

# RAZIEL EA MANUAL

Raziel EA is an advanced automated trading system designed to manage multiple strategies concurrently. It combines precision trading with customizable features to fit diverse trading preferences and risk tolerances.

## Key Features

- **Multiple Strategies:** Supports up to three independently managed strategies.
- **Advanced Risk Management:** Includes trailing stops, breakeven levels, and percentage-based lot sizing.
- **Time and Trend Filters:** Trades only during specified hours and in the direction of predefined trends.
- **Magic Number Assignment:** Tracks individual strategies using unique magic numbers.

## Input Parameters

### Strategy Settings

Each strategy can be configured independently:

- **Enabled:** Activate or deactivate the strategy.
- **MainTimeframe:** Timeframe for moving average calculations.

- **LotSize:** Fixed lot size for trades.
- **UsePercentageLotSize:** Enable percentage-based lot sizing.
- **LotSizePercentage:** Percentage of account balance to risk per trade.
- **StopLoss:** Stop loss in points.
- **TakeProfit:** Take profit in points.
- **UseTrailingStop:** Enable trailing stops.
- **TrailingStop:** Trailing stop distance in points.
- **TrailingStep:** Minimum step for trailing stops.
- **UseBreakeven:** Enable breakeven logic.
- **BreakevenPips:** Distance in pips to move stop loss to breakeven.
- **MagicNumber:** Unique identifier for trades.
