U.S. Government Required Disclaimer - Commodity Futures Trading

Commission Futures and Options trading has large potential rewards, but also large potential risks. You must be aware of the risks and be willing to accept them in order to invest in the futures and options markets. Don't trade with money you can't afford to lose. This is neither a solicitation nor an offer to Buy/Sell futures or options. No representation is being made that any account will or is likely to achieve profits or losses similar to those discussed on this website. The past performance of any trading software or methodology is not necessarily indicative of future results.

CFTC RULE 4.41 - HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN LIMITATIONS. UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL TRADING. ALSO, SINCE THE TRADES HAVE NOT BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. SIMULATED TRADING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN.

No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. Hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading. All information on this website or any e-book purchased from this website is for educational purposes only and is not intended to provide financial advice. Any statements about profits or income, expressed or implied, do not represent a guarantee. Your actual trading may result in losses as no trading software is guaranteed. Introduction

Thank you for your purchase of “Buy Sell Forex Secret”!

Buy Sell Forex Secret software package includes:

- Step-by-step users guide
- Indicator's secret trading algorithm explained in detail
- Buy Sell Forex Secret indicator software itself
- Live Actions Screenshots
- Sample Trades examples
- Personal "I will help you" promise from the developer

Buy Sell Forex Secret is very simple to use. Pink arrow - sell, blue arrow - buy. It includes multiple professional indicators put together for the best possible results. There is also a smart informer system, that will display some important information right on your chart. This information includes name of the indicator, trend direction and strength, last generated signal, etc. Buy Sell Forex Secret can also alert you of new entry signals via email or pop-up sound alerts, which will save your time and make your trading much more convenient.

It's extremely important for you to fully understand how Buy Sell Forex Secret works. Read this guide carefully, it has a lot of important information that could greatly improve your trading experience.

Please try using the indicator on a demo account first. Only move to trading with it on a live account, once you are completely familiar with Buy Sell Forex Secret and fully understand all the simple rules on how to use it correctly.

Do not hesitate to contact us if you have any questions!

We wish you a great trading success!

Installing the Indicator

IMPORTANT: Make sure to **update your MT4** to the latest build (build 600). Buy Sell Forex Secret is designed to give you best results and to work properly only with the latest version of MT4 platform.

If you don't have MetaTrader ® installed,
please download it from this link:

http://www.alpari.co.uk/files/site_uk/000software/MT4_set_up.exe

Follow the instructions and open a demo or real account. We recommend trading the indicators on demo account before proceeding to real accounts.

Unzip the zip file that you have downloaded :
The indicator file is

BuySellForexSecret.ex4

The user's manual file is: BuySellForexSecretGuide.pdf

MT4 Build 600 installation instructions:

Step 1:

1) Open your MT4 platform

2) Click File — Open Data Folder. Here you will find a folder called MQL4, this is the new “home” for all your .ex4or .mq4 files you have

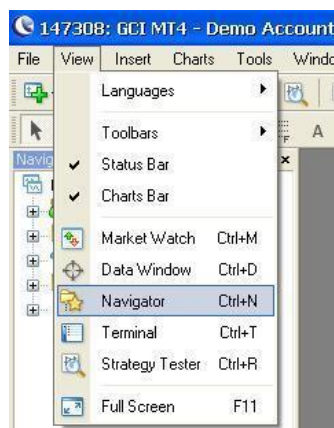

3) Open folder MQL4. Here you will find Indicators folder. Copy your Indicator (ex4 or .mq4) files into MQL4/Indicators folder. Do this by right clicking on the file and clicking “copy” and then “paste”.

4) Restart your MT4.

If you have any difficulties, please contact our technical support and we will help you as soon as possible.

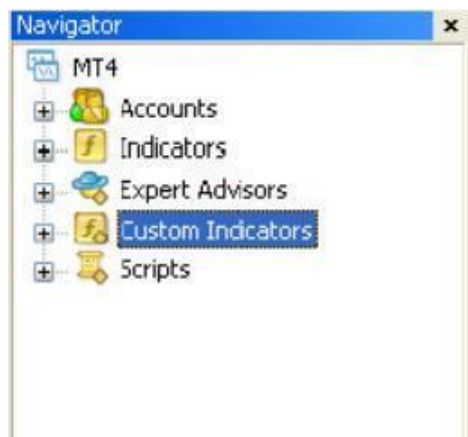

Step 2: Open the MetaTrader® platform, and click on View -> Navigator.

You can also press CTRL+N.

Click on 'Navigator'

Step 3: A window titled 'Navigator' will appear. Next, click on Custom Indicators.

Step 4: You should see the **BuySellForexSecret** in the Custom Indicators folder. Double click on the Buy Sell Forex Secret file and click OK to load it onto your chart.

If you need any assistance, please contact our technical support team.

Informer

BuySellForexSecret has been enhanced with a smart informer system, which is designed to make your trading more pleasant and convenient.

The informer shows the name of the indicator, current pair and timeframe, last generated signal, probability (strength of the trend) and the time left until next candle appears.

MUST READ RULES on how to use the signals

Important Rule #1:

Do not use the indicator on a flat market! Use the indicator ONLY at active market hours – for example London session, US session.

Trend will not be noticeable on a weak market (night time, Christmas period, other holidays etc...) keep reading and I will explain everything ...

Important Rule #2:

- Identify a current trend. (Remember? Trend is your friend?)
- Ignore all signals against a current GLOBAL trend!
- Try using the informer to find out how strong the current trend is.

Example:

Trend is up – but you get a “sell” signal
(Ignore it and wait for a “buy” signal to enter)

This is the most important rule, if you follow it you will have almost no losing trades at all.

Important Rule #3:

The next highly important rule: Do not trade and do not use the indicator on a sideways trend. This is a “MUST follow” rule.

If you DON'T follow or ignore the rules above – good results are NOT guaranteed!

Stop Loss

Place your stop loss according to the popup alert SL.
In most trades stop loss is calculated with this formula:
Previous bar high or low + extra number of pips.

You can adjust the SL extra number of pips in the indicator INPUTS.

IMPORTANT: Set stop loss for ALL your trades and DO NOT deviate from it. Once the trade has touched your stop loss, be disciplined and close the trade. This will protect you from major capital losses.

Entering Trades

Blue arrow, as shown on the screenshot to your left, is the signal to enter with Buy.

Pink arrow, as you can see on the screenshot to your right, is our signal to enter with Sell.

Exiting Trades

Option 1

Exit your trades when the BuySellForexSecret issues the opposite trading signal. This ensures that you trade with maximum profits and exit right before the market is expected to reverse.

If you enter on a **buy** signal (**blue**)

- exit as soon as a sell signal is generated (pink).

If you enter on a **sell** signal (**pink**)

- exit as soon as a buy signal is generated (blue).

Option 2

Exit trades according to the popup alert TP number.

Remark: You can adjust TP and SL levels depending on your trading style. This can be done in the indicator inputs.

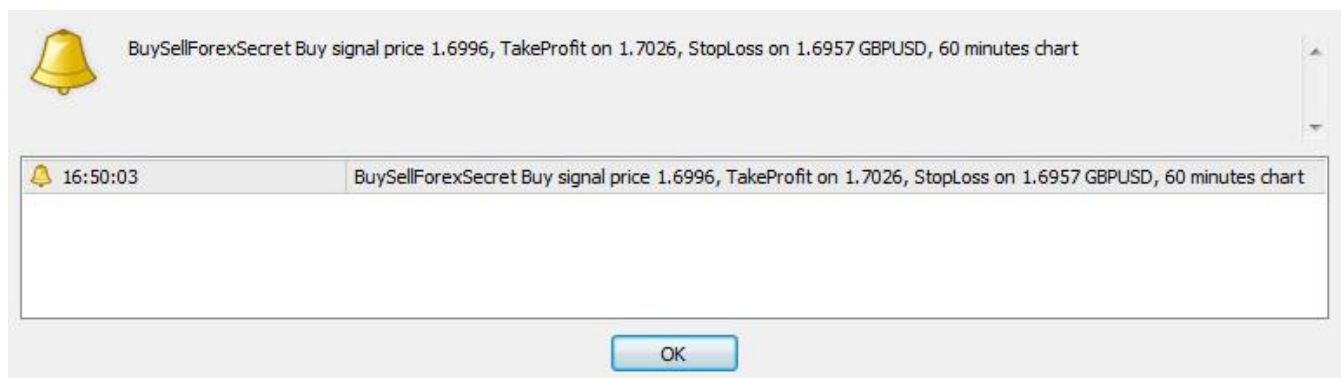

Option 3

Another exit mechanism which is highly effective is to exit near strong support or resistance levels. It is a method that generates exits earlier, so you take profits early.

Time Frames and Pairs

- 15 min, 30 min, 1 hour, 4 hours (M30 Shows best results)
- All major pairs. But works best with all JPY pairs (example EUR/JPY, NZD/JPY, CHF/JPY etc.)

Signal Popup Alert Window:

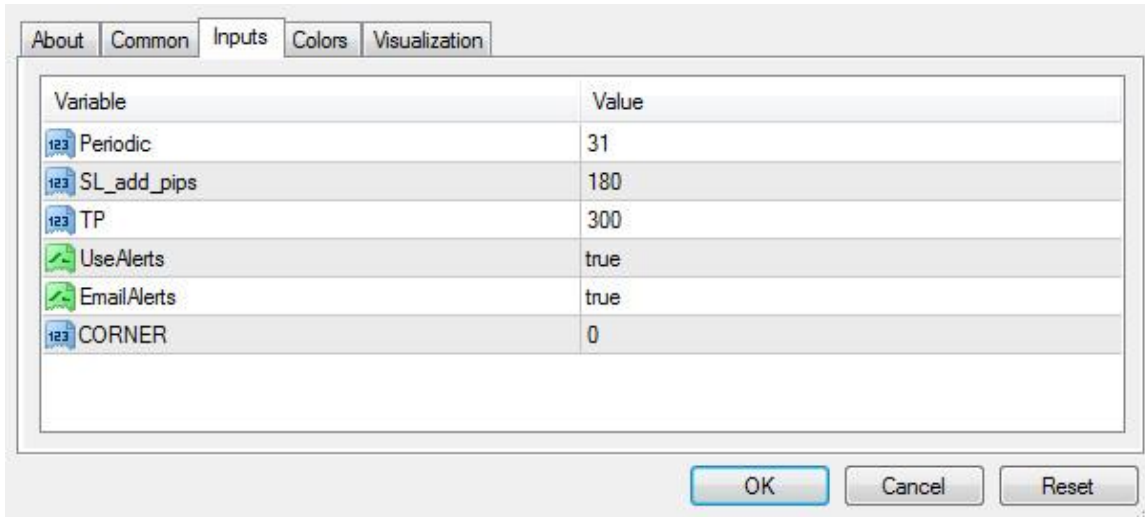

Buy/Sell signal price - current entry price

TakeProfit – take profit level

StopLoss – stop loss level

X minutes chart – timeframe

Input Parameters:

Variable	Value
Periodic	31
SL_add_pips	180
TP	300
UseAlerts	true
EmailAlerts	true
CORNER	0

**All the Inputs are ready to use/trade by default.
You don't have to change anything.**

If you wish you may change the sound (**UseAlerts**) and email (**EmailAlerts**) alerts to true/false.

The most important indicator input is **Periodic**. I highly recommend you DO NOT change these settings, as they work based on a very complicated specially adjusted trading strategy. Each indicator file has a different signal period set by default, depending on the timeframe it was set for.

You can try changing Periodic value to speed up the indicator... but you might get little more false signals.

Stop Loss and Take Profit (SL_add_pips and TP) – preset extra number will be added to the previous bar high or low and displayed in your popup alert. I also highly recommend to use the default values for SL and TP, however you can change them according to your personal preference.

In the very bottom of the input parameters, below the color settings, you can find an input called **CORNER**. By default it's set to 0. This input is responsible for moving the info box in any of the corners of your trading chart. 0 - upper left corner, 1 - upper right corner, 2 bottom left corner and 3 bottom right corner. It's useful to change this input when the info box is coming on top of the price and makes the signals hardly visible.

EMAIL alert setup:

Setup your metatrader4 to send email:

Email alert is already activated in the Buy Sell Forex Secret INPUTS, all you have to do is setup your own mail server info...

Email setup can be done in: Tools => Options => Email

If you need more info on how to setup an email alert, go to [youtube.com](https://www.youtube.com) and search for "mt4 email setup" there are plenty of free video samples.

Recommendations

Try to use the indicator ONLY during ACTIVE market!

Do not use the indicator on a weak/slow market – outside recommended trading hours (London or US sessions). Signals never work well on a weak market; this has been proven many times...

The London session is the largest market and it opens at 8.00 GMT or 3AM EST and closes at 17.00 GMT or 12 PM EST.

Trading is best between 8.00am GMT and 10am GMT

The New York session opens at 13.00 GMT or 8 AM EST and closes at 22.00 GMT or 5 PM EST.

The best trades occur in the first 2-3 hours.

IMPORTANT: It is extremely important to trade only following the current trend! It will cut ALL bad trades! Never place a trade against a trend.

Example:

If the current trend is up and the indicator shows “BUY” signal – place a trade.

If the current trend is up and the indicator shows “SELL” signal – NO TRADE! Wait for the next “BUY” signal...

Stay away from using the signals and open trades on unclear trends or sideways trends – example:

Money Management

Money management is a very important concept that has an enormous effect on draw downs and margin calls. The cardinal rule of money management is the following:

You should only risk 1-3% of your account on any single trade.

You may have heard this rule a hundred times before, but it is amazing to see how many good traders fail to comprehend this concept – and don't understand why they are wiped out again and again, despite great entries and timing of trades.

Another important concept that is related to your **stop loss**:

In this strategy you learned how to place a stop loss for each setup.

This stop loss is calculated regardless of your level of risk or your equity, and is based solely on price- action. After a stop loss is set, calculate your trade size so you achieve the right percent of risk for your trades.

For example: your stop loss is 10 pips, and your equity is 10,000\$, you wish to risk 2% of your equity in this trade, so you enter a trade with 2 lots – so your risk is 200\$, or 2%.
