

Here's a step-by-step guide to install an indicator in MetaTrader 5, including enabling notifications:

Step 1: Download the Indicator

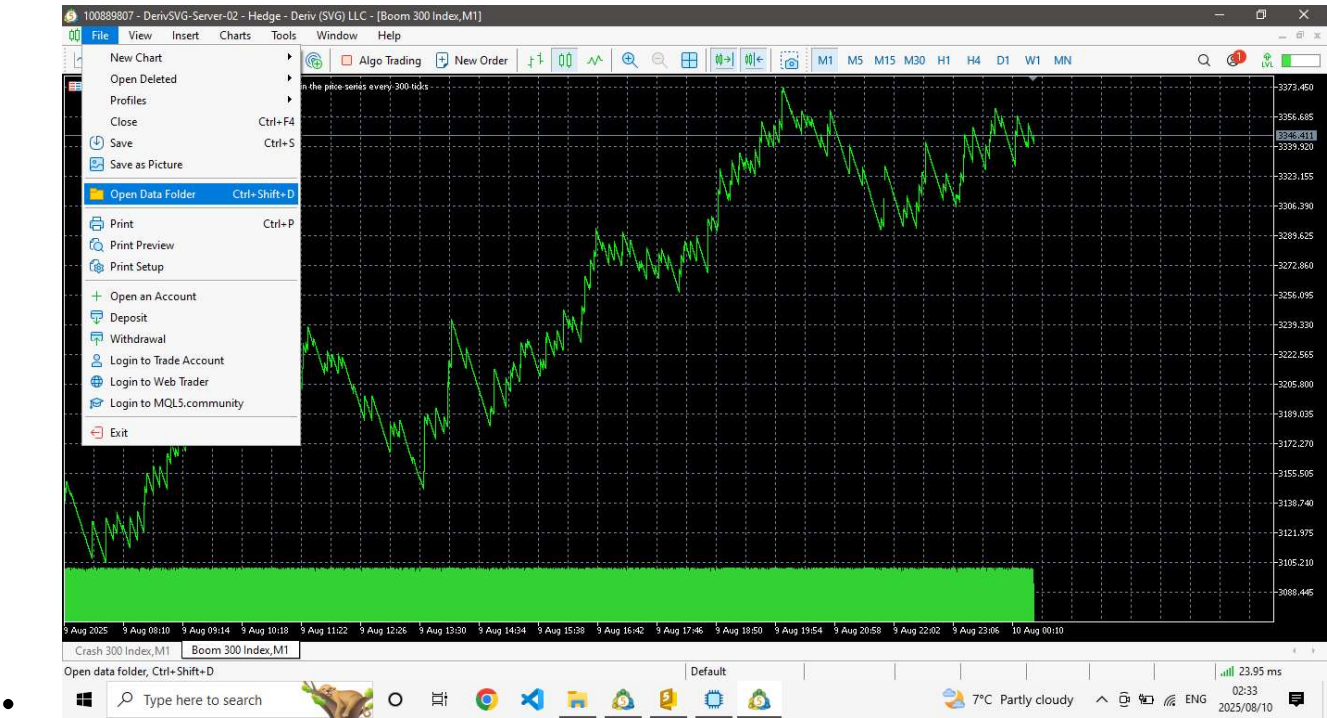

- **Obtain the Indicator File:** Download the indicator file, usually with a `.ex5` extension, from a trusted source.

Step 2: Open MetaTrader 5

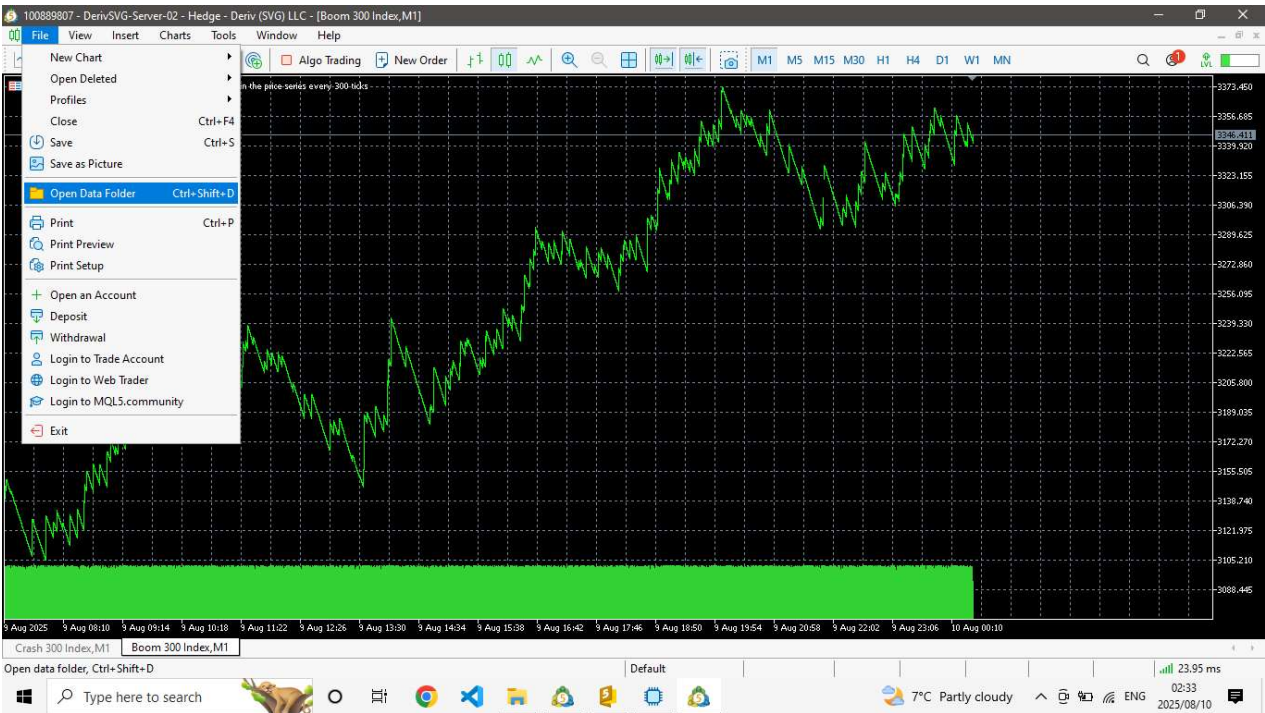

- **Launch MetaTrader 5:** Open the MetaTrader 5 platform on your computer.

Step 3: Copy the Indicator to the Correct Directory

- **Open the Data Folder:**
 - Go to the menu bar and click on **File**.

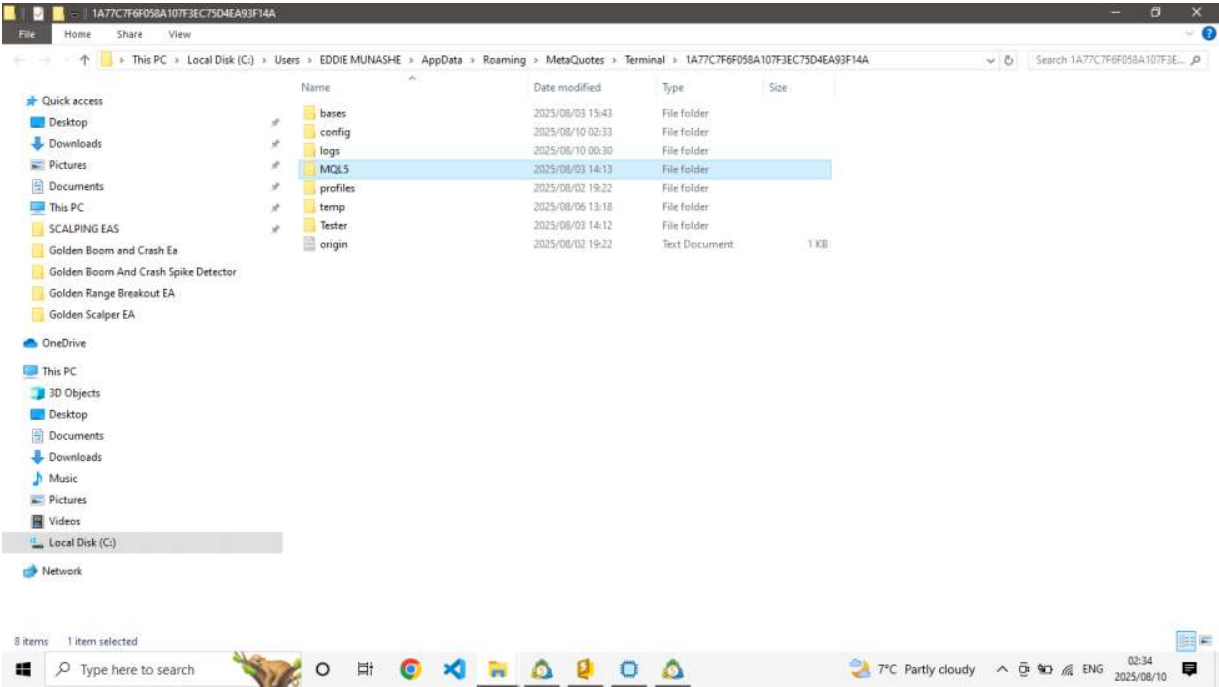

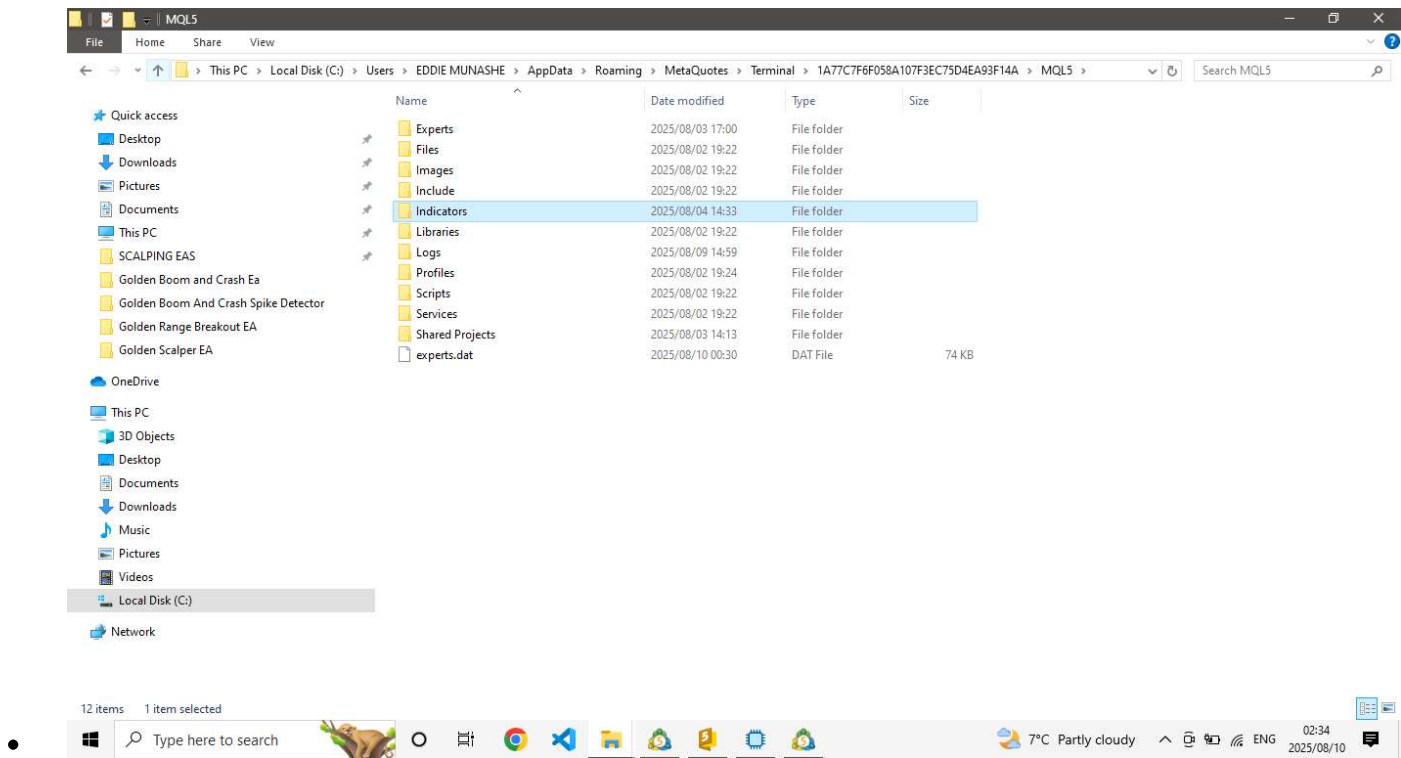

- **Select Open Data Folder.**

Navigate to the Indicators Folder:

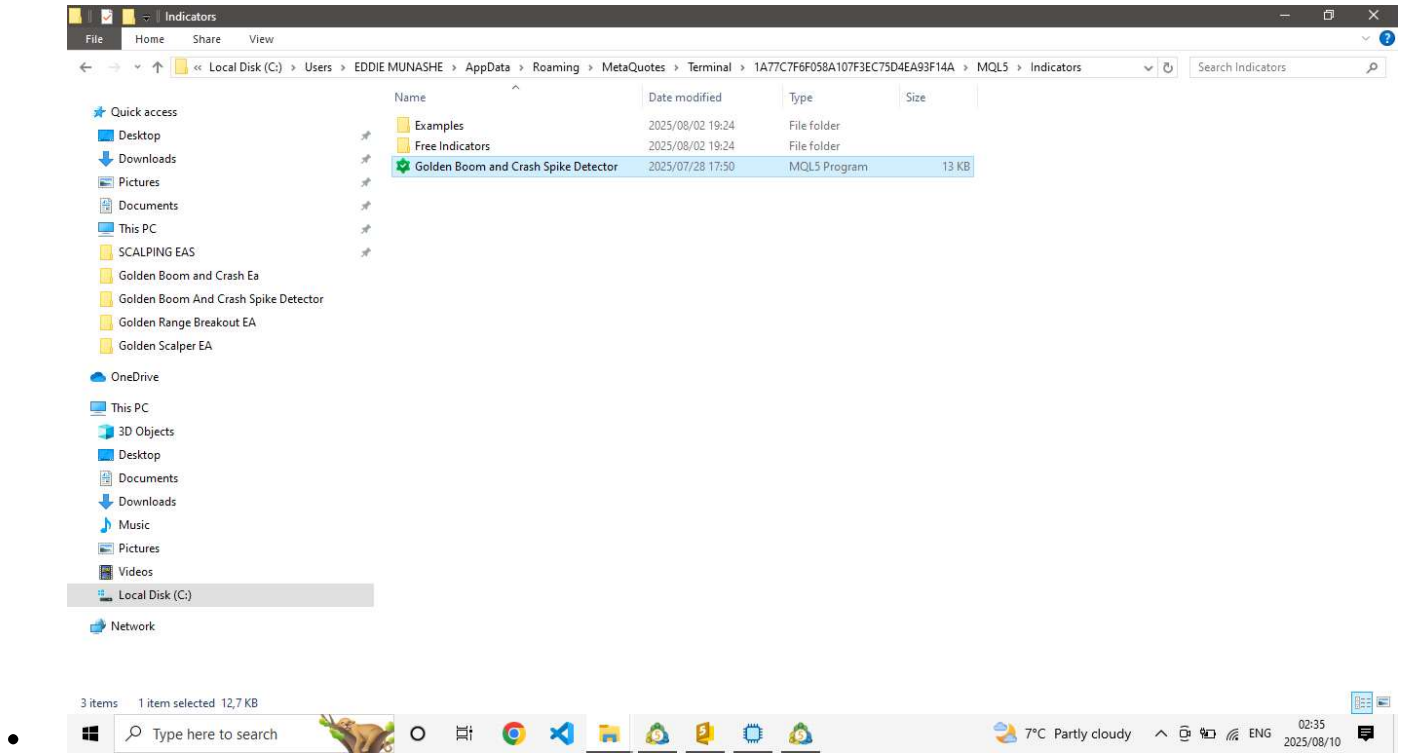

- In the opened directory, go to MQL5 > Indicators.

- Paste the Indicator File:**

- Copy the downloaded indicator file and paste it into the `Indicators` folder.

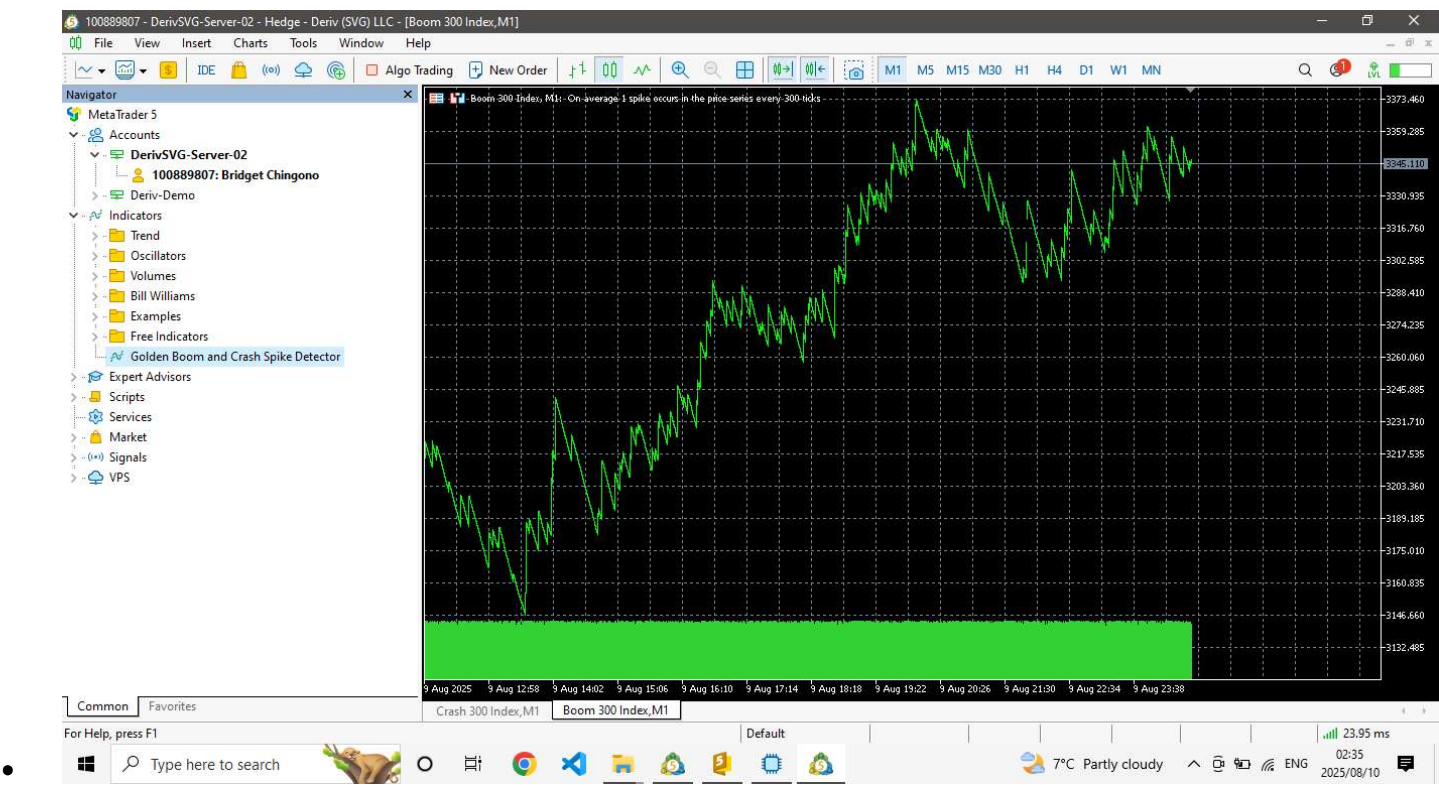

Step 4: Restart MetaTrader 5

- Close and Reopen:** Exit MetaTrader 5 and then restart it to ensure the indicator is recognized.

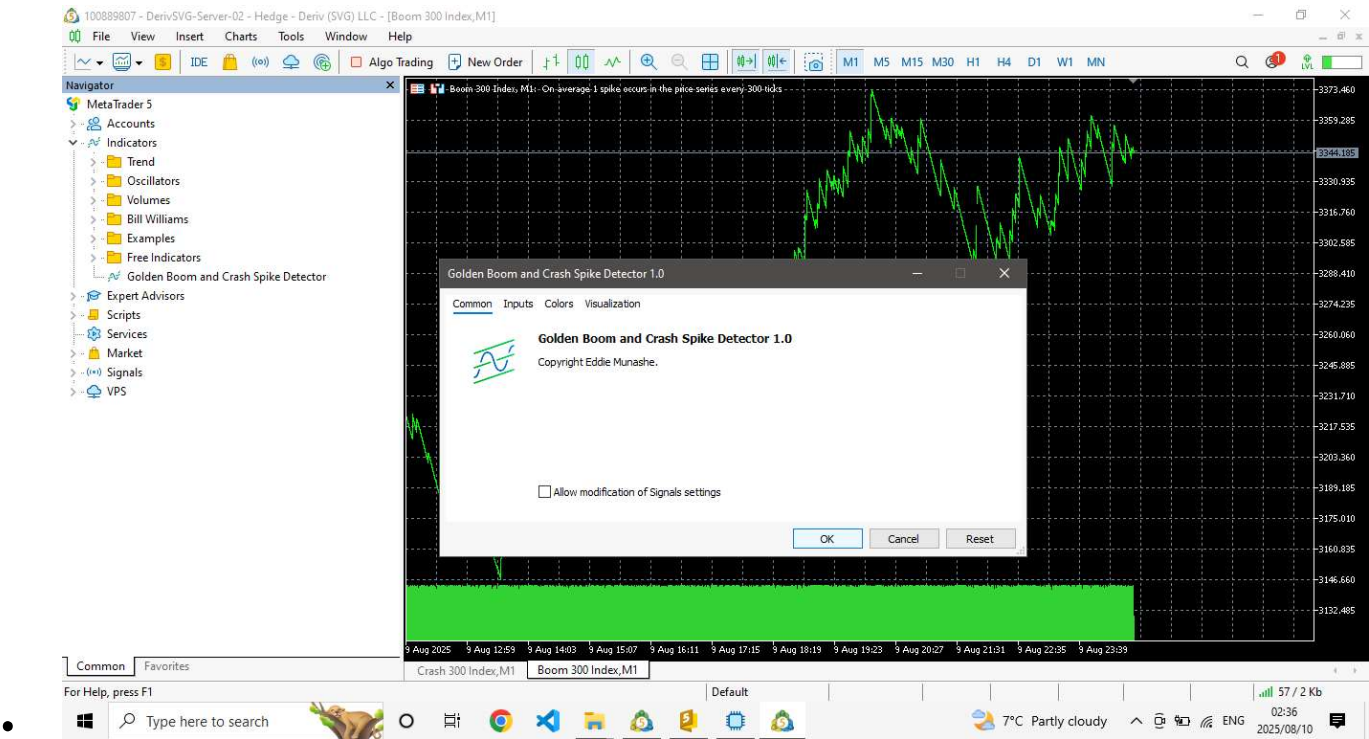

Step 5: Attach the Indicator to a Chart

- Open a Chart:**
 - Open the chart for the pair or asset you want to analyze.

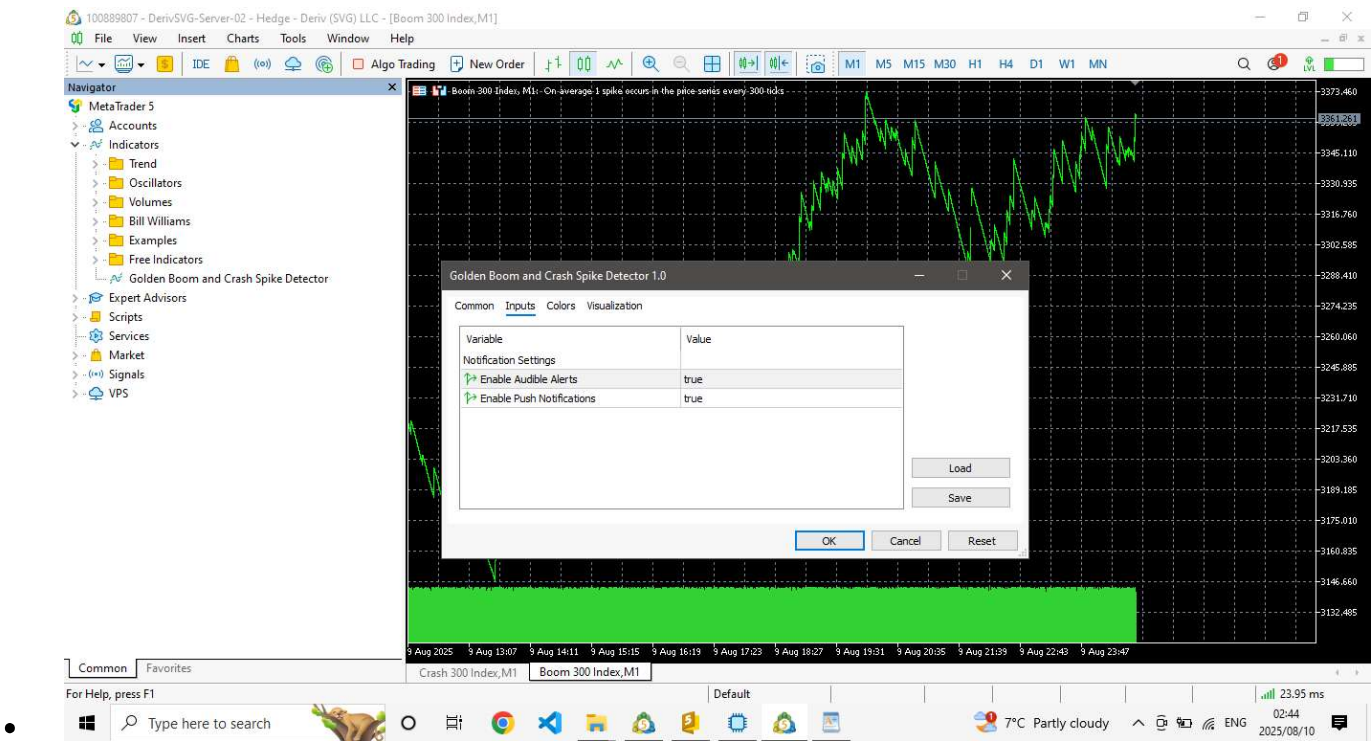

- **Access the Navigator:**
 - Press **Ctrl + N** to open the Navigator panel.
- **Locate Your Indicator:**
 - Find your indicator under the **Indicators** section.

- **Attach the Indicator:**
 - Drag and drop the indicator onto the chart or right-click the indicator and select **Attach to the chart**.
-

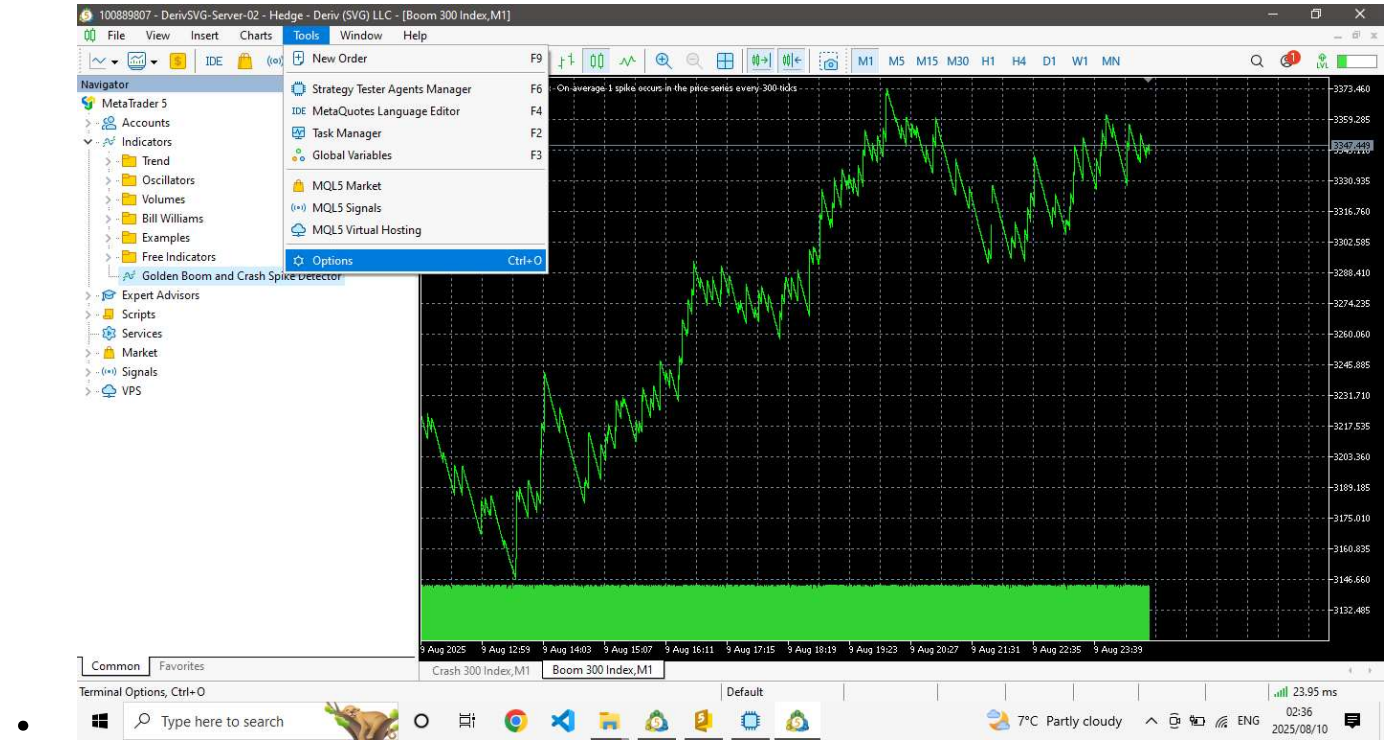

- **Configure Settings:**
 - Adjust any settings in the indicator properties dialog that appears, then click **OK**.

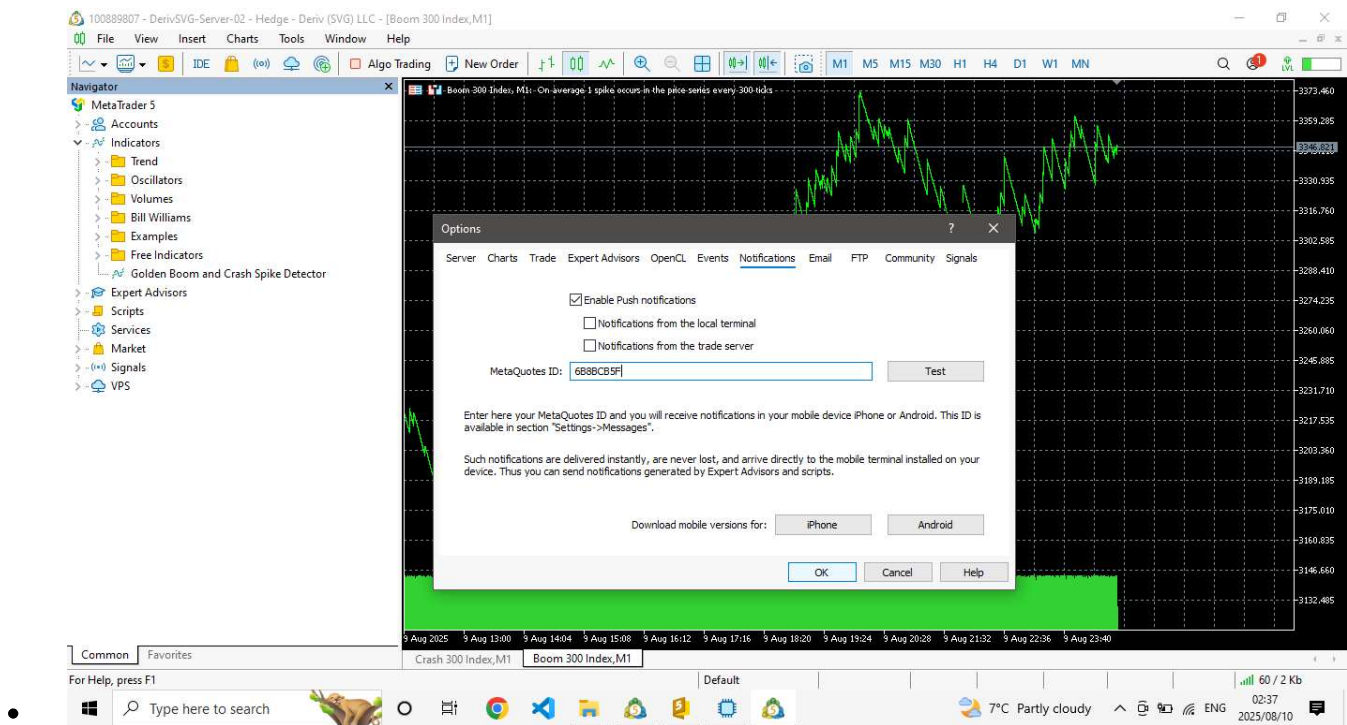

Step 5: Enable Notifications

- **Open Options:**
 - Go to the menu and click on **Tools > Options**.

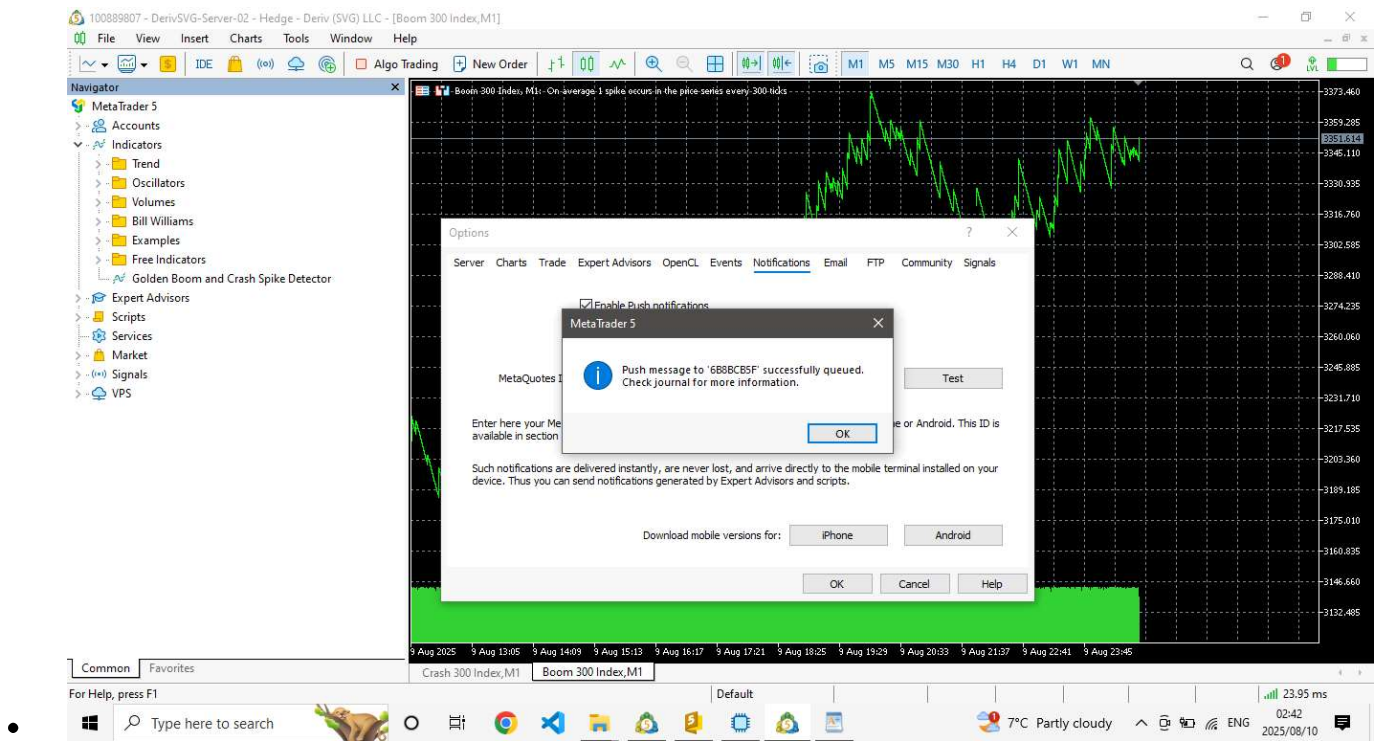

- **Navigate to Notifications:**
 - Click on the **Notifications** tab.

- Enable Notifications:**

- Check the box for **Enable Push Notifications**.
- Enter your **MetaQuotes ID**, which you can find in the mobile app under **Settings > Messages**.

- Test Notification:**

- Click on **Test** to ensure the notifications are working. You should receive a test message in your mobile app.

Step 7: Confirm Indicator is Active

- **Check the Chart:**

- Ensure the indicator is displayed correctly on the chart.

Conclusion

You have successfully installed an indicator in MetaTrader 5, enabled notifications, and can now use it to analyze the market. Monitor for notifications as needed!
