

Forex robot Auto-Profit 3.0

The Auto-Profit branch of the Forex robots has been replenished by another version this year. The new version of the robo trader named **Auto-Profit 3.0** has inherited all merits of the previous versions of the advisor. This has let the advisor combine high profitability with low risks.

The Auto-Profit 3.0 expert advisor is a multicurrency robot, just like its predecessors. By means of the described advisor, it is possible to successfully carry on trade involving various instruments (currency pairs, CFD, metals, etc.) as well as various currency pairs.

The robot's profitability percentage rate depends on the advisor's settings, the TF pair schedule, and the market pattern and fluctuates between 10% and 50% per month.

The advisor enters the market in agreement with the Bar analysis results. This is the reason why the number of deals concluded by the advisor depends directly on the pair schedule time-frame. For the sake of risk reduction, it is recommended to apply the TF H1 schedule when installing the advisor.

In case you love risking and want to reap maximum profits from Auto-Profit 3.0, you should adjust it to M1.

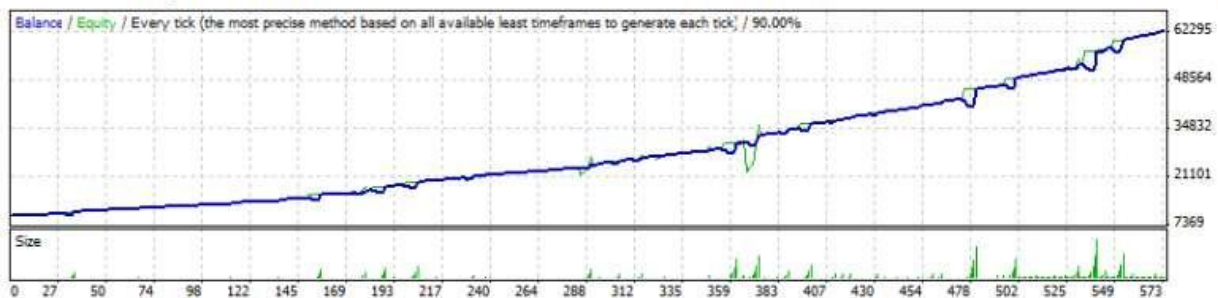

Results of the robot's testing:
