization **Example only**

Variable	Value
123 Currency Pairs Preset	Custom Pairs List
ab Additional Pairs (Semi colon separated)	
ab Custom Pairs List (Semi colon separated)	EURUSD.m;XAUUSD.pro;
ab Symbol Prefix	
ab Symbol Suffix	

Example #3: You want to add pairs with a suffix AND pairs without suffix on the same dashboard. Example, EURUSD.m and GBPJPY (EURUSD has suffix and GBPJPY does not have suffix)

You will need to switch the “Currency Preset” to “Custom Pairs List” and manually type the pair names including any suffix on the “Custom Pairs List” input setting. You cannot input the suffix on the “Symbol Suffix” all pairs will use this setting to append the suffix on every pair names.

About Common Inputs Colors Visualization **Example only**

Variable	Value
123 Currency Pairs Preset	Custom Pairs List
ab Additional Pairs (Semi colon separated)	
ab Custom Pairs List (Semi colon separated)	EURUSD.m;USDCAD.m;GBPJPY;EURJPY
ab Symbol Prefix	
ab Symbol Suffix	

How can I customize the pairs shown on the trading dashboard?

You can go to the input settings of the EA and select your “Currency Pairs Preset” setting. The default is set to 7 Major Pairs but you are able to change this. You can also add non-FX pairs such as Indices, Commodities, and Crypto in addition to the currency pre-set by adding the pair names on the setting “Additional Pairs”. Please refer to this [section](#) more info.

Why is the trend scanner showing greyed out boxes without any numbers on it?

It means there is not enough history data yet on that particular pair and timeframe to properly calculate its win rate. You just need to wait a bit until there is enough data for proper calculation. If its still showing greyed boxes after a while, then you can manually download history data for that particular pair by going to Tools -> History Center.

The XAU on the Currency Strength Meter is stuck at zero percent. How can I fix this?

By default, the indicator will look at the pair name XAUUSD on your broker. If the pair name of Gold on your broker is different, then you must manually specify this on the input settings of the indicator. The setting to change is called "Pair Name for Gold" under the Currency Strength Meter section.

How can I enable push notifications to my mobile phone?

You can enable push notifications by following this guide: https://www.metatrader4.com/en/trading-platform/help/setup/settings_notifications

You can also enable email notifications by following this guide: https://www.metatrader4.com/en/trading-platform/help/setup/setup_email

How can I stay up to date with the latest updates and releases for the indicator?

You can follow us on our social media to get up-to-date with our newest releases and exclusive sales: <https://linktr.ee/takepropips>

How can I automate the trading signals of this indicator?

You can choose to automate the trade signals using an Expert Advisor if you cannot be in the computer at all times to analyze the charts. The TakePropips Trading Management Solutions EA will take the Donchian Trend Pro strategy and automate the trades for you. You can check it out here: <https://takepropips.com/tradingmanagementsolutions>
